HIS NOBLE WORKS AT HOME.

"Don't you think, Minerva," said her husband anxiously as he dia the kitchen apron firmly around his waist and tucked his whiskers behind the bib to keep them out of the dishwater? "don't you think that we are carrying this idea of cooperation in domestic matters to extremes? I have been washing dishes for a week now, and between times I have been doing a little Scriptural reading, and I cannot find in the Bible any authority for men's doing kitchen work, but women are frequently spoken of in this connection."
"She looked well to the ways of her household," she remarked willingly with her hands. "She riseth while it is yet night and giveth meat to her household." These quotations, Minerva, would seem to warrant the conclusion that household duties should properly be assigned to the woman."
"My dear," replied his wife, "if you in II Kings xxi. 12, these words: 'I will wipe Jerusalem as a man wipeth a dish, wiping it and turning it upside down.' This proves that you are nobly doing the work designed for you by taken from the town mains."

Providence. When you are through be sure to wash the towels clean, shake them and hang them straight on the rack. Death, you know, lurks in the dishcloth. I am now going out to attend a meeting of the Society For the Extinction of the Microbe by Means of Electricity.—Ladies' Home Journal.
AN ELECTRICAL SNOW MELTER.
A Berlin scientist advocates the use of electricity for clearing away snow. He claims that the method is cheaper than the one now in vogue. The apparatus consists of a platform, on to which the snow swept off the roadway is shoveled, and beneath which are a series of pockets filled of thin metal kept hot by electric radiators. The snow falls from the platform into the pockets, and is discharged as water from the bottom. The platform may be mounted on wheels for transport to various parts of the town, and may be stationed near the street drains, so that the water can run off, or the electrical heaters may be erected at special depots, to which the snow is conveyed. The requisite current may be going the work designed for you by taken from the town mains."

Great Bargains in Women's Wearing Apparel for Saturday Night & Monday

Sale of Ladies' Fine Dress Skirts—bargains in Raincoats and a limited number of Suits, Samples and odd lines, all marked at marvelously low prices.

CARLOAD OF GYPSY MOTHS DISTRIBUTED

Eggs Were Attached to Wood—Left All Along the Line of the Boston & Maine Ry.

BIDDEFORD, Me., April 15.—The discovery that a carload of gypsy moth eggs from the moth-infested woodlands of Massachusetts has been distributed along the line of the Boston and Maine R. R. between Dover, N. H., and Scarborough, Maine, was announced today by Captain E. E. Philbrook, special field agent of the department of agriculture. Captain Philbrook said that the eggs were deposited on some shlm wood, a carload of which was brought into Maine on January 23, and distributed along the track. Shlm wood is used in evening up the track, and is shipped in logs about three feet in length, these logs being piled at the section houses to be cut up for use as they are needed. The carload in question was badly infested with the egg clusters of the gypsy moth, which have been found in greater or lesser quantities wherever the logs were left along the line. The number of cities and towns of the state which are now infested by the moth is eighteen, a gain of four over the number infested in the year of 1908, which means so much additional territory to be covered by the men engaged in the work. Those places are all in York County in the southwestern corner of the state.

On Tuesday night the Charlotte-town Club was broken into, and a quantity of liquor stolen, about thirty bottles in all, including champagne, whiskey, port and beer. Entrance was effected through the rear door. A hole was made in the plate glass of the upper portion and through the opening the burglar inserted his hand, turned the key and unlocked the door. The plate glass in the upper portion of the door of the room where the liquors are kept, was also smashed in. The police have been hard at work on the case, and it is said they have a strong clue to the perpetrators—Patriot.

LIST OF DEAD IS REDUCED TO SIX

SAN FRANCISCO, Cal., April 15.—While it is believed that only six persons lost their lives in the five that destroyed the St. George Hotel early today, some thirty of the three hundred lodgers have not been formally accounted for. These probably went away without reporting their safety. The only body identified is that of C. H. Johnson, of San Antonio, Tex. Among the guests still unaccounted for is Herman Muir, a cigar maker, of Rochester, N. Y. The proprietor of the hotel, J. W. Shanahan, has been in trouble with the Board of Public Works since the fire of 1906.

CAN'T BET ON BASEBALL

NEW YORK, April 16.—In an effort to prevent betting on baseball games forty police detectives have been assigned to duty in the grand stand at the Polo Grounds. Three men were today held in \$300 bail each in the Harlem police court on charges of gambling at the New York-Brooklyn games. Since the closing of the race tracks the police learned that many book-makers had planned to take bets on the ball games.

THE LONDON LANDLORD.

He is a Tyrant, and His Tenant is a Sort of Slave.

According to Sydney Brooks, London correspondent for Harper's Weekly, New Yorkers who live in rented flats or houses are enjoying a condition of paradise compared with the lot of the London tenant. The British landlord, he complains, is a tyrant, and the long lease system is the basis of his tyranny. The system of twelve month leases that obtains in New York is the Magna Charta of the tenant. It has done infinitely more for American happiness than either the Declaration of Independence or the divorce laws. It makes landlords compliant and confers upon the tenant a status of something very like equality.

To be able to take a house or a flat for a year, with the option of renewal at the same rent—a rent that in houses includes all decorations and repairs and in flats includes steam heat, electric light and a perpetual supply of hot water—is to be a free man. What London landlords are apparently on the lookout for is a slave, and a slave who, besides being a milliner, will outfit themselves with a skeleton framework of a home that he hands over to you for twenty-one years. The tenant does the rest. If he wishes to add a new window or to put in the electric light it must be done at his own expense. You are to imagine a procession of tenants passing through every London house, each one of them laying out money on some pet improvements of his own, this one adding a billiard room, that one concentrating on a gas cooking range, a third lavishing parquetry upon the drawing room, a fourth bringing the bathroom up to date, a fifth installing a heating system, and so on. And every one of these additions becomes in the end the landlord's property.

NO. 339 STOOD FOR SENATOR MCCARREN

On the Books of Ennis & Stoppell—Owes the Firm \$100,000.

NEW YORK, April 16.—Something of a sensation was created in financial and political circles today when an announcement was made that Receiver Lindsay Russell of the failed brokerage firm of Ennis and Stoppell, had obtained an order from Judge Eick in the United States District Court, summoning Senator Patrick H. McCarren, the well-known Democratic leader of New York, to appear before United States Commissioner Alexander next Tuesday to testify at the bankruptcy hearing. The summons for Senator McCarren was based on an alleged discovery by expert accountants who are going over the books of Ennis and Stoppell, that one of several "blind" accounts, entered as "No. 339," was that of Senator McCarren, who for years past had been a close personal friend of both members of the firm. Account "No. 339," it is stated, was indebted to the firm to an amount aggregating over \$100,000. Several members of the stock exchange and several others have also been summoned.

WHERE WOMAN RULES AND RULE IS BLESSING

More Men Now Occupies But a Secondary Place in Finland.

HELSINGFORS, April 17.—Although the women members of the Finnish Diet only number twenty-five, those employed in the public services exceed 75 per cent. of the total number of employees, and in the railway offices, banks and other commercial and public institutions their number is legion. Women doctors, jurists, clerks and teachers are common in other countries, but here in Helsingfors women street-sweepers, milk carriers, paperhangers and book-binding clerks are common. There is nothing a Finnish woman cannot, will not and does not do. The progress of the country, the methodical, clean ways and the unflinching courtesy and dispatch one meets with are evidence of it. These women are clever and diligent, too. The vast majority speak three languages, and about 50 per cent. have a sound knowledge of a fourth. They all speak Swedish and Finnish (and Finnish is as difficult as Russian). Most have as well Russian or German, and many have both, and English in the bargain. They are splendid workers, and have left their mark on the social legislation of the country. They swim like fishes, can "ski" and skate and play hockey, or hand, or tennis with the best. They work hard during the week, and Sunday is often devoted to recreation, to preserve their fine health and red cheeks. There are certainly drawbacks to this domination of the petticoat. Said to relate, man is nothing, or, at best, only a very secondary object. Firstly, wo-

FRESHETS CAUSED MILLS TO CLOSE DOWN

BOSTON, Mass., April 16.—Manufacturing plants in various New England cities and towns were shut down today on account of the high water in their wheel pits, and several thousand employees had a day of enforced idleness. The freshets which caused damage yesterday about the upper portions of the larger rivers of New England had reached the lower end of the streams today and the water was at most at record height over the dams in many of the larger manufacturing cities and towns. No heavy damage was reported, however, the main loss being in working time where the plants were forced to shut down. The Lisbon Falls and Peppescot Pulp Mills on the Androscoggin River at Brunswick, Maine, were shut down, and the Jackson Cotton Mills at Nashua, N. H., on the Merrimack, also had to stop operations. The International Paper Company's Cascade Mills at Berlin, N. H., was another of the plants which was forced into idleness temporarily, by the rise of the Androscoggin. Along the Connecticut River most of the factories in Vermont, which had to stop operations yesterday, resumed business today, the water having receded. Tonight nearly all points along the larger rivers reported the water as rapidly falling and no further damage is looked for. Most of the railroad washouts in Vermont and New Hampshire caused by the heavy rains and freshets of Wednesday and Thursday have been repaired and trains are now running as usual. It is believed that all the manufacturing plants which have been closed will be able to resume operations tomorrow.

AIRSHIPS COLLIDE AND LOCK TOGETHER

VIENNA, April 17.—An extraordinary collision in mid-air took place yesterday above the aviation ground at Linz. The Archduke Joseph Ferdinand, who is an ardent aviator, was testing a new dirigible balloon, and in order to ascertain its speed and endurance in comparison with other vessels, he arranged that Count Adolphe von Sternberg should make a simultaneous ascent in his dirigible. The two airships rose into the air at 8 a. m., but they had scarcely reached a height of about seventy yards when they were seen to rush toward each other, and finally to come into contact. The shock, says the archduke's companion, General Schanachula, was extremely violent, and for a few seconds it was thought that the balloons would fall to the ground. Neither of the vessels sustained any injury, however, but they remained bound together so firmly that they could not be separated, and the voyage had to be continued in this double fashion until they descended at Tulla five hours later.

CZAR TO MEET KINGS ON TRIP

PARIS, April 17.—The St. Petersburg correspondent of the Temps concerns the report that the czar will undertake a prolonged cruise in May with the object of returning his visit to Russia made by the King of Italy some years ago. The emperor will probably call at Stockholm, Copenhagen, Christiania, Portsmouth and Cherbourg or Brest. He purposes to meet the kings of Sweden, Denmark, Norway and Great Britain and the president of the French republic. It is not improbable that the royal yacht may also make a stay at Lisbon and Barcelona, but this is uncertain. The czar and the King of Italy will meet at Naples, unless the latter should express a desire to see the emperor in Rome. Probably the czar will then visit Athens and Constantinople. King Victor Emmanuel spent Easter visiting the scene of the great earthquakes in the battlement Umberto Primo. They are splendid workers, and have left their mark on the social legislation of the country. They swim like fishes, can "ski" and skate and play hockey, or hand, or tennis with the best. They work hard during the week, and Sunday is often devoted to recreation, to preserve their fine health and red cheeks. There are certainly drawbacks to this domination of the petticoat. Said to relate, man is nothing, or, at best, only a very secondary object. Firstly, wo-

YOUNG GIRL'S DEATH CAUSES DOCTOR'S ARREST

Charged With Performing Illegal Operation on Sixteen Year Old School Girl.

HOLYOKE, Mass., April 16.—The death of Miss Bertha P. Webb, last Wednesday, a sixteen year old girl, who was a pupil at the Morgan grammar school, was followed tonight by the arrest of Dr. Odillon J. Comiers, a prominent physician, on the charge of performing an illegal operation. Dr. Comiers was released on bonds of \$5,000 for a hearing in the police court tomorrow morning. He denied any knowledge of the cause of the young woman's death. Miss Webb was the daughter of Mr. and Mrs. Frank T. Webb, of 397 Maple street. Her death, which occurred Wednesday afternoon at a hospital here, was reported in the local papers as resulting from malaria. An autopsy will be held on her body tomorrow morning by Dr. Frank Holyoke, the medical examiner. Frank Webb, the girl's father, is a paper mill worker.
