

CHAPTER XI.

THE EFFICIENCY OF MACHINES

The objects of the machine—Meaning of efficiency—Discussion on friction—Friction in sliding pairs—Friction in turning pairs—Efficiency of complete machines—Examples—Effect of friction in governorsPage 134

CHAPTER XII.

GOVERNORS

The function of the governor—Methods of control—Fly-ball governors—Spring governors—Sensitiveness, powerfulness—Isochronism—The characteristic curve—Design of fly-ball governor—Shaft governors—Effect of distribution of weights.....Page 155

CHAPTER XIII.

SPEED FLUCTUATIONS IN MACHINERY

General Discussion—Kinetic energy of machines—Application to engines—Speed fluctuations and their determination in given cases—Numerical example.....Page 183

CHAPTER XIV.

THE PROPER WEIGHT OF FLY WHEELS

Factors affecting fly-wheel weights—The *E-I* diagram—Effect of speed—Dimensions to suit any given conditions—Numerical illustrations.....Page 199

CHAPTER XV

ACCELERATIONS IN MACHINERY

Determination of acceleration of any part of a machine—Force necessary to produce acceleration—Stresses in link due to acceleration—Turning moment necessary—Examples.....Page 212
