

PAROID ROOFING

PAROID makes a warm roof covering for bee hives and has been used to a large extent throughout the United States and Canada for this kind of work. Paroid draws the sun less than any other kind of roofing material. It is wind, water and frost proof. The colonies housed in hives covered with Paroid Roofing may be left out of doors during the winter.

The publishers of the Canadian Bee Journal have used Paroid with good success. Send for samples and our instructions "How to make your own hives with Paroid Roofing."

Notes

Loaf Sugar

Much has been said in recent periodicals about feeding bees in the fall. Some of the thick sugar made of sugar and use hard candy. Probably all of the answer the purpose, none of the as another article has been mentioned "Gleanings," viz., Mr. Alexander tells a lot of light color were put in the thing had to be decided upon loaf follows: Rims, two made to fit the inside of the rim frames, was placed sugar. The sugar was then cut and then colony thus treated grand condition. It is simple and convenient
