

S. & M. Threshing Outfit owned and operated by Messrs. Robertson Bros. & Kerr, Lawson, Sask.

# S. & M. (COMBINATION) ENGINES

FOR

30 H. Power S. & M. Tractor of Donald McInnes Macdonald Man., operating a 10-bottom Gang.

## THRESHING ↔ PLOWING

"The Survival of the Fittest" is exemplified in the present high classification of Sawyer & Massey Engines. Some years ago the Sawyer & Massey Co. announced their determination to build a Combination Engine or, in other words, an Engine that would do both Plowing and Threshing and do the Plowing with as satisfactory results as Threshing had been done for years by their celebrated Tractors. They were met with a storm of adverse criticism.

In the stand they took they were almost entirely alone. It is now clearly proven that the Company knew exactly what they were doing and the Engines they are putting on the market this New Year of 1910 will more

than confirm what has been demonstrated during the past Season. Hundreds of Testimonials are produced from well satisfied customers.

The chief objections raised at the outset were that an Engine suitable for Plowing would be entirely too heavy for Threshing purposes. Sawyer & Massey Co., however, clearly foresaw that this apparent difficulty could be avoided by the introduction of Quality rather than Quantity, and are seeing to it that their Engines are built and reinforced with material of a superior grade and temper, which proves why they are so powerful and durable considering their weight.

The fact will be grasped, therefore, by the intelligent Thresherman and Farmer that a Sawyer & Massey Engine stands to earn a much better profit from the capital invested, than the buying of two engines at double the outlay to accomplish the same results,

If a man would avoid the risk of delays and breakdowns he should place his order with the firm who build their goods not only to wear but to win.

Get in touch with the SAWYER & MASSEY people, the people who build the "Great West" Separator also, and you will be on sure footing.
