

FOUNDATION OF ROADS is the subject now under most earnest investigation by Engineers throughout the World. poor foundations and good surfaces are found everywhere—result, short lived roads. THERE IS NOT ONE FOUNDATION ON THE MARKET TO-DAY THAT PROPERLY SUPPORTS THE SURFACE. The steel rail and the wooden cross tie is always the same, but the high way is a different thing; different surfaces and different foundations are required for different services. We have these different foundations; they DO properly support the surface, and, IN OTHER WORDS, they give a life to the surface that was never before even contemplated. The Nash Road, Borough of Brooklyn, N.Y. City, U.S.A.
