McKillop Veterinary College, CHICAGO, ILL.

(Chartered 1892.)

LARGEST PRACTICE IN THE WORLD.
 Affording unlimited clinical advantages.

The College building has been recently enlarged and modernized by the addition of new laboratories, dissecting room, amphitheatre, contagious ward, hospital ward and a canine hospital. All the furnishings are of the latest improvement.

There has been added to the curriculum two important courses, Hygiene & Breeding and Veterinary Jurisprudence, making the curriculum most complete.

The College is today the most complete and best-equipped institution of its kind in this country, and offers to the student a scientific and practical course which cannot be obtained elsewhere.

Regular Graduate Course, acquiring the Degree of Doctor of Veterinary Medicine.

Post-graduate Course, acquiring the Degree of Doctor of Veterinary Medicine.

Meal Inspection Course, preparatory to the Civil Service Examination for Government inspectors. Special attention is given this course, in order to prepare the student for the Civil Service Examination.

Practitioners' Course—Five weeks' advanced work in Medicine, Surgery and Lameness.

SESSION BEGINS OCT. 3rd, 1905.

Write for catalogue and other information.

More Profit From Your Live Stock

If your animals are in bad health or made uneasy by insects, their feed does them little or no good—and feed costs money; and besides, your stock is never in condition. Chloro-Naphtholeum Dip and Live Stock Disinfectant will keep your cattle thrifty because it keeps them clean and free from mange, lice and all parasitic skin diseases. Cures contagions, abortions and scours and prevents and cures hog cholera. As a sheep dip it cures scabs, kills ticks and lice—all parasitic skin diseases. To prove this to you I will send you, all charges prepaid, a

FREE FULL GALLON

All you have to do is write me, now, and tell me the number and kind of stock you own. I do not want you to pay me a penny, nor make any promises, except that you will use the large sample freely for 30 days, entirely at my expense and risk. If, after a thorough trial, Chloro-Naphtholeum Dip proves itself the best vermicide, insecticide and disinfectant you ever saw or used, you can pay me \$1.50 for the gallon. If it doesn't please you in every way—doesn't prove better than you expected just tell me your word is sufficient and I will write you where to send any that is left, at my expense. Surely you couldn't find a fairer or more convincing offer than this, and you can't lose anything by making the test—but you can lose a great deal by delaying. Write me personally today.
E. TAUSSIG, President, West Disinfecting Co.
 14 E. 59th St., New York City

ONE OF MANY
 Live-Stock Sanitary Commission,
 Topeka, Kan., Mar. 28, 1905.
 Mr. M. M. Marcks, Vice-Pres. West Disinfecting Co., New York City.
 Dear Sir: I have been experimenting during the past winter, to a very much greater extent than in the past, with Chloro-Naphtholeum, for the itch and mange among cattle, also for those which are infested with blue or other kinds of lice, also for horses which have the mange, and for horses the diseases mentioned that I have ever used. I consider it far more destructive and certain than lime and sulphur, and taking into consideration the good effects, is far cheaper. I unqualifiedly give Chloro-Naphtholeum my hearty endorsement for any of the diseases mentioned, or where a disinfectant is required. Very respectfully,
 M. C. CAMPBELL, Chairman

SOME TRADE TALK ON HIDES AND WOOL.

This being the time of year when dealers are most interested in wool, all who are handling wool are anxious to know what the prospects are. We usually issue a special wool circular ere this. Owing to the very unsettled condition of the market, the fluctuations being greater than at any time since the Civil War, it has been useless to issue a price list, for the prices have been changing $\frac{1}{2}$ c. to $\frac{1}{4}$ c. per pound almost daily for the past month until within the last few days. Forecasts of the market are more uncertain than the reports from the weather man, and everyone knows what they are. Some buyers for the mills and largest houses have dropped out of the market. Indeed, so far, there has been very little bought by woolen mills, it being a speculative dealers' market. In St. Louis, one large lot changed hands three times in forty-eight hours, coming back to the original owner. All know that such a market as that is not safe; it is too much like a real-estate boom. This unusual demand that has been created is based on the supposition that there is a big shortage on wool. Now, suppose this has been greatly overestimated and that there is far more wool stored away or on the sheeps' backs than was expected; or, that the manufacturers, owing to the exceeding high prices, would use more shoddy or cotton to mix with their goods. Would this not produce a heavy decline? It is reasonable to suppose so. Under the present conditions, it is certainly very nearly like speculating on the Board of Trade. Although dealing in the real thing, it is about as dangerous. We are taking no chances, or as few as possible, and selling as fast as we accumulate a carload and contracting ahead whenever possible. One thing sure, growers should be well satisfied with the present prices of wool and mutton, and should take the very best of care of the sheep and lambs by proper dipping to keep ticks, lice and disease from them. To do that there is nothing superior to our Uncle Sam's sheep dip. Our greatly-increased sales this year is proof of all we claim for it. The Experiment Station, of Minnesota, has issued a bulletin in which they dwell upon the importance of using a non-poisonous dip, such as we have.

The hide market, while not fluctuating like the wool market, has been gradually but slowly rising, until it is now higher than it has been for twenty years or more. The market is quiet at the recent advance, and the tanners refuse to pay the extreme price unless the hides are all short-haired. They do not want to pay high prices for long-haired winter hides.

The tallow market is the very opposite to the wool and hide markets. When the South African war was in progress, it created an unusual demand for tallow. The Russian-Japanese War has no such effect. The Russians have plenty of tallow of their own, and the Japanese live largely on rice and other cereals. Cotton-seed oil being exceedingly low from the very large crop of last year, the soapmakers are using that instead of tallow. We see no room for improvement in the price. All butchers are urged to render out their rough tallow while it is fresh, as none but a No. 1 article is in good demand, also to use good barrels, which will not leak, preferably iron-bound.

The fur season is drawing to a close. The prices are about the same, only that the grading is closer on poor furs. Extreme northern, seasonably caught, are in good demand at unchanged prices.

Present prices on the various articles are about as follows:

Wool—Choice, bright Minnesota wool, free of burs and chaff, 27c. to 28c.; semi-bright, that is, slightly off-color from dust, or having been very ticky, 24c. to 26c.; North and South Dakota wool, 1c. to 2c. per pound less on each grade, as above. When burry, seedy or chaffy, a discount of 2c. to 4c. is made according to the amount.

Pelts—Montana, western North and South Dakota, Colorado, Idaho and Washington dry pelts, 14c. to 16c. per pound, as to quality and condition of pelts and wool; green salted shearlings, 25c. to 30c.; spring lambs, 35c. to 75c.

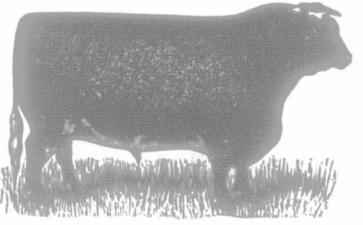

(Continued on next page.)

Boo Spavin

Lameness resembles bone spavin, but the bunch is in front of the true hock joint, a little to the inner side, and is soft and yielding, hardening sometimes as the case grows old.

Fleming's Spavin Cure (Liquid)
 is a special remedy for the soft and semi-solid bunches that make horses lame—Boo Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It isn't a liniment to bathe the part, nor is it a simple blister. It is a remedy unlike any other—doesn't irritate and can't be limited. Easy to use, only a little required, cures the lameness, takes the bunch, leaves no scar. Money back if it ever fails. Write for Free Horse Book before ordering. It tells all about this remedy, and tells what to do for blemishes of the hard and bony kind.

FLEMING BROS., Chemists,
 46 Front Street, West, Toronto, Can.

Arthur Johnston GREENWOOD, ONT.

Offers the following:
 5 imp. bulls, all registered in E. H. B.
 7 high-class home-bred bulls, all by imp. sires, and from imp. or pure Scotch cows.
