NEWS OF THE MINES

Reports From the Superintendant and Engineer of the Okanoga 1.

ORE IS IMPROVING IN VALUE

Good Work Done Upon the Aine-The Mill Gives Excellent Results-The Engineer Says the Company Has a Mine-The Bor-Nite Bank Company

of the Ukanogan Free Gold Mines attract; W. Spring. The gold bars with the concentrates run to something over \$5,000. Directors of the Bornite Bank Gold Min-Mr. A. S. Edgecombe, the superintendent, is in the city, and brought the gold bricks with him. Mr. Frank D. Howe, the consuiting engineer of the company, is also in the city and both have submitted reports. Following is the report of Mc.

sulphides. The mass of he ore is worth from \$1 to \$2 per ton, but picked sam-ples give as high as \$6 per ton. The mill tunnel has also cut into ...e hanging wall of this vein 25 feet back of the main vein. From the construction I look for an ore body of pay grade on this vein about 60 feet east of the mill tunnel.

The equipment on the mine in the way of tools, blacksmith shop, lathes, etc., is sufficient for nearly double your present force. There is a well equipped assay and general office. The company have a saw mill, capacity 6,000 to 7,000 feet per day. day. The stamp mill has 10 modern stamps, with two Wilfley tables and is in every way complete. About three quar-ters of a mile above the mill the company have at Similkameen Falls ample power for the installation of a power plant, with a possible 20,000 horse power. The equipment represents an investment of about

Tunnels and drifts, 1,149 feet. Shafts, winzes and upraises, 150 feet. Surface cuts, 265 feet.

The report of Superintendent A. S. Edgecombe is as follows: During the month of December the upraising, 28 feet to No. 2 level. The ore taken out of the development, supplemented by a little from the upper stopes, amounted to 456 tons and was treated in 23 days, 20 hours. The result is given in detail in the following table. The ledge at the lower level is now 12 feet wide and assays from right across give \$15.20 per ton. Every pound of the ore extracted goes through the mill without sorting. The mine looks better now than ever it did; the ledge being in harder country has a more settled appearance. I should recommend the purchase of a couple of steam drills at once. They would have a splendid chance to do good work in the large vein now being operated and would save their cost in a few weeks time. The drills would cost us nothing for power, it being easy to work mem from the man. drills would cost us nothing for power, it being easy to work mem from the mul-boiler. The returns below you will land upon reference to any mining authority in America or elsewhere cannot be surpassed and from a milling point of view, are quite unique in British Columbia. The ore-

ons second class.
Value, firsts, \$105 per ton; seconds, \$33. Free gold saved by amalgamation, per ton, \$3.45.

Tailings lost, .88.
Total, \$11.80.

Mr. Baker Tells of the Develop

A representative of the Miner waited Advices from the management boom the property the facts of the case were at the disposal of the public. At to the smelter at Trail. The intention is present the mine was not so much intent upon shipping ore as in developing the resources of the mine in a proper manner. If the management so cared it could dispute the management so cared it could dispute the management so cared at could dispu patch at least one carload each day to the railway. There are no ore cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars, and the ore has to be hauled about a mile from the mine. The ore has to be hauled about a mile from the mine to the railway. There are no ore cars, and the ore has to be hauled about a mile from the mine to the railway. There are no ore cars, and the ore has to be placed in box cars, and the ore has to be placed in box cars. At present was in need of prospecting and the mine to the railway. There are no ore cars, and the ore has to be placed in box cars. It is thought the ore from the mine to the railway.

Carries High Grade Ore.

Mr. Andy Revesback, of the Queen hotel, is exhibiting some as fine looking ore as has been seen for a long time in The development of gold mining in the this city. The specimens are not of the pocket order. On the contrary, they are large and heavy. There is gold, silver, coperate capitalization, and the activity of the sales of the shares of these companies on the local exchanges of the state, read like a fairy tale. But there is substantial truth in the figures, and so much actual merit and value in the product of these enterprises that conservative investors are taking a hand at them and reaping a reward in generous dividend events, which are constantly surprising the world. The a possible 20,000 horse power. The equipment represents an investment of about \$27,000.

The recent development, in my opinion, in the mill tunnel places the property on a mine basis and beyon. the prospect stage. Some 30 feet in front of the main vein, we have a small streak of quartz, which is opened in both the mill and lower tunnels, so there can be hardly any question that the large main vein, does have continuous dividends may be maintained. The work done on the mine is as follows:

And the paystreak is 20 menes wide, and of the very rich ore, although the balance of the very rich ore in the production of the balance of the very rich ore although the balance of the very rich or the very rich or the ve president Wm. Ha p, vile-president; A when this is quickly followed by a discovery of ore in another mine in the same Caldwell, manager. These officers, with district, assaying a value of \$20,000 per Andy Revesback, constitute the board of directors. At present there are nine men employ

The manager will send a detailed report by the next mail, and this should come to hand within a day or two. There are 150,000 shares of the Spokane & Buffalo Hump

position member for Dewdney in order to reach a division without another day's sitting of the house. A night meeting was ordered at the conclusion of Ebert's re-marks.

marks.

Helmcken was the first of the evening speakers, holding the floor until 9:30, when MacPherson followed on, the only feature of the proceedings of special interest being an interjected announcement to the house of Premier Semlin, that he had just received from Sir Wilfrid Laurier the following telegram respecting British Columbia's offer of troops for the Transval:

"Cannot give an answer today. We are "Cannot give an answer today. We ar inquiring if we can secure transportation on steamers already chartered for your

The amendment of the opposition came to a vote at 10:45 and was defeated on a to a vote at 10:45 and was defeated on a straight 18 to 16 division, the so-called independents (Martin and Higgins), with Prentice (government) being absent.

The debate on the main motion was then taken up, Henderson speaking. It will be an all-night session.

PROVINCIAL LEGISLATURE.

A Day of Routine Work—Debate Limited to One Resolution.

Victoria, Jan. 23.—(Special.)—Although there was no night sitting the legislature today disposed of no fewer than 43 items of business on the order paper, chiefly motions of returns and questions to be answered by the ministers. The debate was virtually limited to one resolution, respecting the removal of Indians from the Songhes reserve now within the limits of Victoria city.

respecting the removal of Indians from the Songhes reserve now within the limits of Victoria city.

None of the second readings of the new government measures were brought on, and the list of business for the ensuing sitting (depleted by the disappearance of a long seites of motions and questions was filled up by the present attention of three new public and three private back, the most important being in the correction of further amending the coal mines regulations act, by insisting on an aducational test for workmen, this being intended chiefly to secure the exclusion of Chinese, Japanese, Doukhobors and Hungarians, while evading disallowance on the score of discrimination. Helmcken has assumed to test the disallowance of last year's Asiatic legislation by reintroducing the tramways act containing the celebrated Chinese and Japanese clauses.

IN THE MINING WORLD pany. He promises a longer report on rebruary ist, when he expects he will have something of importance to communicate to the stockholders.

A Carload of Evening Star Ore Yields

ping grade. Five shafts have been sunk on five dif

tirect into the cars. The concentrator at Silica is within three miles of the Anaconda by the wagon road, while the smelters at Trail and Northport can both be seen from various points on the property.

The new compressor plant on the Giant is now working in a very satisfactory manner. Crosscutting is in progress on the 50 and the 100-foot levels. On the 50-foot level the drift is in for a distance of 20 feet and it is thought the ledge will be met in the next 30 feet. On the 130-foot level a station has been cut and crosscutting has just commenced. It is thought the crosscut will have to be run for a distance of from 100 to 150 feet here before the ledge will be encountered.

The Ore Grows Richer.

Mr. E. N. Ouimette, director of the Norway Mountain Mining company, yes-terday received a letter from Mr. F. S. the ore seems to grow richer with depth.
Mr. Criswold further states that he will
come to Rossland in about a month with

FAILURES IN MINING.

"A great many failures made in mining ager. A thoroughly trained business man who had had no experience in mining or CHARGES HAD BEEN DEDUCTED metallurgy could scarcely be expected to outline the plant, mechanical methods and operation of a large mining concern, work is Progressing on the Anaconda Group yet there are those who essay such tasks,

Reduced to the fewest possible number of words, it may be said that failures in mining are due to ignorance. In the early mining days it was pardonable ignorance; at the present time it is culpable ignorance. in for a distance of 10 feet. Within the past few days the ore on this drift was found to run as high as \$100 to the ton. From the above it will be seen that the abould quit the business and herd sheep. For mining is a business which requires Development work on this property, which is to be carried out on an excensive scale, should develop a valuable mine.

The working of the Anaconda and the transportation of ore and supplies will be exceptionally inexpensive, as the proposed railway to the Velvet passes close to the present workings. The construction of a siding a few leads to the present workings. The construction of a siding a few leads to the present workings. The construction of a siding a few leads to the present workings. The construction in the land have feuture have none, in the roster of thorough mine operators. The "hit or mise" plan of working a mine has been, or should be, relegated to the garret of worn-out "has beens," and mining has become a purely legitimate business, carried on by purely business methods, from which the element of luck or chance is chiminated. A mine should be milked as a cow is, the milker knowing when the adder is dry

RIG COPPER MINING DEAL.

White Horse Claims Reported Sold to the Rothschilds for \$2,000,000.

Vancouver, B. C., Jan. 14.—It is reported that one of the biggest mining deals on record in British Coumbia has been made in he transfer of the White Horse copper claims to the nothschilds syndicate for \$2,000,000. The deal was put through by Manager Howser of the armsh America syndicate, which owns the Le Roi mine at Rossland.

Several experts were sent out from inco-

Several experts were sent out from land to examine these claims. All a that they made he most wonderful of showing found anywhere. One of reported that on a single claim \$1,00 worth of ore had been exposed to the showing areas.

HE WAS LISTED TO DIE

Hheumatism Attacks Old and Young Alike—But It Never Baffles South American Rheumatic Care.

Wm. H. Winslow, Sr., 32A Turgeon street, St. Henri, Que., says of the great South American Rheumatic Care: "My son was so bad with acute rheumatism that we thought he was coping to die We
