

Less Pot-washing

SMP Enameled Ware has the smooth surface and polish of fine crockery—without the breakage. And it is so very easy to clean—just like china, and therefore makes light work of pot washing.

Whenever you are buying kitchen utensils be sure they carry the **SMP** trade-mark.

Diamond Ware is a three-coated enameled steel, sky blue and white outside with a snowy white lining. Pearl Ware is a two-coated enameled steel, pearl grey outside and inside. You can't go wrong if you buy either.

GROWING SWEET PEAS

Getting the Very Best From This Beautiful Flower.

Location and Soil Suggested—Early Sowing Desirable—Good Support and Frequent Picking Necessary.

(Contributed by Ontario Department of Agriculture, Toronto.)

Location.—An open, sunny position in the garden suits them very well. Close up to a building or near to a close board fence facing the south is not a good place for them as the intense heat of the sun induces attacks of insect pests. An east, west, or north exposure close to a fence is not so objectionable, except perhaps a direct northern exposure. Near to an open wire fence or trellis fence is not objectionable.

Soil.—A deep, fairly rich loamy soil is best. If the ground is poor or gravelly or heavy clay, dig a trench the length required from 12 to 15 inches deep and about 10 inches wide. Place about two inches in depth of well rooted barnyard manure or cow manure in the bottom of the trench, then fill the trench up with well enriched loamy soil. Deep digging is necessary for sweet peas even in good soil. Never sow sweet peas twice in succession in the same soil; a part of the soil at least should be renewed every year. Prepare trench or ground for sweet peas the previous fall if possible.

When to Sow.—Sow as early in the spring as the ground can be worked. The seed may be soaked in lukewarm water before sowing for six or eight hours to hasten germination.

How to Sow.—Make a drill about two inches in depth. Sow the seed about two inches apart. Cover with nearly two inches of fine soil. (The Spencer type of Sweet Peas is the best kind to sow.)

Thinning.—Thin the plants when about six inches in height to three or four inches apart.

Support.—Wide meshed chicken wire five feet in height, maple brush-wood or coarse twine may be used for support. Netting made of coarse twine makes an ideal support, better than wire, as the plants cling to it better than to wire.

Watering.—Water thoroughly, in very dry weather. Draw a drill a few inches deep and about four inches from the row on each side. Pour water into these until the ground is thoroughly soaked. Watering in this way once every week or ten days is far more beneficial than frequent light surface waterings. Sprinkle the foliage with water under pressure from a fine sprinkler every day in hot dry weather to keep down insects, such as green aphid and red spider. Sprinkle the under side of the foliage especially. Tobacco and soap solutions are also good for insect pests.

Picking Bloom.—Keep all the sprays of bloom picked off every second day to prevent seed from forming. If seed is allowed to form, the bloom will be inferior and the flowering season of short duration.

Fertilizers.—A watering once or twice with liquid manure solution towards the end of August will help to keep the plants vigorous and productive late in the season.—The late Wm. Hunt, O. A. College, Guelph.

Silo Facts.

In the silo you can store corn in a form in which practically every particle can be eaten.

Silage gives the effect of pasturage in winter; it is both palatable and succulent, and it also aids digestion in the dry-feeding season.

Animals fed silage are not more subject to tuberculosis, do not lose their teeth more quickly, and are not shorter-lived than animals fed other common kinds of feed.

The use of the silo often makes it possible to save corn that would otherwise be lost by frost.

A good silo should be round, airtight, water-proof, have walls that are smooth inside, and be strong and durable.

A silo should be placed where it will give the greatest convenience in feeding and where it will be least exposed to extremely cold winds.

One hundred tons of silage will feed 25 cows 40 pounds of silage a day for 200 days.

A silo 14 feet in diameter and 32 feet high will hold 100 tons.

Silos of more than 100 tons capacity cost from \$2 to \$6 per ton, according to the type and material used in construction.

Few Roads.

The ancient British colony of Newfoundland is said to be almost entirely devoid of roads as most of the inhabitants live along the shores and few of them have penetrated into the interior. Some English capitalists have already bought up a great deal of the land in the interior, which offers possibilities for the establishment of paper and pulp plants and the first step required is the building of a system of roadways over a part of the island. There is a great amount of water power which can be made use of with little difficulty,

EAGER'S

The Store of Quality

New goods arriving every week in Dry Goods, Men's Furnishings, Boots and Shoes, etc. All high grade goods and we are giving the best value for your money that is possible to give. We invite your inspection.

Dry Goods

New Heather Stockings, all wool, for boys and girls, in the brown shades, made from an extra good quality high class wool for wear and comfort. Size 6 to 10.

\$1 to \$1.35 a pair

The new shades in Women's all wool Hosiery, wide ribb, soft pure wool, in brown, navy or olive

\$1.50 a pair

New Gloves for Women. The new styles and colors in the new cuff glove in black, sand or grey. A very attractive comfortable glove.

\$1.50

The new Long Cuff Wool Gloves. The most comfortable glove for cold weather, in white or grey

\$1.35 and \$1.40

Strong Cotton Hose for boys, made extra heavy and extra strong. Terrier Brand

35c to 50c

A shipment of Warner Rust Proof Corsets. A corset warranted not to rust break or tear

\$1.50

Warner's Rust Proof Front Lace Corsets in pink. One of the best corsets on the market.

\$3 a pair

Men's Furnishings

A big selection of Men's and Boy's Unwear in two piece or combination. The well known makes of reliable goods.
