Fight for Liberty.
One would think that the Scott government would for the sake of the name of the province endeavor to prevent corrupt practices in this election.

Mr. Scott is used to being a tool himself and judges other people by himself. He has been making a fool out of Mr. Sheldon. It came out in court that Mr. Sheldon had been acting as a correspondent for the Leader with Mr. Scott at his meetings.

Every voter who is entitled there to, should see that his name is put on the provincial voters' list which is being compiled at present. While the list will not be used for the present provincial elections, they will without doubt be used for any by-election which might be held after the time for having the lists completed has elapsed.

Time Is Up.
On Friday the campaign will be over. Who will win? There seems to be no doubt but that the sentiment throughout the province is overwhelmingly behind Mr. Haultain.

There is nothing to fear in the result if the electors get a square deal. A square deal at the polls will mean the election of Mr. Haultain's party, the doing away with direct taxation, the return of honest and capable administration, and the steady honest development and growth of the province, and relegation of the political charlatans to the oblivion from which they were drawn by Sir Wilfrid Laurier, when he wanted obedient tools.

DO NOT FAIL TO HAVE YOUR NAME ON THE LIST IF YOU ARE ENTITLED TO IT, AND INSIST ON HAVING NAMES STRUCK OFF WHO ARE NOT ENTITLED TO VOTE.
All the people want is a square deal and it is up to themselves to see that they get it.

Looks Like Forgery.
In the evidence which came out in court on Monday morning, Walter Scott admitted that he had written part of a dispatch to the Regina Leader, and had signed the name of Motherwell who wrote a letter.

The effect of Scott's Emulsion on thin pale children is magical. It makes them plump, rosy, active, happy. It contains Cod Liver Oil, Hypophosphites and Glycerine, to make fat, blood and bone, and so put together that it is easily digested by little folk.

Scott likely did it and signed Motherwell's name to it.
Saskatchewan wants railways, not the kind that are to be built on paper.

What do the people think of Walter Scott now? He is a white-headed fraud, signing other people's names to them.
Regina looks good to the farmers of Regina county. It is only a question of the majority they will give him.

Scott's policy is direct taxation, more direct taxation and eventually it would lead to such direct taxation as the people could bear.
There is even betting that Scott will be defeated in Swift Current. The people on there do not want a premier who was afraid to run in his home county.

Every man who has been following the political trend of affairs, a trend from bad to worse, during the reign of piousness and graft that has been bringing disgrace upon the good name of Canada, cannot suppress indignation at the abnormal campaign methods, which unquestionably have the full sanction of the Government at Ottawa and Regina.

Can the people forget that the speculator holds fifty per cent of all the timber reserves under lease at the three prairie provinces, which he will not cut, but which he holds until the timber shall come when the value of these regions, having been greatly enhanced by settlement, he can collect a heavy toll from the settler? Can they forget that in doing so he will gather where he has not sown? Can they forget that his authority to collect lies in the majority of cases, being conferred by political favor?

Can the people forget that the speculator holds millions of acres of closed, irrevocable grazing leases, and that the rich profit which he will derive therefrom will be partially paid for in the increased cost of the meat they must purchase? Can the people forget that the speculator controls four-fifths of the coal supply of the future? That he will collect his profit from the coal mines by the increased price of each ton of coal they must purchase? Can the people forget that the speculator has, for a mere song, acquired for many years the exclusive right to fish in their lakes and rivers and that he will collect his monopoly profit in every pound of fish they purchase?

Can the people forget that the speculator has, for a mere song, acquired for many years the exclusive right to fish in their lakes and rivers and that he will collect his monopoly profit in every pound of fish they purchase? Press Comments.
(Winnipeg Tribune)
The Lord helps those who help themselves. This is the experience of the majority of the people of this world.

Every voter should see that his name is put on the voters' list. Perhaps after all, when the coal famine was on in this province the winter before last it wasn't Mr. Leader, and had signed the name of Motherwell who wrote a letter.

Will Bring Prosperity.
The cutting of the western crop has begun, and the trading operations that must follow the business in the staples of the prairie provinces will soon be in full motion.

At every step in this series of movements of the field to the fall-away flour mill, money is required. There must be money to pay the harvest hands, money to pay the threshers, money for the purchase of the grain, money for the paying of elevator and freight charges. For this function, the supplying of the money, the banks are depended upon.

This year the outlook is singularly clear, and there is every reason to expect that the record crop will have a record movement. First, the farmers want their money, and if they were not in need of many things that they could not afford last year there would still be the pressure of creditors to accelerate the marketing of the grain. In the second place, there is the inducement of good prices to hasten marketing. There is, therefore, not much likelihood of holding on the part of the farmers to retard the outward movement of the grain. As to the grain exporters they have not generally found the buying of wheat a what-throughout the winter a profitable business.

Every man who has been following the political trend of affairs, a trend from bad to worse, during the reign of piousness and graft that has been bringing disgrace upon the good name of Canada, cannot suppress indignation at the abnormal campaign methods, which unquestionably have the full sanction of the Government at Ottawa and Regina.

TROUBLE IN PRINCE ALBERT.
Mr. Andrew Knox, Collector, was nominated as the candidate for Prince Albert, in the interests of the Scott government. Mr. Knox will oppose Sir Donaldson, who has so faithfully represented the constituency during the one term he was member for the district. Mr. Thos. McCloy, one of the most prominent Liberals of Collection, presided at the meeting. Mr. McCloy is president of the Liberal association, and in a stirring speech at the opening of the meeting pointed out that the Scott party's machine in Prince Albert had decided to fight a candidate upon the district. Without consulting Mr. McCloy or the farmers they had chosen a candidate. Mr. McCloy announced that he would not again be a candidate for the presidency. It was then offered to Mr. R. Giles, but he refused it. Ald. Andrew Holmes then spoke at some length, praising Mr. McCloy and pointing out that no insult has been intended.
