

VAGARIES OF FASHION.

New Kimonos—Muffs That Hold as Much as Hand Bags.

Accorded plaited kimonos, with lace inserted in diamond shapes throughout the waist and sleeves, are pretty and such a decided change from the ordinary style that they are in great demand. Besides the plaits that are un-

A BABY KIMONO—5071.

usual, in this garment they have a large square collar edged with narrow valenciennes lace that entirely changes the appearance of this dressing sack, making it fancy enough for use as a morning waist.

If there ever was a time when the muffs was a mere toy likely to be forgotten and mislaid unless fastened around the neck with a chain, it is no longer. At least if mislaid its owner is likely to lose a good deal more than a mere muffs, for so practical has this article now become that it is fitted with a voluminous pocket hidden in its furry depth. In this pocket is stowed about all that a woman needs for a day's journey, making it possible to do away with the necessity of carrying a hand bag, but certainly making it a terribly precarious matter to lose one's muffs.

Deep turnover collar and cuffs of stiff embroidered linen edged with the narrowest knife plaits of pale blue, crimson or light green and worn with a little bow of the same color are new and very becoming.

An ornament for the neck is a lizard composed of rhinestones except down the middle, where a row of imitation emeralds forms the tail.

There is no garment in the infant's layette that will give as much satisfaction as this simple little kimono. It is of white cashmere trimmed with rosebud ribbon.

JUDIC CHOLLET.

FRIBBLES OF FASHION.

Pretty Color Scheme—Embroidered Suede Collar and Cuff Sets.

Where belt, hat and muffs are part of a color design the usual connecting link is flowers. Roses trimming a mushroom shaped hat for evening wear have their colorings repeated upon the ends of wide satin sashes in hand painted clusters. The accompanying muffs are made of hand painted satin edged with chiffon flounces, while the seemingly hand painted plectoles displayed in the center of one of these

LITTLE GIRL'S FROCK—5541.

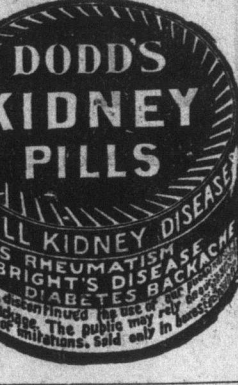

pointed roses are really yellow knobs pulsing to a cleverly concealed purpose, so very tiny that one of the red rose petals covers its hiding place.

A brown checked tailor made suit with plain flare skirt and three-quarter coat is made smart with an embroidered collar and cuff of tan suede. The silks used are in different harmonizing shades of brown. Under the name of "Japanese cat" our household pets have been slaughtered in great numbers to make long, comfortable auto coats that should haunt their possessors with the piercing wails of the fifty or more pussies whose furry hides go into the making of one garment. They are light and warm and, if one can forget their origin, pretty. They sell for about \$40.

Silk rubber raincoats are very popular and are made large enough to slip on easily over Eton jackets. One of the most beautiful of these coats is of cherry red silk rubber with full skirts. There is a deep yoke, from which the skirt hangs full, box plaited back and front.

The little girl's frock is very smart and lends itself beautifully to the new soft materials. The box plaited waist is arranged over a smoothly fitted lining and is joined to the plaited skirt, the entire dress closing invisibly at the back, so there is all the merit of a one piece costume.

REVOLT IN CONGO.

Twenty Killed in Attack by Natives on Villages.

Brussels, Feb. 26.—Mail advices received here from the Congo Independent State, say that the natives of Oubanghi are excited over the taxes imposed upon them, and that the Bourgeois are on the verge of revolt for the same reason. Some villages have already been attacked by turbulent natives, and a score of persons have been killed.

\$100 REWARD \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for each case that it fails to cure. Send for list of testimonials.

Address F. J. CHENEY & CO., Toledo, O.
Sod by all Druggists, 75c.
Take Hall's Family Pills for constipation.

Music Hall Burns.

New York, Feb. 26.—Five thousand persons were driven into the snow-covered streets early yesterday by a fire which destroyed the new Irving Music Hall in Broome street, and spread to several tenement houses at the rear and either side. No lives were lost.

200 Killed in Cyclone.

Madrid, Feb. 26.—A telegram from Manila announces that the southern Philippines have been ravaged by a cyclone, that 200 persons were killed, and thousands of others rendered homeless.

Earl Grey's Aunt Dead.

London, Feb. 26.—(C. A. P.)—Mrs. Geo. Clive, the aunt of Earl Grey, is dead, aged 91.

ANOTHER GREAT DISCOVERY.

A well known gentleman in Black Bay, Ont., Mr. John Cowan, has discovered an absolute specific for Rheumatism, and writes: "I was affected with Sciatica and chronic Rheumatism which I contracted years ago. The disease had a great hold in my blood, and it was hard to make any impression on it. Reading of Ferrozzone I was convinced of its merit and it's certainly the best I have ever tried. Why, it just drove away the Rheumatism. Even stiffened old sufferers will experience quick results. The reason is that Ferrozzone acts through the blood and thereby destroys the cause of the disease. Price 50c. per box at all dealers."

Echo Verses.

Echo verses were sometimes used effectively for epigrams and squibs. Thus a critic once wrote:
I'd fain praise your poem. But, tell me, how is it?
When I cry out "exquisite" echo cries "quaint."

And when in 1831 Paganini was drawing crowds to the opera house at extravagant prices the Times printed the following lines:

What are they who pay three guineas
To hear a tune of Paganini?
Echo—Pack o' ninnes!

—London Graphic.

THE DEAF MADE TO HEAR.

Deafness, because usually due to Catarrh, is quite curable. In a thousand cases this is proved absolutely true. Success invariably attends the use of Catarrhazone, which has cured catarrhal deafness of twenty-five years' standing. Penetrating through the passages of the ear, the soothing vapor of Catarrhazone relieves the inflammation, destroys the seeds of catarrh and thereby allows nature to re-assess herself. Try Catarrhazone yourself. 25c. and \$1 sizes sold by all dealers.

Found Dead in Cutter.

Stratford, Feb. 18.—Donald Matheson, aged 57, was found dead in a cutter in the Albion Hotel stable Saturday night about 10 o'clock. He lived about two miles from the city. He was preparing to return at 8.30 when he took a fainting spell. He was taken into the stable, and was found an hour later dead. He was an employee of the G.T.R. for 23 years, and is survived by a widow and six children.

Piles get quick relief from Dr. Shoop's Magic Ointment. Remember, it's made alone for Piles—and it works with certainty and satisfaction. Itching, painful, protruding, or blind piles disappear like magic by its use. Try it and see!

IT IS THE VERY LATEST

WIRELESS AUTOMOBILE LAST INVENTION OF MARCONI.

Machine Has Been Patented in the Name of the Marquis Solari, the Wireless Wizard's Secretary—Marconi Expects That This Invention Will Be First Used in the Italian Army.

The very latest in wireless devices is the wireless automobile. The phrase is perhaps somewhat misleading to the average reader. Of course the ordinary automobile is not run by an electric current obtained from a trolley wire, and the term "wireless" does not have reference to the absence of such a means of conveying motive power. This particular form of motor vehicle is used for sending messages through the air by the use of electricity and without recourse to wires. To send a wireless message there must be a wireless station, and the wireless automobile is simply such a station on wheels, with jointed poles which may be extended upward to a lofty height just as are the masts of an ordinary wireless station. The principle of the extension ladder of

STUOLIELMO MARCONI AND THE WIRELESS AUTOMOBILE.

the fire department is applied to the realm of wireless communication, and the result is the portable or movable wireless station, which may be used either for traction purposes or for sending messages.

Though this is rapidly becoming a wireless age, the streets of many cities are still incumbered with trolley, telephone, telegraph and electric lighting wires, so it will not be possible to drive the so-called wireless automobile or motor bus through them with the poles extended high in the air amid the Hertzian waves. The device is not intended as a substitute for either the trolley car or the car operated by use of the third rail system. It is intended primarily for use in warfare in communication between officers of an army. The new machine is the invention of the wizard of wireless communication, Guglielmo Marconi, and his secretary, the Marquis Solari, and has been patented in the name of the latter. With the pole folded up and resting flat upon the top of the machine the car looks not unlike many of the armed automobiles which have been invented since the military experts began the study of the application of motor vehicles to purposes of warfare. By means of the special apparatus of the machine the electricity generated may be utilized either for raising the pole, mast, in the air, for radiating graphic transmission or for moving the machine. The vehicle carries the pole, the alternator, the complete wireless apparatus and the operating staff. In ten minutes the station can be made ready for action to its utmost distance, a little over ninety miles. For short distances it can act with motion at half speed. This means that if in use in the field it can be run from point to point while messages are being exchanged between officers who desire to communicate.

Marconi expects that the wireless automobile will be first used in the service of the Italian army, but the prediction is made that while it will be found useful on commercial lines where there is a breakdown of traffic or in similar emergencies. Though Marconi has already accomplished such wonderful achievements, he keeps right on studying and experimenting and making new inventions and improved apparatus just as if his name and fame were still to be made. His birth in Bologna, Italy, occurred thirty-three years ago next April, and it was 17 years ago that he began experiments to test the theory that the electric current is capable of passing through any substance and if started in any given direction will follow an undeviating course without need for a wire, or other conductor. It was in 1896 that he made his first successful experiment in telegraphing without wires, and it was in the latter part of 1901 that he sent the first wireless message across the ocean.

Electricity For Rust.

Radiations from oxidizing substances have been studied in Germany by F. Streintz. In a gas containing oxygen such metals as magnesium, aluminum, zinc and cadmium give off invisible rays, presumably like ultra-violet light, that ionize the surrounding gas and act on photographic plates. Of practical interest is the observation that metals may be protected from rust by electricity.

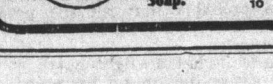

Don't take risks with your skin.

WHAT WE ARE GETTING

AMAZING IDEAS THAT BRING ENGLISH GIRLS TO CANADA.

"A Quid a Week, Grub, and a Chance to Spice the Boss"—Queer Characters Who Apply At Canada's Offices In Britain For Information About the Dominion—Some Expect Free Fares.

With the new year, writes the London, Eng., correspondent of The Toronto Star, a more strenuous emigration campaign has been initiated to procure settlers from the British Isles for Canada than ever before, and all circumstances point to the numbers of emigrants leaving the British Isles in the spring being far in excess of all previous years. Since Mr. Bruce Walker has been in control several innovations have been made. Three new offices have been opened out, York, Aberdeen, and Londonderry, whilst that at Cardiff has been transferred to Exeter. All these offices are now situated on the ground floor, and have plate glass windows, in which to give a good display of Canada's products. In order to make a special appeal to agriculturists, twenty-five farmers have just arrived from the Northwest. They are to be placed at the service of booking agents throughout the country in order to supply gratis information regarding agricultural conditions and possibilities to anyone Dominion.

Special attention is also being paid to the emigration of women, for whom the demand in Canada is particularly keen. Mrs. Simpson Hayes, a Western lady journalist, is for the time being in charge of this department, and is kept continually busy answering queries from aspirants to Canadian domestic work, and perhaps a future spouse for the lonely swains of the prairie. She has also succeeded in interesting some prominent philanthropists in this special branch of emigration work.

Some of these young ladies are quite incredulous when informed of the value of a really good domestic in Canada, and the conditions under which they have to perform their duties. Recently two whose crippled hand and general demeanor strongly suggested the factory made their appearance at the Emigration Office and expressed their desire to settle in the Dominion.

"Are you good at cooking and domestic work?" inquired the polite official.

"Yes," answered one of them promptly. "I should just say I am. I've cooked my old man's meals for the last five years, and he's mighty particular. An' I've done all the housework an' look after the kids since mother died. My sister's old enough now, so I went to work."

"Are you willing to undertake domestic work in Canada?"

"Yes," I like it better than gummin' labels, and they say blokes out there sometimes marry their slaveys, don't they?"

"Such a thing has happened in cases," was the reply.

"An' how does the oot go? You know, 'ow do they brass up? What's the wages?"

"Pretty High Figure."

"They pay out there as much as four pounds a month and everything more than that even in some cases."

"Come, get off, mister, whose leg are you a-pullin'?" was the young lady's polite way of intimating she did not believe this statement, and it took some time to convince her she was not being "coddled," as she termed it.

Then for the first time she turned to her companion, with the remark: "Lor', Lizer, just fancy, a quid a week, all yer grub, and a chance of spicin' the boss! Canada's a bit of oot right. Come on, Lizer."

The two damsels departed with their stock of pamphlets.

How Some Would Farm.

It is quite a study from real life to watch the crowds, and they are now flocking to the Emigration Office in search of information. A pale and hollow-faced young man, with the office-stool marked plainly upon him, will ask for his grant of land, and express considerable annoyance at not being able to get the necessary document forthwith.

Generally the ideas of these youths is to live midst the social whirl of a neighboring city, and employ others to look after their land.

Then, perhaps, will come along a swaggering young fellow in leggings and knee-breeches, who is "going out to do a bit a ranching, doncher know. Haven't much money, but dare say could get hold of ten thousand or so, enough just to buy a decent little show, with a bit of game on it."

If the ten thousand referred to the lowest currency of the realm, it is doubtful whether he could produce it, but he thinks this introduction sufficient to waste as much of the official's valuable time as possible. He will start with Halifax and go slowly through to Vancouver, asking all sorts of foolish questions, chiefly relating to the opportunities which occur in the Dominion for enjoying one's self. Then he finally departs with "Er, ah, yes," and perhaps goes off to spend another genial hour in some other office.

Some Expect Free Fares.

Quite a number of the unemployed look to the Emigration Office for relief. With a crushed and almost hopeless air they ask for "some of them free circulars," always emphasizing the fourth word. They are generally joined by half a dozen similarly situated companions outside, and jointly demand the information obtained.

Some of them are under the impression that the office is prepared to advance fares to the land where work abounds. Some even pluck up courage to put a query on this point, and

one can see what little spirit they have left in them when told that they must possess at least \$27.50 to carry them across the ocean. For what prospect they have of raising the amount they might as well be told that a million dollars was required. The majority of them have no money, and are amongst the worst of emigrants, the professional man, tired of the ceaseless struggle for genteel existence, the tradesman whose income has been worn down by competition, nomads who have tried the other British possessions, and feel sure Canada is the place for them, and a host of others too numerous to mention. Yet they would be in many ways suitable emigrants, and, taken on a whole, the percentage whom a casual observer would class as undesirable is very small.

Wives Needed in West.

Reverting to emigration for women, a sure fortune awaits anyone bold enough to open up a matrimonial bureau for the purpose of supplying Canadian settlers with suitable spouses. There are increasing numbers, especially in the west, lacking this item of blissful domesticity, and still larger numbers of lassies in the Old Country ready to give their heart and hand to the lonely settler. All sorts of devices have in the past been employed to make known their desires. At one time a missive in the middle of a Canadian cheddar cheese was a favorite if somewhat hazardous means of communication. But a but-terless bachelor recently placed a note in a barrel of apples, stating that he was in need of a suitable life partner, and entreating the finder of the missive to "deliver the goods."

This letter found its way into the British press, and has resulted in Mr. Peter B. Ball of Birmingham, whose name was "mentioned in the case," being the recipient of epistles from a number of young ladies who are "willin'." Their ages ranged from 19 years upwards, and one even confessed to 40, but, according to her letter, she did not look it, and had a great many estimable qualities which counterbalanced what might be considered a slight disability in the matrimonial stakes. There were fair, dark, and auburn maids, as well as a widow or two, with varying numbers of children, only too ready to share the fortunes of the apple pack-

One Was a Married Woman.

One applicant's letter may be worth referring to. She was neither a spinster nor widow, but a married woman with one child. She stated that she and her husband had not found perfect bliss in their union. She, moreover, hinted that he was not addicted to hard work. So they had parted, or rather he had done the parting, and she had gone home to mother's. She had so run the letter, considered the advisability of invoking the aid of the law, but on consideration had decided to let her better half go his own way. She herself was anxious to settle in Canada, and desired to compare notes with the apple man.

FOR AN ALLE-EMPIRE CABLE

Principal Gordon Outlines Scheme For Gathering News of the Empire.

"Those of us who are Imperialists are not so because of a desire for gain, neither is it a desire for militarism, but it is a desire for a closer union, and for a more friendly intercourse among the various dominions and possessions of the Crown," said Principal Gordon of Queen's University in Toronto recently. Principal Gordon pointed out how little, after all, Canadians knew of the other possessions of Britain, and these possessions probably knew as little of Canada. The ignorance of otherwise fairly well informed people in Britain of Canadian affairs was so well known that it was not necessary to give instances. The Canadian press, excellent as it was, did not supply the information required by Canadians relative to British colonial affairs. What news the Canadian newspapers had was largely gathered and supplied by agencies which catered to other than British people. What was required to insure a better knowledge of each component part of the empire was, first, an all-British cable service constructed and operated by the Governments interested, and the establishment of bureaus to gather news in Australia, India, New Zealand, South Africa, Canada and other parts of the empire.

What Imperial federations desired was that the cable now running from Vancouver to Australia should be supplemented by the completion of three other sections of cables. The first section should be a cable from Britain to Nova Scotia, and across Canada to Vancouver to join the Pacific cable there; then from Australia and New Zealand to India, and from India, from India, to Cape Town, South Africa, thence to the West Indies, with branches from these latter islands to Nova Scotia, and to Great Britain. This was the proposal which Sir Sandford Fleming had outlined, and for which he was still so loyally working, even though he was eighty years of age. There had been two plans suggested for the gathering of the news, first, that the Government of each colony should gather such items of interest and importance as would be of value to all readers, and, second, the formation of an organization, on the lines of the Associated Press, and there surely could be no serious difficulty in the way of the formation of such a great bond of union. The greatest opposition at present came from the Eastern Telegraph Co., which had practically a monopoly in the east. The influence of that corporation was used in Britain, Australia, and India to prevent the construction of this all-British cable service, which if properly used would form a bond of union binding all parts of the empire more closely together and giving information which would be valuable in trade and commerce. The cost of such a cable would be about twenty-five million dollars, not a sum which should prevent its construction by a united empire.

Fairville, Sept. 30, 1902.

Minard's Liniment Co., Limited.

Rheumatism

I have found a tried and tested cure for Rheumatism! Not a remedy that will straighten distorted limbs of chronic cripples, nor turn bony growths back to flesh again. That is impossible. But I can now surely kill the pains and pang of this deplorable disease.

In Germany—with a Chemist in the City of Darmstadt—I found the last ingredient which Dr. Shoop's Rheumatic Remedy was made of, a perfect, dependable prescription. Without that last ingredient, I successfully treated many, many cases of Rheumatism; but now, at last, I can cure all curable cases of this heretofore much dreaded disease. Those and-like granular wastes, found in Rheumatic Blood, seem to dissolve and pass away under the action of this remedy as freely as does sugar when added to pure water. And then, when dissolved, these poisonous wastes truly pass from the system, and the cause of Rheumatism is gone forever. There is now no need—no actual excuse to suffer longer without help. We sell, in confidence, recommendations.

Dr. Shoop's Rheumatic Remedy

C. H. GUNN & CO.

STOLE \$173,000 FROM TREASURY.

Chicago Officials Now Under Surveillance Pending Solution of Robbery.

Chicago, Feb. 26.—Somewhere between \$175,000 and \$200,000 was stolen from the local sub-treasury last week. The loss was discovered on Tuesday.

All the money taken was in bills of the denomination of \$1,000, \$5,000 and \$10,000.

At first it was believed that there must be some error in the bookkeeping. It was thought to be impossible that such a large sum of money could have been abstracted.

Every employee of the office is under surveillance day and night, and should one or more of them prove to be the thief or thieves escape will be impossible.

When interviewed yesterday, Mr. Goldenweck admitted that a theft of \$173,000 had been perpetrated, but refused to go into details.

Group can positively be stopped in 20 minutes. No vomiting—nothing to sicken or distress your child. A sweet, pleasant, and safe Syrup, called Dr. Shoop's Croup Cure, does the work and does it quickly. Dr. Shoop's Croup Cure is for Croup alone, remember. It does not claim to cure a dozen ailments. It's for Croup, that's all.

Rich Old Uncle Sam.

Some European nations which are obliged to face huge deficits in the national exchequer must look with envious eyes upon the bursting condition of Uncle Sam's treasury. So plethora is the situation at Washington that it now seems probable \$117,000,000 of public debt will be wiped off the books next July. That it can be erased with ease there now appears to be no doubt.

It is estimated that, allowing for another Panama canal bond issue of \$30,000,000, the United States treasury capacity of the maturing 4 per cent bonds and still have left a working balance of more than \$60,000,000. To cancel a ninth of the entire funded debt of the nation at one clip would be a notable achievement. It would be the more gratifying to the country when it is remembered that the money has been accumulated out of ordinary revenue after making outlays in a broad spirited fashion.—Philadelphia Press.

WHEN LONG BREATHS HURT.

You know that troubles exist which need quick attention. Proper action consists in a vigorous rubbing of the chest and side with Nerviline, which sinks into the tissues where the pain is seated, and gives relief in a few minutes. No moment so clean, so strong, so powerful. Results guaranteed with every 25c. bottle of Polson's Nerviline. Get it to-day.

Clothes Locked Out.

The newest hotel in New York's Tenderloin boasts one feature which the sophisticated guests regard with suspicion. In every room there is a small closet with two doors. One opens into the room and the other on the hall. To this outside door the valet possesses the key. The inside door is locked by the guest after he has put his clothes into the little closet in order to have them pressed and cleaned before the next morning. "I know the house is responsible for the clothes if they are lost," said one guest who had refused to avail himself of the new convenience, "but it makes a man very uncomfortable to feel that he has locked his clothes out and that another has a key to them. Then the fellow with only one suit would have to wait a long time before the proprietor sent out to buy him another."—New York Sun.

Fairville, Sept. 30, 1902.

Minard's Liniment Co., Limited.
