

MEDICAL CORNER

BREAKFAST AND TEA CAKES

RACINO-POWDER

Sixteen ounces cream starch, eight of carbonate of soda, five of tartaric acid, mix thoroughly.

BACON-PANCAKE

Eight ounces flour, eight of English bicarbonate of soda, seven of tartaric acid, mix thoroughly by passing several times through a sieve.

BAKING-POWDER

Two parts pure cream of tartar, one part of bicarbonate of soda, one part cream starch; mix well.

BAKING-CAKE

Two table-spoons sugar, two of butter, two eggs, one cup milk, one (small) quart flour, one tea-spoon soda, two of cream tartar; bake twenty minutes in a quick oven.

CRISPER CAKE

When yeast is ready to knead from the sponge, knead and roll out three-fourths of an inch thick, put this slice of butter on one top, portion with the eggs and then with sugar; let rise well and bake.

EGGS

Break one egg into a cup and fill with sweet milk; mix with it half cup yeast, half cup butter, one cup sugar, enough water to make a batter as thick as cream; knead. Rise till very light, then nearly double with a few currants. Let rise a second time.

EGGS

Although toast is commonly used, few know how to prepare it nicely. Take bread not too fresh, cut thin and evenly, trim off the crusts for the greater part of first warm each side of the bread, then present the first side again to the fire until it takes on a rich, even brown color.

BREAD

Add to one-half pint of sweet milk, two table-spoons sugar, six of flour, one tea-spoon yeast; dip in this a slice of bread (if dry, let it soak a minute), and fry on a buttered griddle with a little oil on each side. This is a good way to use dry bread.

MEAT-TOAST

Beat in three eggs well, add a pint of sweet milk and a pinch of salt; cut slices an inch thick from a loaf of baker's bread, dip in the egg, then in the milk, and fry in a little oil on each side.

POCKET-BOOKS

Warm one quart milk, add one cup butter or lard, four table-spoons sugar, and two well-beaten eggs; stir in flour to make a moderately stiff sponge, add a small cup of yeast, and set in a warm place to rise.

LEMON-POPPERS

Three and a half cups sweet milk, one cup butter, and let rise overnight. In the morning add one beaten egg, knead thoroughly, and let rise again, then form into biscuits; when light, bake delicately.

HARD TEA BICUIT

Two pounds of flour, one-fourth pound sugar, one salt-spoon salt, three gills milk; cut up the butter and rub in the flour, then mix with water, work an hour, roll into sheets one-half inch thick.

MARYLAND BICUIT

Three pounds flour, one-half cup each butter and sugar, lard, a little salt, water enough to mix; work an hour, roll into cakes and bake.

SOUTH CAROLINA BICUIT

One quart sweet cream, one milk, and a half cup yeast; stir in flour to make a moderately stiff sponge, add a small cup of yeast, and set in a warm place to rise.

SODA BICUIT

Put one quart of flour, before sifting, into a sieve, and one tea-spoon soda, and two of cream tartar (or three of baking powder) of one salt, and one table-spoon white sugar; mix all thoroughly with the flour, run through a sieve, rub in one level table-spoon of lard or butter (or half and half) with half pint sweet milk, roll on board about an inch thick, with butter, cut into squares, and bake in a moderate oven until they are a delicate brown.

TOBACCO BICUIT

Not contented with the usual irritation caused by large quantities of tobacco, many persons have substituted the flow root of poisonous plants, black being one of the most common, by which they have hoped to irritate and cure their coughs.

STURTES

Stures are simply surgical means of uniting the edges of a wound so that the healing process is going on, and the wound does not become a mere hole in the skin, etc., becomes obliterated.

TOBACCO BICUIT

To one gill of water add two half-handfuls of chickweed; boil down to one half gill; strain and put in a bottle. When the shake comes on take a cup full.

GREENBACKS AND GOLD

AMERICAN NOTES

A barter at Texasiana wears \$3,000 worth of diamonds. "I am monarch of all I see, weigh," remarks the Gleaner's Editor.

RESUMPTION DAY IN NEW YORK CITY

New York, Jan. 2.—Wall street presented a semi-holiday appearance to-day. American flags being profusely displayed.

PRESUMPTUOUS BUTLER

He falls in love with his Employer's Daughter and is confined as a Lunatic.

IRISH AND YANKEE STORIES

A friend of the Drawer during the past summer looked over at a country place and passed a little hut or cabin occupied by a descendant of the far-famed Kate Keegan.

NEW YORK, JAN. 1.—ERNEST DELACOURT

Ernest Delacourt, a fine looking man about thirty-five years old, now of Ward's Island, made a statement in a letter to Howe & Hummel, lawyers.

THE GREAT MARKET

The great market now, for these evaporated fruits and vegetables—for say, the garden vegetables can be preserved in this way.

THE TRADE

This trade is now increasing, and the quantities that now are at work are added, so that the orchardist need have no fear of the market, on ordinary seasons, being over-stocked.

THE TRADE

Potatoes were last year successfully prepared by this process, as was also sugar corn in quite large quantities.

THE TRADE

In laying out a zig-zag fence, various modes are adopted for fixing the posts for the corners; but the most perfect, and passing under it, is caused by the cord or line, which, if the weather is in the way, is laid on the ground.

THE TRADE

Mr Howe has obtained a very interesting account of the case of a runaway match which had been completed, and the runaway match which had been completed, and the runaway match which had been completed.

THE TRADE

At Delmonico's the very former gold speculators were discussing the resumption question, and looking over at a country place and passed a little hut or cabin occupied by a descendant of the far-famed Kate Keegan.

THE TRADE

An iron-funder named Nashua, N.H., emptied four pounds of molten iron from a ladle into his boot. He was wounded in the hand by the hot metal.

THE TRADE

Upwards of thirteen million pounds of codfish and eleven million pounds of halibut were landed at Gloucester, Mass., during the past year.

THE TRADE

A medical man in New Jersey thinks that the day is not far distant when a gentleman will call for his hot oxygen and hydrogen gas as naturally as he now consumes his coffee.

THE TRADE

Married—At Altona, Pa., Peter Mook to Barbara E. Mook. They were lovers twenty-three years ago, and after seven years' courtship fell out on account of a trial.

THE TRADE

It is stated in New York that all the insurance companies in the city are preparing to contest the claims of Col. Walton Dwight, of Burlington, N.Y., who died recently with an insurance of \$20,000 in the city.

THE TRADE

When farmers of the older times desired to produce continued local irritation, and to give relief to their skin, they used to apply a poultice in a state of unusual vascular excitement, they made use of rowels.

THE TRADE

In the formation of an insertion of a rowel, a needle is required as for the skin, but a pair of forceps, known in surgical language as forceps, having sharp and hooked blades, are employed to draw the skin as it is held in a fold between the fingers.

THE TRADE

When the rowel is to be closed, the parts are first examined in order to see how the skin may be stretched, and care is required that no dragging or pinching results, which may ensure a large cicatrix or swelling over the wound.

THE TRADE

Having separated the skin in the manner described, the next course is to insert some material which forms the handle, and set up so much irritation that pus or matter may be formed and discharged.

THE TRADE

When the rowel is to be closed, the parts are first examined in order to see how the skin may be stretched, and care is required that no dragging or pinching results, which may ensure a large cicatrix or swelling over the wound.
