MONDAY, May 18, 1914. Dredging.

We have before us the report of the Marine and Fisheries Department for 1913. The Department reports that the Dredge did good work in removing 100,000 tons of silt, sand, gravel and rock from the bottom of various harbors, from Fortune 20,605 tons, Grand Weslevville 18,725 tons. Lamaline 10,-270 tons, Newtown 6,720 and Port au and Fisheries Department. Bras 4,160 tons. The operations at Garnish had to be abandoned after taking out 390 tons, owing to the nature of the bottom and the shallow-

ness of the water. The Bredge Priestman went into ness for personal escape. Another thought should be whether one is commission and began dredging on August 5th, 1912, so that the work re-

presents about seventeen months'

work. Much better work may be expected as experience is gained. Con-

siderable time was lost in moving from place to place, obtaining coal supplies, mending buckets after dred-

supplies, including buckets after uter. A meeting to discuss matters in connection with the Inter-Town Cup was held Saturday evening at the of-fice of the Imperial Tobacco Co. Mr. Marine Surveyor Fitzgerald reports: J. O. Havermale presiding. The city "Stormy weather in exposed places was represented by Messrs. Higgins also accounts for a large proportion also accounts for a large proportion of the lost time indicated during win-day next nine players from the city ter and late fall season.
