It is a perfectly regular ruse de thor of numerous works on the Law of Nations said to the Daily News representative. In the case of a Man evade an enemy vessel, she may steam under any neutral flag, provided she hoists her own flag before firing. Merchant vessels, a fortiori, are manifestly entitled to sail under any flag they please to use. The use of a neutral flag is virtually to say I am neutral. That may be a true or a false statement but a neutral Government can't object to it. It cannot secure

ONE ITEM IN THE BILL.

(Springfield Republican.) In 1871 Germany exacted from Already the damage done to Belgium by the war, by the estimate of a prominent lawyer, of Brussels, Henri Mason, comes to \$1,059,836,000. And that is but one item in the bill which the Allies, if they should win,

will expect Germany to pay. THE PLANET MARS.

By GEORGE FITCH,

Author of "At Good Old Siwash." Mars is a strawberry blonde star, ith a 13,000 mile waist line, which phabits the circumambient ether about 50,000,000 miles outside the

right of way of the earth Mars belongs to the celebrated solar system and is a planet like our own esidence, but not nearly as comfortable for living purposes. It is only one-eighth the size of the earth, which would make it extremely crowded if it had any citizens like John D. Rockefeller J. P. Morgan or Kaiser Bill. It permometers have to be fitted with low-off valves. Owing to these facts and also to the fact that Mars at its earest approach to the earth is 35,-000,000 miles away, no determined effort has ever been made to emigrate hither from this planet, even by such otoriously discontented residents as George Bernard Shaw and Emma

Astronomers have always been greatly interested in Mars because o its nearness. Anything under 100,000 60 miles is near to an astronomer, and he loves nothing better than to nuggle up to within 250,000 miles of he moon on a clear night and spoon with it. Owing to the vast improvement in the common, single-barreled, 00-centimetre telescope, very intersting discoveries have been made upon Mars, particularly in the canal ine. These canals are straight lines which stretch across the planet in all irections and make it look like a railroad man drawn by the general pasenger agent. These lines have always puzzled astronomers. They do ot understand why the people of Mars, who must be kept extremely busy merely keeping warm and cool, should waste their time digging louble-tracked canals 25 miles wide all over the planet. However, the present war should furnish an exlanation. The supposed canals are

abitants of Mars has been made, and stronomers are constantly on the ock-out for signals. Thus far there is o indication that any sound from this earth has ever reached our brother planet, even when Tilman was at his neight in the United Senate,
