THERE IS DANGER IN IT.

It is extremely foolish for persons of delicate health or weak lungs to harbor a suspicious cough from day to day. Thousands of people in Canada to-day are foolishly drawing themselves near the grave through the "little neglected cough." Our counsels and admonitions have in the past saved many valuable lives. We cannot too often seund our warning notes to those who are in peril, We implore you to do as others have done with coughs, sore and ulcerated throats, and all affections of the bronchial tubes—go at once and procure a supply of that wonderful Harvard bronchial syrup, which instantly allays all irritation, stops the cough and soothes every organ of the throat. The almost mirsculous action of Harvard bronchial syrup has attracted the closest attention of physicians. Thousands of men and women have strongly testified to its efficacy and healing powers in serious cases of bronchial troubles and lung diseases.

At this season of the year, with its variable wet and cold weather, no individual is safe unless provided with a bottle of Harvard bronchial syrup. THERE IS DANGER IN IT.
