certify that in 1866 we had a child delicate in health, till it was about three months old, when it began to fail; in a few wocks it was reduced in flesh, and seemed to be consumptive, and it pined away to skin and bones. The doctor too, thought nothing could be done for it, and we hourly looked for its death; so certain were we that it could not live, that we had its grave clothes prepared. We were advised by a friend to call on Dr. Joseph D. Davis, We heeded the advice and upplied to Dr. Davis for medicine, which he gave, and to our sur-prise the child began to mend. After a few months attendance, it fully recovered, and has been very healthy up to the present time hardly having a day's sickness since. It is now eleven vears old, and is as rugged a child as can be found in the country.
