On Friday the 23rd inst. the students of the Fourth and Fifth Forms, accompanied by Rev. Father Lajeunesse, Professor of Geology, went on an excursion to Rockcliffe for the purpose of examining certain geological formations in that locality. In former years trips have been made to Hogsback and to Chaudiere Falls for similar purposes, but we venture to say that no where will a better instruction-place be found than the one that has been selected this year. A very pleasant and profitable afternoon was spent *en route* and at the cliff, and many specimens of the different structures and formations were brought home to the museum. The students intend making another trip to Rockcliffe this fall, and one to Chelsea next spring.

The Dramatic Society has already commenced work for the coming year. The first rehearsal of "*The Provost of Bruges*" took place on Friday the 30th inst. and it is the intention of the society to have this play ready for the public in the course of a few weeks.

The Supplemental Examinations began on Monday the 26th inst. and were concluded on the following Saturday. Quite a number presented themselves for the matriculation and intermediate exams. The results will not be made known until after the meeting of the University Senate on the 4th of November.

The following students compose the University choir for 1896-97. Their first public appearance was on the 28th inst. when they furnished the musical part of the celebration of the 22nd anniversary of the episcopal consecration of His Grace Archbishop Duhamel.

OTTAWA COLLEGE 13, OTTAWA CITY, 6.

"But yesterday the word of Smellie might
Have stood against the world; now lies he there,
And noon so poor to do him reverence."

The Fall of Babylon, the Decline and Fall of the Roman Empire, the Fall of the Bastille, or any other fall—except the present autumn—never saw such a tumble as that taken by King James and his cohorts on the college grounds on Saturday, October the 10th, 1896. Neither fact nor fable records anything so distressing, unless it be the sad fate of that other rash boy, Icarus, who in his adventurous presumption forgot that his wings were fastened on with wax, and who received an arder-cooling sea-bath for his daring flight towards the Sun.

This is how it happened.

Three autumns ago, King James came to us from the West, where for years he had lived
