

WE CURE Catarrh, Asthma & Bronchitis

READ THIS TESTIMONY.

TO DR. McCULLY:

SIR,—I received your letter in due time. When I first came to you I had catarrh, asthma and bronchitis. I had got little or no sleep for three or four months. I got so weak I could scarcely walk, and anything the doctors gave me did me no good, so I came to you, and in two weeks' time I was like a new man. I again got able to do a day's work. People ask me, did they do you any good in Toronto? I point them to these facts, which cannot be denied. I think I was four months under your treatment.

Yours truly,
(Signed),
ROBERT AITON.
Highland Creek.
March, 1886.

Since Mr. Aiton, who is a highly respectable farmer near Highland Creek, wrote this letter, we have received his photo for publication, and to-day are thus enabled to add another important link to the chain of evidence, another indubitable proof of our ability to cure Catarrh, Asthma and Bronchitis. All our cases have been through the hands of the Great Reputables. In their hands they were dying; in our hands they rapidly recovered. These cases expose gross medical ignorance. The craft is thus endangered, and the Medical Council have applied to the Legislature to make a legal gag to prevent us from advertising, so that the sick and dying may not know they can be cured. "It is not professional to advertise a great cure; it is gross quackery," say they. But to be profoundly ignorant of the nature and treatment of disease is the essence of orthodoxy. "Let the people die, but don't bring the profession into contempt." We appeal to the sick from chronic disease, and to the deformed from any and every cause, to examine into our work, and we fearlessly assert that the most sceptical will be convinced.

Symptoms of Catarrh.

Snuffing of the nose, running of the nose, pain over the eyes, watery eyes, weak and red eyes, scales and large casts in the nose, running from the nose, bleeding of the nose. Death by piecemeal of the membrane and bones of the nose, and falling in of the walls and bridge, eating through into the roof of the mouth, and destruction of the palate bones and soft palate, terrible smell from the decaying of the bones, in some cases, dropping into the throat; partial or total destruction of the hearing. Hawking up frothy mucus in the morning, a dry throat in the morning in some cases; putting little lumps of sticky matter, dyspepsia, bloating, loss of appetite, palpitation of the heart, shortness of breath, a dry morning cough, hoarseness, a desire to swallow, tickling in the throat, pains in the chest, racking cough, spit mixed with streaks of blood, heavy yellow and green matter. Infiltration into top of both lungs. Consumption, death!

Any Set of these Symptoms is Indicative of Catarrh.
