BERTRAM PLATE-BENDING ROLLS

MOTOR DRIVEN

- These machines are built in four sizes for plates from 12 feet wide, $1\frac{1}{4}$ inches thick, to 16 feet wide and 1 inch thick. The rolls are arranged in pyramid form and driven by a motor with reversing mechanism. The top roll is raised and lowered by an independent motor. The rolls and hoisting mechanism are steel throughout, and the machine has strength and power to bend plate full width between the housings to a complete circle in from one to three passes.
