**Galvanized ..
Steel ...
Buckets**

Improved Pattern

Something entirely new, and superior to
the old style buckets, made in three
sizes.

They are superior to the ordinary flaring
English buckets, being of greater
capacity.

They are stronger in shape, consequently
more durable.

They will not slip over, nor tip over, owing
to the wide bottom.

They nest very close and firm, which protects
them in shipping.

The rim is in one piece with the body,
consequently cannot get knocked off.

They are galvanized, and not lead coated.

**The Jacobs Patent Water Tube
Feed Water Heater and Turbine.**

**FOR EFFICIENCY, SIMPLICITY
OF CONSTRUCTION and LOW COST**

It is a Cast Iron shell, which will never
corrode, with seamless drawn brass tubes
expanded into tube plates at top and
bottom, with double flow-off.

The tubes being surmounted by a cap
forming a chamber at the top, and being
fastened rigidly only to the lower tube
plate, free play is given for expansion, there-
by preventing rupture and leakage of joints.
