

thoroughly cleansed, with pure bovine; the ulcers being packed with soft lint saturated with the same, and the entire arm and hand dressed with it. In thirty hours a change was manifest, and in sixty hours healthy granulations began to appear, diseased tissue to slough out, and in twelve days her hand and arm were as good as new.

III. A man in St. Joseph, Mo., wounded himself in the hand while dressing dead hogs at the yards. Blood poisoning set in in earnest. In six days all dressings, etc., had failed, and amputation was suggested. I was in the attending surgeon's office when he related the case to me. I suggested wrapping the arm and hand in bovine blood, changing every four hours. In twelve hours the change was so marked that the doctor sent for me to see the case. In four days he was well. The doctor thanked me, as did the man, who was about to lose his arm and probably his life.

IV. A man in St. Joseph's Hospital, Oneota, had his arm smashed in a railroad accident; the fractures were compound and badly comminuted, and in a few days an erysipelatous condition set up, which threatened his life. I was in the hospital, and the attending surgeon, an old friend of mine, Dr. E. W. Lee, chief surgeon of the B. & M. Railroad, called me to view the case. It was truly desperate. I advised taking off all dressings, put the arm on a pillow, cleanse it thoroughly with hot bichloride, and wrap the entire arm in pure bovine. After some hesitation it was done, and in four days the condition had so far changed as to allow the arm to be put back into the dressings. Another life saved, and another victory for Blood.

V. Soft chancroid involving the glans and prepuce. The soft ulcer had been doing its work for four weeks; appeared almost malignant; various dressings had failed, such as iodoform, etc., etc. This ulcer was packed in pure bovine and soft lint, changed every two hours the first three days, then every four hours. In thirty-six hours the diseased tissue sloughed out, healthy granulations set up, and in ten days he was well. This, in brief, is my experience along new lines (that is, new to me).

Omaha, Neb.
