

CAN IT BE AVERTED?

THE DANGER WHICH MENACES AN UNSUSPECTING PUBLIC.

The Brompton Hospital for consumptives, in London, reports that over fifty people out of every hundred consumptives, are victims of constipated or inactive kidneys.

Consumption is one of our national diseases, and the above report goes to prove what has often been said in our columns during the last eight years, that kidney troubles are not only the cause of more than half of the cases of consumption, but of ninety out of every hundred other common diseases. They who have taken this position, made their claims after elaborate investigation, and their proof that they have discovered a specific for the terrible and stealthy kidney diseases, which have become so prevalent among us, is wise and convincing.

We have recently received from them a fresh supply of their wonderful advertising. They have challenged the medical profession and science to investigate. They have investigated, and those who are frank have admitted the truth of their statements. They claim that ninety per cent. of diseases come originally from inactive kidneys; that these inactive kidneys allow the blood to become filled with uric acid poison; that this uric acid poison in the blood carries disease through every organ.

There is enough uric acid developed in the system within twenty-four hours to kill half a dozen men.

This being a scientific fact, it requires only ordinary wisdom to see the effect inactive kidneys must have upon the system.

If this poison is not removed, it ruins every organ. If the bowels, stomach or liver become inactive, we know it at once, but other organs help them out. If the kidneys become constipated and dormant, the warning comes later on, and often when it is too late, because the effects are remote from the kidneys and those organs are not suspected to be out of order.

Organs that are weak and diseased are unable to resist the attacks of this poison, and the disease often takes the form of and is treated as a local affection, when in reality the real cause of the trouble was inactive kidneys.

Too many medical men of the present day hold what was a fact twenty years ago, that kidney disease is incurable, according to the medicines authorized by their code. Hence, they ignore the original cause of disease itself, and give their attention to useless treating of local effects.

They dose the patient with quinine, morphine, or with salts and other physics, hoping that thus nature may cure the disease, while the kidneys continue to waste away with inflammation, ulceration and decay, and the victim eventually perishes.

The same quantity of blood that passes through the heart, passes through the kidneys. If the kidneys are diseased, the blood soaks up this disease and takes it all through the system. Hence it is, that the claim is made that Warner's safe cure, the only known specific for kidney disease, cures 90 per cent. of human ailments, because it, and it alone, is able to maintain the natural activity of the kidneys, and to neutralize and remove the uric acid, or kidney poison, as fast as it is formed.

If this acid is not removed, there is inactivity of the kidneys, and there will be produced in the system paralysis, apoplexy, dyspepsia, consumption, heart disease, headaches, rheumatism, pneumonia, impotency, and all the nameless diseases of delicate women. If the poisonous matter is separated from the blood as fast as it is formed, these diseases, in a majority of cases, would not exist.

It only requires a particle of small-pox virus to produce that vile disease, and the poisonous matter from the kidneys, passing all through the system and becoming lodged at different weak points, is equally destructive, although more disguised.

If it were possible for us to see into the kidneys, and how quickly the blood passing through them goes to the heart and lungs and other parts of the system, carrying this deadly virus with it, all would believe without hesitation what has so often been stated in advertisements in these columns, that the kidneys are the most important organs in the body.

They may regard this article as an advertisement and refuse to believe it, but that is a matter over which we have no control. Careful investigation and science itself are proving beyond a doubt that this organ is, in fact, more important than any other in the system as a health regulator, and as such should be closely watched, for the least sign of disordered action.

ADVICE TO MOTHERS.

MRS. WINSLOW'S SOOTHING SYRUP should always be used for children teething. It soothes the child, softens the gums, allays all pain, cures wind colic and is the best remedy for diarrhoea. 25c. a bottle.

CATARRH.

CATARRHAL DEAFNESS AND HAY FEVER—A NEW TREATMENT.

SUFFERERS are not generally aware that these diseases are contagious, or that they are due to living parasites in the lining membrane of the nose and eustachian tubes. Microscopic research has proved this fact, and it is now made easy to cure this curse of our country in one or two simple applications made once in two weeks by the patient at home. Send stamp for circulars describing this new treatment to A. H. Dixon & Son, 303 King Street West, Toronto, Canada.

BOOKS AND PICTURES.

The Epistles o' Airlie. The best book of Scottish Humour ever published. A splendid book for Readers at Socials and other entertainments. With specially designed illustrations. Bound in cloth, 75 cents; Paper covers	25
