Products/Services

Electromyograph monitoring devices • Biofeedback devices for controlling insomnia, stress and weight, and to stop smoking

Current Export Markets

U.S.A., Europe, Asia, Latin America, Caribbean

Company Summary

Thought Technology Ltd. was established in 1974 to produce instruments that focus on human monitoring and feedback to assist individuals in learning stress management. The company offers a complete line of psychophysiological monitoring instrumentation which includes electromyography (EMG), heart rate, blood volume pulse, temperature, skin conductance and skin resistance monitors. In 1988, Thought Technology introduced the MyoTrac/MyoDac EMG monitor which uses microminiature surface-mount technology.

Biofeedback monitoring systems for controlling stress or unhealthy, compulsive habits.

Products/Services

Hospital security devices • Wandering patient systems

Current Export Markets

U.S.A.

Company Summary

Established in 1986, Total Alert Corporation specializes in security systems for hospitals, institutions and nursing homes. The company provides a system that not only monitors but identifies and tracks wandering patients. The wandering patient protection system includes a transmitter worn in a bracelet on the patient's wrist or ankle. A computer-controlled alarm receiver triggers audio and visual alarms to pagers worn by the staff or to a centralized control panel and can be used in conjunction with door locking relays. Also offered is a portable locator for tracking and locating patients lost within the facility or outside. Products can be customized to suit a variety of environments, tasks and budgets. Total Alert also manufactures a system for home use.
