

(2)

This, you will see, is not only excellent work in order to bring certain agricultural subjects before the pupils, but is also in the nature of sociological extension work.

Owing to the fact that the Quebec Department of Agriculture intend taking this work over altogether, it was brought to the attention of the Council of Public Instruction, as it was thought that this might be done under their auspices in the future.

Under separate cover I am sending a bulletin which will describe, in detail, much of the activities in connection with school fair work.

Faithfully yours,

*J. Harrison,*

FCH:OL

Principal.
