

kindly furnished me with the accompanying minute, with the permission of the Society for its publication :

Moved by Dr. HINGSTON, seconded by Dr. R. P. HOWARD.

—1st. That vaccination confers a certain degree of immunity from small-pox, by either preventing or modifying that disease. 2nd. That that immunity is not always permanent, but may be rendered so by re-vaccination. 3rd. That vaccination may produce in some instances a certain degree of inflammatory action, which may be modified, increased or diminished by the age, constitution or condition of the patient, or by the state of the atmosphere. 4th. That vaccination does not, in any instance, produce scrofula or other hereditary diseases. 5th. That neither the evidence hitherto furnished, nor the experience of the members of this Society, is of a character to lead to the conclusion that syphilis is ever inoculated with vaccine lymph. Carried.

Members of the Medico-Chirurgical Society, present at the meeting on the 13th of October, 1876, all of whom supported the above resolutions :—

Drs. T. J. Alloway, Wm. E. Bessey, John Bell, A. A. Browne, G. E. Fenwick, Wm. Fuller, R. E. Godfrey, R. T. Godfrey, Wm. H. Hingston, R. P. Howard, H. Howard, Wm. H. Mondelet, J. B. McConnell, Wolfred Nelson, Wm. Osler, Jos. Perrigo, Alex. Proudfoot, John Reddy, Thos. G. Roddick, Geo. Ross, G. B. Schmidt, F. J. Shepherd, E. H. Trenholme.
