

Purchasers of land may arrange with the Company to fence, plant and care for the land for a term of years if desired.

Such work is under the direct supervision of a thoroughly experienced, practical horticulturist and his large staff.

The cost of such care and attention being practically the cost of the Company.

Five, ten, and twenty-acre cleared, irrigated farms are now being offered at \$150 and upwards, per acre, on terms of one-quarter cash, balance one, two, three and four years, interest on deferred payments being at the rate of 7%.

The property is also offered uncleared, or the Company will clear, fence, plant and care for the property for absentees or those desiring to remain away totally or temporarily until the producing stage is reached.
