

MINERAL WATER
FROM THE
ARTESIAN WELL

ST. CATHERINES, C. W.

E. W. STEVENSON, PROPRIETOR.

THE extraordinary medical qualities of the waters from this well have already proved it to be more powerful than any mineral water yet discovered, for the speedy and effectual cure of

DYSPEPSIA,

Liver and kidney complaints, want of action in the digestive and urinary organs, disordered stomach, loss of appetite, lassitude, general debility, worms in children, seasickness, fever and ague, etc.

BATHS.

E. W. STEVENSON respectfully announces, that his Saline Baths are now opened to the public, and that such improvements have been made during the winter as will warrant him in saying, that the accommodation provided for warm, tepid, cold, and shower baths is not exceeded on this continent.

E. W. S. respectfully acknowledges the patronage already conferred on these baths, and begs to inform families and invalids at a distance, that arrangements are now made to accommodate with board and lodging all those who may desire it. The properties of the salt spring supplying these baths have been now placed before the public, through the reports of the ablest chemists, and it has been demonstrated that these properties are such as to give both the concentrated water and the baths a pre-eminence above any on this continent, and an equality with the most popular in the world.
