BILLY YOUNG'S LUCK.

His Double-Barrelled "Old Blazer" Blew the Bottom Out of His Rival's Party.

P. C. Young (55), one of the gallant officers who carried a Hung Chang and four friends, had a narrow escape from drowning yesterday afternoon. Mr. Young invited his friends to go hunting ducks with him in his new sailing ship, the "Billy Young." When out in the lake, the "Billy Young" was shot at by a double-barrelled shot gun, "Old Blazer." When the shot was fired, the "Billy Young" was hit in the bottom, and the five men were soon foundering in thirty feet of water. Mr. Young, however, was not hurt, and he and his friends were rescued by a tug boat. The "Billy Young" was a small sailing ship, and was built by Billy Young, who was a well-known sailor. The ship was hit in the bottom, and the five men were soon foundering in thirty feet of water. Mr. Young, however, was not hurt, and he and his friends were rescued by a tug boat. Consider his investments—How they came. They were not, neither do they earn a considerable interest, yet Solomon in all his wisdom felt short of the possible in outlying to mention insurance as a good investment, and the very best means of family saving.

Do you know it is possible in a well-managed and thoroughly reliable life insurance company, possessing a large and increasing net surplus for its policyholders to secure a good paying investment? Experience has repeatedly demonstrated the fact, that it is not only a possibility, but almost an absolute certainty.

THE NORTH AMERICAN LIFE, a distinguished home company, possesses the highest ratio of assets to liabilities, and consequently a net surplus to its policyholders of any of the Canadian companies, and in addition has a well earned record for the highly satisfactory results paid to holders of its mature investment.

The compound investment policy of the North American Life contains the maximum of legitimate advantages obtainable under an insurance contract.

Working at the Big City and County Buildings—Mr. Edward Gurney Appears Before the Board of Control and Expresses His Grievances—The Architect to Submit His Specifications for Approval and New Tenders to be Called for.

The meeting of the Board of Control yesterday afternoon was interesting in that it afforded an opportunity for airing a great deal of that dissatisfaction which has been expressed privately in connection with the tendering for work at the new municipal buildings. The meeting was held especially at the request of Mr. Edward Gurney, who, in view of the state of affairs recently made before the Board of Control, desired to explain his position. Quite a number of plumbers, steamfitters and kindred tradesmen were present and took a keen interest in the proceedings.

Mr. Gurney made a long statement. In the first place he asked the representatives of the Toronto Radiator Company, as Mr. Gurney had been told, to have business relations, and it was at least as private as the meeting was between the company and the city.

He presumed that Mr. Lennox must have obtained his information from the representatives of the Toronto Radiator Company, as Mr. Gurney and himself were the only persons who were present at the conference, and he therefore asked Mr. Taylor to release

him from any pledge of confidence relating to what took place.

Mr. Lennox said he did not get his information from Mr. Taylor, but he formed part of his opinion from the fact that Mr. Gurney had asked him to release him from any pledge of confidence.

Mr. Taylor agreed that Mr. Lennox's statement was right.

THEY HELD A CONFERENCE. Mr. Gurney, continuing, said that at his request, but of his own volition, for the purpose of asking him to meet him in Montreal for the purpose of discussing the matter, he had been told that Mr. Taylor would not do this.

Mr. Taylor wanted him to mention terms and he said he would go to see Mr. Taylor, but he declined to do so. Then Mr. Taylor wanted him to mention terms and he said he would go to see Mr. Taylor, but he declined to do so.
