The Face to the Left.

The face to the left represents a type of woman looking at least ten years older than is necessary. She wears the usual set of teeth made by an average dentist who has not made contour restoration a study. All the features are more or less distorted, the nose, lips and chin suffering most, as will be noticed that even the eyes have a drawn expression.

We make a specialty of contour restoration. The dentist in charge of the prostetic department is an expert of several years' experience.

The face to the right represents the same lady wearing one of our CONTOUR RESTORING SETS of teeth. The reposing of the features has made a wonderful improvement. She not only looks ten years youngand full of character. There is not a case that we cannot improve upon generally a very great deal. Call and we will give you an idea what we can do for you.
