CITY'S SUPPLY OF HARD COAL 34,000 TONS OVER ESTIMATE

FARMERS IN QUANDARY

Many Would Buy Here, But Allotment Will Not Permit.

London's Fuel Controller J. W. Mc-Callum finds out that London is entitled to 103,240 tons of anthracite coal for the coming winter instead of 75,041, as ordered by the federal fuel controller

Some time ago the federal fuel con-troller notified the city that Canada had been placed on the same basis as the different states of the union and that as a consequence the city's supthe winter of 1918-19 would be

were 34,977 of hard and 15,876 tons of soft.

Another Question.

Another important and what may prove a serious phase of the matter is now occupying the attention of Inspector McCallum as he is preparing his figures to send to Ottawa.

It has to do with the farmers. He cites the case of Lambeth. For years they have had a dealer there. He has, however, quit this year, and the Lambeth residents must come to London. Mr. McCallum was also talking to a prominent Oxford resident. He said that he and a great many others of his district were coming to London for their coal. He mentioned several small places that would this year be entirely dependent on London for their coal.

With London's supply limited, Mr. McCallum cannot see how the dealers of London, with no more coal than the city will require and perhaps not enough, can be expected to supply the farmers.

Controller Must Decide.

enough, can be expected to supply the farmers.

Controller Must Decide.

"I will put the matter up to the federal fuel controller at once," said Mr. McCallum. I'f he will not advance a sufficient quantity of coal to meet the needs of the farmers, why I will be lobliged to prohibit the dealers selling coal to the farmers unless on tickets secured from my office. I hesitate to take such a drastic step. I do not want to drive the farmers from the city. We would like to have them come here and spend their money on coal as well as spend their money on coal as well as on clothing and other necessities, but I cannot let the people of the city freeze."

OLD LINE TORIES TO **GLOAT OVER VICTORY** IN 1911 CAMPAIGN

planned for September 21 in Toronto by Hon. Robet. Rogers.

Prominent "old line men will be asked to attend and it is whispered that Sir Sam Hughes and several other prominent "ex's" will be present to howl their glee about the "No truck nor trade with the Yankees" win of seven years ago.

The movement is looked upon by many as a definite Tory insurgency with the chief insurging done by Sir Sam and Hon. Bob. As reported recently by the special correspondent of The Advertiser at Winnipeg, Mr. Rogers is maintaining a large central headquarters at Winnipeg, from which the directs his organization. Such terms as "carpet bagger" applied to the industrial committee, he did not in any way overstep his duties and an absolute denial of any foul language is made.

He was taken to the hospital and was still unconscious at the time of going to press. The extent of his in-juries could not be learned or his address in time for publication.

DID THE SUN DO IT?—While offi-cially Sunday was far from being the hottest day London has experienced this season, circumstantial evidence could be offered to prove the records untrue. A scorched thermometer, with the glass lacking, was found on Dundas street on Sunday afternoon. That the extreme heat caused the glass to break and charred the wood base is the inference drawn by the citizen who found it and reported the discovery to The Adver-

that as a consequence the city's supply for the winter of 1918-19 would be based on the coal receipts for 1916-17. These figures he sent along and Inspector McCallum started in to check them up. He found that the federal fuel controller had missed the London and Port Stanley Rallway. He had that company compile figures of the amount of coal brought in. During the past two winters it brought in 70,337 tons of hard coal.

Mr. McCallum has compiled new figures as a result.

Figures Change.

His figures and those of the federal fuel controller are widely different. Under the federal fuel controller's figures London would be obliged to get along with 5,000 tons less hard coal than was received last year. Mr. McCallum's figures show that the total will be 7,000 tons less, but the city will have 34,000 tons more coal than

and adjacent cities. Everything apwas estimated.

GERMANS ARE OFFERING THE STIFFEST RESISTANCE NOW

On the French Front in France. Monday, Aug. 12 (Midnight). -A momentary point of stabilization was reached Monday, and the French are now at grips with the Germans on the ground they entrenched from the autumn of 1916 until March, 1917. The German trenches are still deep enough to afford the enemy the best opportunity he has had of clinging to ground from which he is to Barr, William A. Proyart remains firmly in the hands of the British this morning, having been finally taken by them yesterday. North of the Somme the Americans spent a quiet night, the principal action on this locality being at the southern end of their position on the spur between Elinhelm and Bray. There the British improved their positions along the whole length of the spur by storming and capturing enemy defences, inflicting casualties and taking prisoners.

There has been some little fighting in Madame Wood, about two thousand yards southeast of Herleville, where the Australians are in touch with the enemy. A German counter-attack yesterday at Chilly, further south, resulted in the British withdrawing to the edge of the town, as nothing could be gained by staying there. Chilly is now in No Man's Land. Another counter-attack east of Lihons, north of Chilly, was smothered under British fire. Among the new troops the enemy has hurled into the line in front of the British are two from the north and one from Flanders. Employees of Hydro Commission Latest To Fall In.

ST. THOMAS, Aug. 12.-The new Mc-Adoo award received at the various railway shops in the city is blamed by Chairman W. K. Sanderson of the hydro commission for a request which was received Saturday from the emthe ployees of the commission for an i

circulation, and in fairness to all con-cerned the denial has been issued, that there should be no misapprehension of the facts.

of the commission. It will be taken up early next week, however. This last mentioned request means that almost every employee in the city hall last mentioned request means that almost every employee in the city hall has demanded an increase in salary this year excepting the city officials. The salaried officials are apparently satisfied to go on at their old rates; in fact, some of them are receiving the same pay as they did ten years ago. Magistrate Maxwell, who is paid out of the city treasury, today receives the same salary as that paid to the first by the authorities.

Prisoners at present confined to the jail by the civil court will be placed in the top story, while the lower floor will be used exclusively for military council and committee. In fact, there has not been a regular meeting gives leaf January of the city council.
