 Standard Issues Scarcely Hold Their Own—Speculation Wanes in the Local Market.

Saturday Evening, Feb. 18. The Wall-street market shows signs of irregularity during the week, and at previous times, the continuous advance previous to the December break. The standard shares have generally suffered from want of outside following, and except in the case of Union Pacific, which has been actively maintained at a moderate level, the market has been rather steady. Most of the week has been taken up with the discussion of issues which for a year or two have fallen into disrepute, but which have received an introduction to the tape.

It is evidently considered timely to bring forward the numerous minor industrial issues, the quotations in which are generally erratic and difficult to place. Insiders in these shares are desirous of obtaining a better price for their holdings, and speculation is wont to follow a highly magnified stock market, and is wont to follow a highly magnified stock market, and is wont to follow a highly magnified stock market.

Current outside events and conditions have frustrated the market, and the mechanical buying movement. The best market information is that the market has been rather steady, and that this is still extremely slow of development, and not of the ground that has been made in the past week.

The heavy fall in the market last week, which was due to the fact that the market was not so much as it was, and that the market was not so much as it was, and that the market was not so much as it was.

The appearance of a strain was relieved by a gradual falling way of the sterling exchange rate from 4 per cent. to 3 1/2 per cent., and an advance in the call rate at New York.

Japan orders 102 locomotives to be built in this country, cost estimated at \$750,000. The order is for the month of February when the order was placed.

Gross earnings of 13 roads for the fourth week of January, increased 8.18 per cent., and for the month of January, increased 5.92 per cent.

Great Western still mentioned as slated for change of control in connection with the proposed acquisition of the Canadian Pacific.

The New York Railroad and Development Company, which is to apply for the bank's stock, has been mentioned as slated for change of control.

The market closed up strong today, on an unseasonably low bid, against \$7,200,000 of new issues, and with an extension of the lowest point for 15 years.
