VACCINATE 1,000 ON S.S. MOBILE

Steerage Passenger Had De-veloped Smallpox — Steward Declares Himself Immune and Will Be Marooned.

New York, Sept. 30.—When the White Star liner Mobile finally reached her pier this morning, 188 first and 350 second class passengers landed with sore arms, after having been vaccinated at quarantine because a Czechoslovak in the steerage had developed smallpox on the voyage across the Atlantic. In addition 450 members of the crew were vaccinated.

Only one member of the ship's company, Jack Jeddies, a steward, defied the doctors. He told them that he had been in the Bubonic plague epidemic in Bombay, had seen Asiatic cholera sweep Kowloon, and the population almost wiped out by Boy Beri and yellow fever at Jalla-Jalla on the west coast of Africa, and had never been inoculated and was not going to start now. It was finally decided to inocerate him in the ship's hospital until she reaches her pier and then send him to some island where he could be isolated until the Mobile sails again for Liverpool on Oct. 5.

Cadiz, Spain, Sept. 30.—The Bishop of Cadiz has issued a notice prohibiting women whose arms are not completely covered or who wear short skirts or thin stockings from entering the churches.

DONALDSON LINE

TO HAVE QUEBEC LONDON SERVICE

Quebec, Sept. 30.—It was announced last night by Septimus Garrow, Quebec agent for the Robert Reford Co., and director of that firm, that, beginning with the season of navigation of 1921, the Donaldson line will put on a regular line of steamers between Quebec and London, excluding loading at Montreal.

RADICATION OF MALARIA

Gigantic Task Undertaken by the Rockefeller Foundation.

Washington, Sept. 30.—The Rockefeller Foundation, which recently discovered the germ of yellow fever, has now undertaken the gigantic task of eradicating malaria from this country, and eventually from the entire world, according to announcement made here.

Already it has succeeded in reducing the prevalence of the disease sixty-seven per cent. through expenditure of sixty cents per capita in four Arkansas towns.

"Malaria is a crippling and deadly disease which attacks or threatens the 800,000,000 people who live within the zone of its influence," says the Foundation report.

"Continued supervision in six Arkansas towns affords a convincing proof that it costs a community approximately a four-fold greater sum to harbor malaria than to banish it. As a consequence public funds for malaria control operations are now being appropriated faster than salted fish can be found to do the work."
