PROVINCIAL PORTFOLIOS.

Once upon a time it was deemed necessary that this province shold have six ministers to manage its affairs, of whom tine against American cattle and that five should have portfolios. So pressing was the necessity for a fifth department that it was established under cover of the supplementary estimates. Yet since for the admission of corn free into Canthe death of the Hon. John Robson the Davie government has managed to rub ing the quarantine in British Columbia, along with only five members, four of whom are bearers of portfolios. What it should now be quite in order to susa difference there must be in the provinpend the regulations. No harm could recial business of to-day and the business sult. of a little more than a year ago, when

four ministers now do the work for which five were then accounted necessary. But this is not all. During the greater portion of the last three months by the act of last session the governthere has been only one departmental ment has appointed Mr. J. J. Kelso, minister here; Mr. Vernon seems to have taken over all the work, with such aswho has already gained considerable exsistance as Mr. Pooley could give him. Col. Baker has been in England, Mr. Turner was in the east for some time, and the premier has been away in various places. At the present time Messrs. Davie and Baker are absent, leaving; all the work to their two colleagues. There must have been some serious miscalculation when the appointment of the extra minister was considered necessary; or else the business of the province is suf- iting committees in every electoral disfering from the absence of two members out of the reduced number. It may well bother ordinary people to know why the extra department should be continued when it is not needed. How long is it to be kept without a head, if its continued existence is actually necessary? What becomes of the salary voted for the fifth minister? Is it allowed to lapse, or is it divided up among those who perform the work of the vacant department?

San Francisco, July 10.-M. H. De Young, vice-president of the World's The BEST BOOKS by the Best Fair national commission, arrived here Saturday to "boom" the California midwinter fair. The mayor of the city has appointed a committee of 50 to take charge of the proposed exposition, and a sub-committee of management will early next week choose a director-general. De Young is being urged for this position on the ground that his connection with the World's Fair has made him one of the best versed men in exposition affairs. Chicago, July 10 .- While prominent local members of the "American Protective Association, which by some elements has been regarded as a "know-nothing" organization, profess to know nothing of the report that the national convention of the order is to be called with the view of bringing into existence a new political party, yet the presence in this city recently of a number of members of the order from other points gives color to the belief that some such move

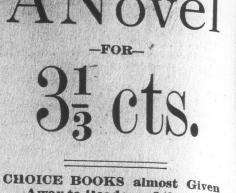

is on the carpet. The association has now some 80 secret societies affiliated with it, with over a million and a hulf of names on the roll.

World's Fair, Chicago, July 10.-Eatries for the great contest of homing pigeons to take place two weeks hence, closed to-day in the office of Chief Buchanan of the department of live stock. Several hundred entries have been received. It has been decided that Capt. R. S. Thompson, of the United States Signal Corps, now on duty at Jackson Park, shall have charge of the flight. Twelve Thousand Idle Men.

St. Paul, Minn., July 10 .- There is Florence No. 15. widespread suffering in the several established iron ranges of the Lake Superior districts. It is the worst time since the black days of 1872. There is scarcely a mine on the ranges that is not either closed or greatly curtailed in operation. Miners have not been at work for three weeks and the idle men are at least 8000 more than a month ago. This nonemployed force decreases in like ratio the business of the railways in that section, and also the stores and dependent industries. It is probable that 12,000 men are to-day out of work by the closing of these mines. Most of the miners who have suspended operations are still shipping ore and a few are continuing mining operations, with day shifts. In some, however, the pumps have been taken out and the mines will be allowed to fill with water.
