The London Standard of 7th inst., says Field Marshall Commanding in Chief ted Woolwich on the morning of the th inst arriving by train shortly before cm. He was accompanied by General lelife, R. A. Deputy Adjutant Gen'l, was repeived by Sir. Charles d'Aguilar ndant of the Woolwich District; mel King, Deputy Quartermaster eral; Colonel Markham, Deputy utant General at Woolwich; and and his visit being Inte was fired. On reaching the Royal Artillery Barneks the recruits of the garrism, the special objects of the wist, I were found drawn up for inspection, forming a line of considerable length. The recruits were all of less than twelve months' service, and comparison men of the Royal Horse Artillery, Included Batteries, Garrison Artillery, Included Batteries, Inc Pipon, to turnish additional horses for artillery and transport duties. A great many horses are being trained for regimental transport duties, and will be ready for the regiments requiring than as soon as its transport organization is complete. Many men belonging to various corps are now at Woolwich learning their transport duties for this service, and to-day detachments of the Coldstream Guards and Soots Guards, each commissed by an officer, will arrive in garrison for a similar course of instruction. Having visited the new stabiling in course of erection, the Duke of Cambridge rode down to the War Department Depot at the Dockyard, and witnessed the active preparations there in progress. The new platform of the branch railway engaged his par-ticular attention, and perfect provision appeared to be making for a number of The War Department have ordered their broker to buy 3000 tons of oats,

most of which will be stored at Woolwich, Aldershot, and Portsmouth. From Malta our Correspondent, writing on the 27th February, says:—The war telegrams continue to be of the most conflicting description. As to news ning our own naval and military cents, great care is taken at headrters that very little leaks out until ALLEN'S things have taken place. I know, however, that every preparation has been made here by both the naval and LUNG BALSAM! military department to be ready for any mergency. Large quantities of biscuit ave been baked in the naval bakeries for the troops; large quantities of shot and shell have been received, as well as very Doctor recommends it! small arm ammunition; the forts have all been got into a state for active service, and shields rapidly put into their places. Constant drilling and parades places. Constant drilling and parades of the troops take place; large stocks of UCH SUCCESS IS RARE made in the way of quarters for additional troops. The newly-arrived regiments—the lat and 61st—have setregiments—the 1st and 61st—have set— tany one afflicted with a Cough or Cold, tled down in their quarters, and the Lalsam without delay. garrison affairs go on quietly.—The ships of the Channel Squadron arrived here on the morning of the 27th. They wait for orders. It is not yet known

SMORING WHILE AT WORK .- There are three good reasons why workmen should not smoke while at work, namely, it reduces the physical energy by the very sense of relaxation which it imparts; it often causes the smoker to stop work altogether until his pipe is out; and it is dangerous. We do not believe that any man can properly see
what he is about with a cloud of smake
and gas rising into his eyes, neither can
he bestow his full attention on what he

It may be said that even if he stops for a few puffs said that even if he stops for a few puffs no harm will be done. Perhaps not so far as one man is concerned, but if all the men in a large concern stop for puffs, the aggregate sum of the stoppages will amount to considerable time lost. A correspondent writes us to say that he ently timed the smokes taken in a day by twelve journeymen painters, who were engaged on a job requiring special haste. The total number of by all the leading druggists in the Dominion. minutes footed up over a quarter of a day's work, and the employer soon discovered that he could not afford any such loss, and promptly forbade the practice. Not long ago we saw carpen-ters amoking in an unfinished house while putting in the woodwork. The floors were littered with shavings, and large quantities of other conbustible matter were lying about. The accidental dropping of a few sparks from one of the pipes might easily have determined a serious conflagration. If smoking must be practised, it is much better to confine the indulgence to off-work hours. -Scientific American.

REWARD OF PUBLIC SERVICES. -- Mr. Webster, in one of his conversations with his biographer, made this extraordinary statement. "I am not un-aware," said he, "and it would be affectation in me to deny it, that I have a public reputation to leave to posterity; but it has been carned with difficulty. If I were to live my life over again, with my present experiences, I would, under no circumstances and from no considerations, allow myself to enter public life. The public are ungrateful. The man who serves the public most faith-fully seedless no adequate reward. In my own history those acts which have been, before God, the most disinterest-ed and the least stained by self consi-DENTISTRY. deration have been precisely those for which I have been most freely abused. No, no ! have nothing to do with politics. Sell your iron, eat the bread of MR. J. NOONAN'S STORE independence, support your family with the rewards of honest toil, do your duty as a private citizen to your country, but let politics alone. It is a hard life, a thankless life."

where he intends to reside.

All operations performed in a nest and satisfactory manner.

TO THE FARMERS OF MIRAMICHI. We have been Manufacturing IRON FRAME MOWERS

or the last four years, and are now offering to the farming community this, the combining greater excellence of mechanical simplicity together with greater durability and, entire religibility for all the requirements of the field, then any other Mower extant.—In construction they are similar to the celebrated Waiter A. Wood's Iron Frame Mower, and the Richardson Backeye, both American Machines. Of the former there are over 260,000 in use, and the extraordinary number of 20,000 were manufactured and sold last season, by the Wood Company of United States. We have over 500 of our manufacture and sold last season, by the Wood Company of United States. We have over 500 of our manufacture and sold last season, by the Wood Company of United States. We have 1 he wood and and unprecedented success of home manufacture and our enterprise. A hist of our Agents in this sertion of the Province will be found appended, and farmers are requested to ask information of them relative to our Mowers in use in their respective localities, which will establish beyond doubt their unquestionable supervorty ever any other mower to be had in our market.

The faelity of procuring all parts or pieces within a nominal length of time must show beyond the shadow of a doubt the claims such an enterprise has upon the farmers of the Martime Provinces.

For the coming harvest of 1877 we will manufacture LARGERIX in excess of our numbers of last season, and trust that our growing enterprise may find such inducements held out to it as will be commensurate with its merita.

Let it be remembered we have no hesitation at all times, in enterpring into a friendly competition in the field with any other machine in our market. WEGULRANTER OUR MOWERS TO RE INVESTIOUR TO NONE. Farmers would do well to enquire prices and terms before purchasing elsewhere. BEST MOWER
