STAGE ANECDOTES.

HE WORKED.
He was feeling sulky, there was no doubt of it. He walked up and down, back and forth, with lowered head and muttered to himself in a hazy manner that, how dis-satisfied he was with his lot in this material world.
He had not taken his part at the matinee performance. He had been sulky then. Consequently he had gone without supper which was not calculated to sweeten his outlook on life; for in vandeville if you fail to eat you fail to eat, one gets his doers there.
As he was making the three hundred and something odd turn in his walk the person who employed him in the act approached and stopped in front of him.
"Hi!" snuffed the person "still on your high horse are you?"
The performer did not deign to answer.
"Now look here," continued the person, in a low threatening tone "if you don't work tonight you won't get anything to eat for a week. You'd better look pleasant and act pleasant, d'ye hear?"
The act went on in due time and the performer, though in spirit and hungry in body, took his part in his accustomed manner. He was only a performing bear it is true; but even a bear can act at your mercy.

IT SEEMED FAMILIAR.
Mr. Robert Mantell, when he was playing in the West, some months ago, on his arrival in a certain town, was driven to the best hotel in the place. On reaching the hostelry he discovered he was not in funds and told the hackman to come inside and get his fare. Mr. Mantell registered and then asked the clerk to settle with the driver for him. The clerk looked at the actor, then scrutinized the name on the register.
"Your name is Mantell?" he queried suspiciously.
"It is," answered the actor, non-chalantly.
"Mantell," repeated the clerk, as if trying to place the name.
"Yes, Robert B. Mantell, the tragedian."
Of course, I remember you now. You're the gent that shot the apple off a boy's head and had a hotel down at Cookeville named after you, ain't you? All right, I'll pay the driver, Mr. Mantell.
It's great to be great.
NO TROUBLE AT ALL - OF COURSE.

When the Manhattan Opera Company were playing in Montreal some few weeks ago, the management received many letters from persons of both sexes who sought positions in the chorus.
The manager, when he thought the applicants were sincere, generally asked them to call, and if they proved intelligent in conversation and their appearance was smart, they were turned over to the musical director for a vocal test.
One morning the manager received a letter asking for a trial, and the writer was so modest in enumerating her

qualifications that the manager thought he would not take any notice of the communication. However, he did answer the letter, and the next morning the lady, accompanied by two lady friends, showed up on time.
The manager introduced her to the musical director, who was delighted with her singing voice. Then the manager engaged her in conversation and found out that she knew something of concert work and that she had had some amateur stage experience.
"Why did you not tell me all this in your letter?" he asked. "I am looking for people just like you."
"Oh, thank you ever so much," she exclaimed, gushingly. Then she continued apologetically, "but I really un-doubtedly your opinion on the matter of my voice for stage work. Good morning."

BRIEF DESPATCHES.

LOWELL, Mass., June 6.—Louisiana Piette, Lowell's "sleeping sickness" girl, died today after lying on her bed practically unconscious for 21 days. During that time the only nourishment which passed her lips was the milk forced through her teeth.
The girl, who lived at 34 Austin St., this city, had had four other similar spells of lying unconscious, and each spell longer than the last. A sleep last fall of thirty days was ended by electrical treatment given by physicians.

LAWRENCE, Mass., June 6.—The fourteen weeks disappearance of Edward Latourneau, a furniture dealer of Lowell, was explained today when his body was found floating in the Merrimack River. The medical examiner pronounced the case to be one of accidental drowning. Mr. Latourneau leaves a widow, who had offered a reward of \$200 for the recovery of his body dead or alive. Foul play had been suspected, as Mr. Latourneau had left Lowell on February 24 to collect a bill in this city and failed to return.
ITHACA, N. Y., June 6.—Commodore Clark, of the Cornell Navy, who has rowed for the last two years in Hudson Regatta, was dropped from the training table today by Coach Courtney. Others dropped are Hollister and Sanger, veterans, and Segreaves and Day, sophomores, who were in the winning shell against Harvard last Coronation Day. The last named were succeeded by Bacous and Stevens, veterans. Bacous is a leading candidate to succeed Clark as commodore at the election to be held this week.
PARIS, June 6.—At the Chantilly course today, Edmond Blanc's Union won the Prix de Diane (the French Oaks) for three year old fillies at ten furlongs. The value of the stake was \$19,000 and Union was first by a scant head. W. C. Vanderbilt's Silver Streak was unplaced. Mason Carne's El Biar ran unplaced in the Prix des Ecuries, a handicap at a mile and a half.

ST. PETERSBURG, June 6.—The council of the Empire has adopted the marine budget, restoring the appropriation of \$1,700,000, which was rejected by the Duma. This amount is to go towards the construction of four new battleships, authorized in 1908, but the work of construction has

THOUSANDS COMING FOR CELEBRATION

Twenty Car Loads Will Leave Moncton Alone on the Glorious Twelfth

Plans for the monster Orange demonstration to be held in this city on the 12th of July next are steadily advancing. Saturday a meeting of the general committee in charge of the programme was held and further reports of the proposed doings received.
It will require some twenty cars to bring the visiting brethren in, from Moncton and arrangements are being made to have the cars parked in the city. From all parts of the province come promises of large contingents and the local authorities are likely to have their hands full in negotiating the rush.
Luncheon is to be served at the Victoria Rink, where the parade will be started from and a mass meeting is now being arranged for the purpose of conducting the day. This will also be held at the Rink. A number of well known speakers are being booked and the whole affair is already being anticipated by the knowing ones as the best ever.

SESSIONS AT MANY POINTS

After having personally inspected the river from the boundary line north of Grand Falls to the mouth of the St. Francis the Canadian commissioners of the international arbitration board returned to the city Saturday.
On Wednesday an informal meeting of the board was held at Van Buren, after which the commissioners drove to Edmundston and from thence proceeded by rail to Connor, concluding the journey to the mouth of the St. Francis by team. The river had fallen fourteen feet in the three weeks that elapsed since the former meeting, and another excellent opportunity was given for the gaining of a working knowledge of the river and its uses.
At Van Buren, said one of the commissioners to The Star last night, the work of clearing the logs is still being prosecuted steadily. At night the men work by electric light, and good progress is being made in getting the jam started.
The commission returns to Van Buren Wednesday, when the first real session will be held and the witnesses called. From there the commissioners will go to Fredericton and St. John, and at all points along the river where there are grievances to air.

EVIDENTLY A CASE OF DOUBLE SUICIDE

BOSTON, June 6.—In serving an ejection ticket a local constable covered the bodies of Walter P. Towns and his sister, Anna I. Towns, on the floor of their apartment on Centre Place today, the former with a revolver in his hand and a bullet hole in his ear, and the latter with a razor by her side and her throat cut by the jugular. The authorities had not decided tonight whether both committed suicide or whether the bodies were murdered by her brother, who later took his own life.
Both were seen earlier in the day and appeared in good spirits.
About the middle of the afternoon Constable Brooker with Henry Fraser, the owner of the apartment, attempted to enter the house to serve an ejection ticket. No one responded to the bell call, so a window was raised and the constable stepped into the front room. There he found the bodies lying on a blanket with a hammock rolled up under the heads of both bodies. There was very little to indicate the motive, death as the bodies were resting easily and there was no sign of a struggle.
Towns had lived with his sister for several years, neither having married. The rent had not been paid for some months. Towns was 48 years old and his sister about 20. Their family connections had not been ascertained to-night, so the bodies were sent to the morgue.
"I think she's double-faced!" "Oh, don't say that! One face like hers is bad enough!"
Dolly—My dear, I have refused offers from eight men during the last two months.
Dolly—Is that so? What were they telling?
not been begun. The keels of the first two of these battleships will be laid down June 18th and July 3.

ST. PETERSBURG, June 6.—St. Petersburg is on the eve of a new and serious epidemic of cholera, according to the published views of the chief sanitary physician of the city, Dr. Ivanoff. Twelve cases of cholera were reported yesterday and nine additional cases were discovered today. These were spread in practically all the quarters of the city, indicating that the infection is general. The sanitary commission is without funds and is therefore unable to take the necessary precautionary measures. The water supply is contaminated.
DALLAS, Texas, June 6.—In a fire which started today in the kitchen of the Knight Apartment House, corner of Elm and Harwood streets, Harwood Donnelly, eight years old, was burned to a crisp and two others were fatally injured and two seriously hurt. Sixty-two people were asleep in the building when the fire started.

MAYBE THIS WEDDING WILL BE A HAPPY ONE

BEATRICE THAW AND HER FIANCÉ, MARQUIS FRANCESCO MARIA THEODOLI.

PITTSBURGH, June 6.—Next on the international wedding stage comes Beatrice Thaw, daughter of Alex. Blair Thaw, of this city.
She is to wed Marquis Francesco Maria Theodoli on June 3, in the city of Rome. They will come immediately to the United States.
Undaunted by the fact that the luck of American girls with foreigners lately has been very poor, and that Alice Thaw, her cousin, failed miserably in her attempt to carry the title

AWFUL DEEDS OF A MADMAN

SOMERVILLE, Mass., June 5.—With a maniacal shriek John Murphy turned from pig sticking to man killing in the North Packing and Provision Company's slaughter house today, driving his fellow workmen before him like a herd of swine, slew five of them and wounded four others.
Two of the wounded were reported later as dying.
The dead are: Robert Smith, 48, colored, of Cambridge; James Cairn, 46, colored, of Cambridge; Thomas Crowe, 41, white, of Cambridge; Michael Jani, 39, a Pole of Somerville; unidentified white man.
The wounded: Dr. Daniel C. Hayes, 39, government inspector, Waltham, Mass.; John Chevons, 48, a Pole, of Cambridge; John Lewis, 53, of Cambridge; James Patter, 50, of Somerville.
Hayes and Janicous were fearfully cut and slashed.
Murphy was working on a platform killing the pigs as they were swung into the tanning room on the seventh floor of the building. Extending from the platform was a long bench at which the pigs were being dressed by 125 workmen, while only ten feet away stood Dr. Hayes, the government inspector.
According to some of the workmen, Murphy had been acting peculiarly for some days, but he returned from his lunch this noon apparently in good spirits.
Shortly after 2 o'clock he suddenly uttered a terrific shriek and jumped at Dr. Hayes, waving his 15 inch razor-edged knife in his hand. He cut Dr. Hayes a deep gash on the neck, smashed him over the heart and practically dismembered him. The terrified workmen leaped from their places and rushed for the door, but were not quick enough for Murphy, who ran after them, slashing right and left.
Every man whom he struck went down with a groan, and in the killing room three of them died. The crowd plunged down stairs with Murphy after them, and at every landing he struck someone. On the third floor he was wrestled from his hand by a fellow worker, but since Mr. Murdoch returned from his memorable trip with the announcement that an additional engineer was required, diligent search has been made to find a suitable incumbent to the new office, the happy conclusion of the first, as announced Saturday, is being received with satisfaction by all except the statisticians of the Department of Commerce and Labor. Furthermore Canada's imports from Great Britain have increased from 1882 to 1908, the imports from Great Britain have decreased during the same period from 85.2 per cent. to 23.9 per cent.
Two-thirds of Canada's imports are manufactured and amounted in 1907, the last year for which statistics are available, to \$150,000,000. Of this amount \$89,000,000 worth, 53 per cent. of the total were from the United States and most of the British colonies is admitted at rates materially below those of the general tariff paid by merchandise from the United States.

KAY also had one burned to death. A horse belonging to T. J. Phillips broke out of its stall, rushed from the flames and rushed down Indian town on the gulch.
Quinn and Allen, McKay, Phillips and McCarthy will lose carriages, wagons and a couple of sisies, Quinn and Allen's loss in stock amounts to nearly \$1,000. They carried \$100 insurance. The building was damaged to the extent of \$300. This was insured to the extent of \$400.
T. J. Phillips' loss is about \$300. He also had insurance. Conductor McKay also carried insurance. Phillips and McCarthy's loss is about \$400, partially covered by insurance.
The origin of the fire is a mystery, but it is believed to have been set. A strange man was seen lurking in the neighborhood about eleven o'clock. At that hour there was no sign of fire, but fifteen minutes later flames burst through the side of the barn.

LATEST IN TOWER CLOCKS.
The new tower of the Birmingham University is to be fitted with one of the largest clocks in this country. It will have four dials, each 17 1/2 feet in diameter, made of cast skeleton from filled in with white putty for illumination at night. The hands are made of strong rolled sheet copper, and each pair weigh about 150 pounds. The extreme length of the minute hand is 19 feet 4 inches, and the hour-hand at the widest part is 2 feet. The clock itself is over 9 feet long, weighing alone about half a ton. It will strike the hours and ring out for illumination at night. The hands are made of strong rolled sheet copper, and each pair weigh about 150 pounds. The extreme length of the minute hand is 19 feet 4 inches, and the hour-hand at the widest part is 2 feet. The clock itself is over 9 feet long, weighing alone about half a ton. It will strike the hours and ring out for illumination at night. The hands are made of strong rolled sheet copper, and each pair weigh about 150 pounds. The extreme length of the minute hand is 19 feet 4 inches, and the hour-hand at the widest part is 2 feet. The clock itself is over 9 feet long, weighing alone about half a ton. It will strike the hours and ring out for illumination at night. The hands are made of strong rolled sheet copper, and each pair weigh about 150 pounds. The extreme length of the minute hand is 19 feet 4 inches, and the hour-hand at the widest part is 2 feet. The clock itself is over 9 feet long, weighing alone about half a ton. It will strike the hours and ring out for illumination at night. The hands are made of strong rolled sheet copper, and each pair weigh about 150 pounds. The extreme length of the minute hand is 19 feet 4 inches, and the hour-hand at the widest part is 2 feet. The clock itself is over 9 feet long, weighing alone about half a ton. It will strike the hours and ring out for illumination at night. The hands are made of strong rolled sheet copper, and each pair weigh about 150 pounds. The extreme length of the minute hand is 19 feet 4 inches, and the hour-hand at the widest part is 2 feet. The clock itself is over 9 feet long, weighing alone about half a ton. It will strike the hours and ring out for illumination at night.
