

BRADSTREET AND DUN.

REVIEW OF COMMERCIAL MOVEMENTS DURING THE WEEK.

Most Lines of Business Have Expanded—Speculations Have Been the Chief Factor in Raising Prices—The South African War Little Felt.

New York, Oct. 20.—R. G. Dun & Co.'s weekly review of trade tomorrow will say—

In most lines business continues to expand, though in some there are signs that buying has been checked, either because prices have risen, or because buyers are heavy, that nobody is left in need. Prices are still advancing in almost every line supported by rising prices of materials, and works everywhere are still crowded to their utmost capacity, while at many points it is found hard to get enough competent hands. The outbreak of war in South Africa has brought no such changes as many feared.

Wheat has declined 1½ in price in spite of unfavorable crop reports, and western receipts do not keep up with the unprecedented movement of last year, having been but 23,454,000 bushels against 30,592,496 during three weeks of October last year, and Pacific exports 1,589,188 against 2,339,312 last year.

The upward movement of cotton, three-sixteenths for the week, has now come to depend largely upon a great speculation, for futures by the thousands are now holding back cotton to some extent, while important banking and trading interests are enlisted. The speculation is heavy, but might be much larger, even with the lowest estimate of yield, without exhausting the visible and mill supplies.

Wool has also enlisted a powerful speculative interest, and sales of 1,293,000 pounds for the week at the three cities markets represents about twice the consumption.

Sales of 50,000 tons of Bessemer pig iron and a reported demand for 100,000 tons in a large market at Pittsburgh have made quotations less intelligent than usual. Range prices at \$25 to \$26, and \$24.50 for this year at Pittsburgh are reported, with bid sales at \$30 to \$40 and sales of sheet bars at \$36 per ton. The western market is strong and the eastern not changed.

Shipments of boots and shoes from the east have been 106,419 cases for the week, against 91,432 last year, an increase of 17 per cent. But the business is unsettled by differences about prices, the manufacturers holding it as a price to demand about twice the increase in price which they asked a month or six weeks ago, while traders are very slow to pay so much advance. In consequence orders for the coming season are unusually small at present, though many of the works have enough business in hand to last for some time. In leather and recent advance causes much irregularity in transactions. At Chicago the market for hides has been very active and reported sales of 235,000 sides at five markets have filled up many tanneries for some time. For some time sales of country hides are slow, as buyers are not inclined to pay quotations asked.

Failures for the week have been 145 in the United States against 221 last year, and 20 in Canada against 24 last year.

New York, Oct. 20.—Bradstreet's report will say tomorrow—Canadian business and collections continue good. Montreal reports steady, dry goods records of satisfactory volume and bad debts low. Canned goods are still in price, although no large war orders are yet reported. Ocean freights are very high, being 25 per cent above those of a year ago. Toronto reports trade active and shipments large, but export business interfered with by high ocean freights, which are expected to divert business from the St. Lawrence. Canadian wool is being held with confidence. Business appears good in British Columbia, although retail trade is reported less active on the coast. Jobbers are busy on country orders. Bank clearings for the week aggregate \$27,924,000, a decrease of 22 per cent from the week before, but a gain of 2 per cent over this week a year ago. Business failures for the week number 20 as compared with 24 in this week a year ago.

MEMBERS OF THE UNIVERSITY SENATE IN CONSULTATION.

The Estate of the Late George E. Fenety Will Amount to a Hundred Thousand Dollars—Widow Left an Income—Children Get the Most of the Property.

FREDERICTON, Oct. 18.—J. D. Hagar, Judge McLeod and Judge Barker, members of the senate of the U. N. B., came up from St. John this evening and met the faculty of the U. N. B. in the education office and talked over the university trouble. Those who attended the meeting would give little information as to the result of the consultation but stated that they made several suggestions toward a settlement, and it is likely that a full meeting of the senate will be called in a few days to finally decide the matter. As it takes six clear days' notice for a meeting it looks as if the matter would hang fire for a while longer.

The will of the late Geo. E. Fenety has not yet been probated, but it is understood that the deceased by his last will and testament made in 1885 bequeathed all his real and personal estate to his widow and children. At her death the youngest child becoming of age, the principal from which this sum is derivable is to be divided among the children of the deceased.

For what was done now in this instance might be done on other streams in the province and the lumbering interests be affected.

The case did not reach the evidence-taking stage for a settlement was practically arrived at on proposal of the company's counsel. The arrangement proposed was for the company to become subject to the will of the lieutenant-governor in council, and to apply to the local legislature for its authority. Hon. Mr. White accepted this, subject to the approval of the lieutenant-governor, and the adjournment till Friday week was taken.

COURT NEWS.

At the regular monthly meeting of the Equity Court on Tuesday, Judge Barker delivered judgment in the following cases—

McGregor vs. Alexander. Judgment was for the plaintiff. In this case the plaintiff contended that the defendant had purchased certain timber lots in violation of an agreement. The judgment was that a decree be made declaring the defendant a trustee for the plaintiff of the lots and ordering him to make an assignment of them to the plaintiff. A decree was also made for an injunction restraining him from selling the property until the assignment is made. Messrs. Black, Rogers and Currie were counsel for the plaintiff, and Messrs. Currie and Lawlor for the defendant.

Judge Barker held that the plaintiffs instead of applying for a decree in equity, should have proceeded at law by a proceeding in the nature of a quo warranto. A decree was also made for an injunction restraining him from selling the property until the assignment is made. Messrs. Black, Rogers and Currie were counsel for the plaintiff, and Messrs. Currie and Lawlor for the defendant.

A BLACK BRUTE BURNED.

TENNESSEE NEGRO CONFESSED HE HELPED BURN A FAMILY.

He Was at Once Tied to a Stake and Roasted to a Crisp—Citizens Are Now Searching for His Comrades, Who Will Be Similarly Treated When Caught.

Memphis, Tenn., Oct. 20.—A special to the Scimitar, from Canton, Missouri, says—

The little town of St. Anne, 20 miles east of Canton, in Leak county, was, last night, the scene of a terrible tragedy, a sequel to the burning of the Gambrel family the night before. Joe Lefore, who was captured by a posse, confessed that he, in company with other negroes, had tied Mrs. Gambrel and her four children to the floor of the house, saturated the surrounding grass with kerosene and burned the unfortunate people alive. The negro, after the confession of the crime, was promptly roped to a stake and burned to a crisp, while the citizens looked on in silence.

Another negro, Bob Smith, was saved just in the nick of time, as some doubt existed as to his guilt. The Gambrel tragedy occurred early Thursday morning, and it was first thought the fire was the result of an accident. A careful investigation revealed circumstances so suspicious that a more searching investigation was made, and it was soon established beyond doubt that the family had been murdered.

Posses were immediately formed to scour the country, and followed every possible clue. Before the posse left St. Anne it was discovered that Joe Lefore, a negro who lived in the neighborhood and who had heretofore borne a good reputation, had disappeared. Early last evening Lefore was captured several miles from the scene of the murder. At first the negro vigorously denied any knowledge of the crime, but he finally broke down completely and confessed that he and Bob and Andrew Smith, two other negroes, were guilty. He hoped for no mercy and told with a frank frankness all the details of the crime, and stated where the Gambrel residence had stood before he was tied to a stake and burned alive. No one sent a merciful bullet into his body to end his suffering.

Andrew Smith escaped from the mob, while Lefore was being burned and has not yet been captured. Bob Smith was finally released as there was a possibility of his proving his innocence. Andrew Smith will be recaptured and if it is proved that he and his brother Bob are guilty, it is thought that no power can save them from death at the stake.
