# THE NEWS RECORD

KITCHENER, ONTARIO THURSDAY, MAY 8, 1919.

PROBS.  
FRIDAY: Quite cool and cloudy  
with rain.

10 PAGES, PRICE TWO CENTS

## ESCAPED MAN WAS CAPTURED

### THERE ARE FEW ONTARIO CITIES WHICH WILL NOT BUILD UNDER HOUSING ACT

Commissioner J. Ellis Explains the Housing Act to the Citizens Who Express Themselves as Favoring the Introduction of the Operation of the Act in This City. A Resolution to Submit it to the People is Carried.

#### DO WE WANT THE CITY TO GROW?

The Ontario Housing Act last evening was explained to a big meeting of ratepayers in the city hall by Mr. J. A. Ellis of the Ontario Railway and Municipal Board. The meeting, it was evident by the decision of the citizens present, favored the adoption of the housing act by the City Council. Some of the aldermen present, however, took the view that the matter should be left to the people to decide; several of these have opposed the housing scheme in Finance.

Mayor Gross presided over the meeting and introduced the matter under discussion, stating that the people were probably aware that the Council had deemed it best to have Mr. Ellis come here to explain the Act, so that the Council could come to a decision on the alternatives of building houses or leaving the question to the people. He then called on Mr. Ellis.

Mr. Ellis among other things said: "Mr. Mayor, ladies and gentlemen, I wish to state in the first place that I am not here to advocate you building under the housing Act of the Ontario Government but I came here on the request of your Council to explain the means whereby you could build and to tell you what you could and what you could not do. You no doubt are aware that the Dominion Government has set aside \$25,000,000 as a loan for housing purposes, which will be divided among the provinces according to population. Ontario's share will be \$8,500,000. At the inception of the movement one year ago the Ontario government decided to loan \$2,000,000 for the purpose. At that time the Government had no idea of the requirements or the scarcity of houses. So in December the Dominion Government decided to assist in the question and to implement the provincial government's loan by whatever amount was necessary. It is pretty certain now that more will be necessary than had at first been thought. I have visited quite a number of cities and towns in Ontario recently and many representatives from all parts of the province have visited us in Toronto and I have been able to secure a pretty good idea of the actual conditions in housing throughout the province. As to conditions here I have during my short stay come to the conclusion that while housing conditions may be a great deal worse in other parts of the province than here are the housing question concerns and has a bearing on you too. In Toronto there is the greatest shortage, 10,000. Two, three and even four families are living in houses built for one family only. And the situation is similar in other parts while perhaps not as acute as there."

"Now under the scheme proposed by the government it will be possible for one to borrow money at five per cent in order to build and he will get it cheaper than he otherwise could. There is nothing in it for the Government, the Dominion government has

paid five and a half per cent. So you see the more we loan the more we'd lose as far as the government is concerned."

Reasons for Legislation.

"Now as to the reasons for the government loan. Firstly there is the shortage of houses. Secondly there was the idea of giving employment to the unemployed who it was expected there might be after the close of the war. Thirdly an object was to try to improve the class of many houses. I don't think that this last object would apply to your city. You have splendid houses here and the Ontario Government would be satisfied if it could get all the houses to be built under the housing act in the province as good as your houses. In some other places, however, the conditions in the class of houses are not as favorable as they are here. In building houses several things are aimed at. There are the sanitary conditions and the surroundings among others. From what I have seen here you have all the sanitary conditions and everything that makes for the comfort of the homes. Your streets are laid out well. So surely I have nothing to suggest to you in this line even if you should lay out streets in the unbuild-up sections of your city. You can surely meet our requirements in all respects. I like the way your streets are laid out, the shade trees, the strip of lawn between them and the sidewalk. My own idea is that it should be this way all over the province."

"In view of this, which should Kitcheners be interested at all? There is one point of view which you should consider, in fact the only point of view. Municipalities all over the province are taking up the question and are going to build houses under the Housing Act. Supposing they didn't do this, what would the result be? The industries in the province could not increase, for there would be no people in which to house the employees. Now other places are going to build on a large scale, not only to provide for the people that will move into the towns but also for those who are there now."

"Some one may say that he doesn't think it wise for the city to undertake the proposition because we don't know the conditions in five, six or ten years hence, the cost of a house might come down in that time and we'd lose money. The conditions then we cannot

labor witnesses were enthusiastic about the Whitley scheme. "I am grievously disappointed in it," said Mr. Mill. "It came into England with a flourish, but it does not grant more than labor has obtained by its own strength."

J. J. McGrath, representative of the plumbers, also had not much faith in the Whitley plan that it would relieve local cause of unrest. The discontent among the working class was due to increased education and thinking.

The mayor of the city, proprietor of a department store, commented on the fact that every witness was asked what they thought of the Whitley scheme. "It looks as if this scheme is under special consideration by commission."

"We are merely enquiring," said Mr. Tom Moore. "It does not necessarily mean that we approve of the plan, or that we are going to recommend it in Canada."

Mayor McMillan himself was not quite enthusiastic about the plan, although he had no particular objection to it.

### MISS WEINKE GETS TORONTO POSITION

PAIRED BY WOMAN MEMBER OF BOARD

TORONTO, May 8.—Miss E. Weinke, whose relatives live in a German settlement near Pembroke, has at last been appointed by the Toronto Board of Education as an assistant in the Kindergarten department of Hester Howe school. The Board's alarm over her German sounding name has vanished. At the meeting of the board, Dr. Caroline Brown, a leading woman member of the board, vigorously took the up of the case of Miss Weinke. She is a natural-born Canadian. Dr. Caroline Brown stated: "Two brothers, one of them having won a D.C.M., have served gallantly overseas."

forces but there is this point which we should remember. The cost of the construction of a house depends upon the price of labor to a large extent. Eighty per cent. of the cost of a house is labor. When I make that statement I include everything, for example the price of lumber, the cost of transportation of the lumber besides the cutting of it, the wages of the engineer on the train which brings the lumber from the camps, and so forth with everything else. So that unless the price of labor does not come down. And this much is certain, that the price of labor will not come down for some years. That at least is my conclusion.

About Private Capital Building.

"Some one may ask, why not have private capital build the houses? Well, perhaps it would be better. But I am certain it won't in other places when they would have to pay seven per cent. for their money and would not be certain of making seven per cent. on their investment."

"Up to Tuesday noon when I left Toronto forty-five municipalities, including eight villages, two townships and thirty-four cities had decided to build houses. Among them were London, Ottawa, St. Mary's, Sarnia, Fort William, St. Catharines, Niagara Falls, Galt, Guelph and others. Five weeks ago there were only thirteen. There will be many more although I am not anxious to get more for I have as much as I can handle now. Stratford wants to build now. The idea is to change their minds, so have Woodstock. So that in a month's time I don't think there will be more than two cities in Ontario that will not build. Toronto, while not under the housing act, is going to build, they will borrow their own money. Incidentally they will have to charge their own people more for the housing money. But still they will be with the housing movement."

What Can Be Done By The City?

"What can be done by the city? That is entirely up to the city council to decide. The Council can do this, they can pass a bylaw appointing a housing commission, consisting of the head of the Council and two or four other members, not Council members. They can then proceed and make laws in various ways. Firstly, any man who owns a lot, which is free, by deeding it over to the housing commission, can secure a loan of sufficient money to build a house upon it. Under present conditions he could not borrow money at five per cent anywhere else and secure a loan on the house for the full value. Sixty to seventy per cent. is the limit."

Could Loan to a Housing Company.

Another way would be for the housing commission to make loans to a housing company. Provision for this is made in the Housing Act. (Continued on Page 2.)

### HIGHLANDERS DUE IN TORONTO FRIDAY

MONTREAL, May 8.—The two troop trains carrying the Fifteenth Highland Battalion are due to reach Montreal, between 7.30 tonight and one o'clock tomorrow morning, according to the announcement made from the C.N.R. headquarters, who are hauling the trains from Halifax here, when the C.P.R. will take them over. The Kilts cannot arrive in Toronto until some time Friday afternoon as the first train is running five hours ahead of the second section. The first train with 28 officers and 333 other ranks is expected to reach Montreal about 7.30 tonight, but the second train with 26 officers and 338 other ranks, five hours behind the first section, is due about one o'clock, Friday morning. There is little chance of it cutting down the time.

The first train will be held here, or its speed schedule cut down between here and Toronto to permit the second train to catch up and it is expected they will run an hour behind each other west of Montreal. It is an eleven hour run from Toronto to here, so it is not likely that the trains will reach Toronto until mid afternoon Friday.

Again Delighted An Audience.

On the occasion of the second performance of the Laf Lot players, in the last of Limerick Town at the Roma last evening, the portrayal again was commensurable. As predicted the first program's weaker spots were smoothed out and where it was possible to make an improvement this was done. The appreciation of the audience again was repeated and noticeable from beginning to end. A large house again was present.

The members of the Laf Lot Club are to be congratulated.

Vance A. Statia of the Dufferin Post Orangewood, has sold the paper to his opposition the Orangewood Banner and the Orangewood Sun, the papers uniting in putting up the funds. The Post was first published 46 years ago.

Thefts of auto batteries and coils have been very common in Winnipeg. Police blame children for them as they say the youngsters have a "wireless" craze.

### COPY OF TREATY SENT FORWARD

PARIS, May 8.—A copy of the treaty is well on its way to Berlin. German Courier left at 9 o'clock last night bearing it, with Count Von Brockdorff Rantzau's first report on negotiations.

### LLOYD GEORGE CHEERED BY CROWD

LONDON, May 8.—After the conference at Versailles yesterday, Wm. M. Hughes, Premier of Australia, said, according to a Reuters despatch to conference, "While Premier Clemenceau spoke standing, the German spokesman did not rise while making his address. This has been a day of humiliation for the Germans which we could see had entered into their souls." W. Massey, Premier of New Zealand, said, "The Germans were more aggressive than anything I have ever met. After conference, despatch says, the fact that members of the council of four did not appear made the crowd anxious, but it transpired that they were holding a meeting and shortly after 4.30 o'clock they departed. M. Clemenceau's appearance was the signal for the first great wave of cheering of the day. Premier Orlando also received an ovation, but Premier Lloyd George, said to leave, was given a more generous reception from the throng. President Wilson smilingly saluted the crowd as he went to his automobile. During the meeting Marshal Foch sat as though not heeding the proceedings. Nursing his chin in his hand, he never looked toward the German delegates, his gaze apparently travelling through great windows of the beautiful country beyond.

Consensus of official gossip, public opinion and press comment in the United States is that although the terms of peace proposed to Germany are drastic and humiliating, they are not more so than situation demands. It seems to be conceded on all sides that President Wilson has won one of his great arguments, by having the league of nations agreement included in the treaty. Various opinions are expressed as to whether the Germans will sign the treaty or strike for big modifications but it is generally supposed that there is nothing to do but to sign.

### COUNCIL OF FOUR

ARRANGING TO MEET AUSTRIA, HUNGARY AND BULGARIA.

PARIS, May 8.—The Council of Four, with Premier Orlando of Italy present, began today to arrange the program for presentation of the peace terms to the Austrians, Hungarians and Bulgarians delegates.

### AMERICAN PLANES BEGIN OVERSEAS

PARIS, May 8.—The first trans Atlantic flight was begun in three N.C. (Navy Curtiss) hydroplanes, which left the Government's air station at Rockaway beach, at ten a.m. today, on the first leg of their journey from Rockaway to Halifax, a distance of 540 miles.

The N.C.-3, with commander John H. Towers, chief of expedition, was the first plane to take air. The N.C.-1, with Lieutenant-Commander H. N. L. Belling, and the N.C.-4 with Lieutenant-Commander W. C. Read, as command officer, were close behind.

The planes were escorted to sea by scoutplanes. Proceeding in a generally northeasterly direction, the trio of hydroplanes should be in Halifax, reaching Halifax before midnight. The route runs 400 miles to Trapani; 1,350 miles to the Azores, another 300 miles to Portugal and on to Plymouth, England.

### WIRE NEWS IN BRIEF

From Many Quarters

WILL SOON BE SETTLED.

TORONTO, May 8.—Prospects of an early resumption of work in the local packing houses resulted this morning in more transactions at the union stock yards, but receipts were generally light and trading not indicative of any particular trend in prices.

This summer is likely to witness an extension of the Hydro-Electric system in Kent County to Cedar Springs.

### FRANK McCULLOUGH CONDEMNED MAN

Caught in Toronto

HAD BEEN HIDING IN BATHURST ST. HOUSE.

(Special To The Record.)

TORONTO, May 8.—Frank McCullough, the condemned murderer who escaped from Toronto jail 3 weeks ago, was captured today at the house 78 Bathurst St., after an exciting encounter.

A party of city detectives and constables surrounded the house in which McCullough was known to be. When it became known to McCullough that an attempt was to be made to take him, he jumped out of a window. As soon as he leaped, Detective Cronin covered him with his revolver and when McCullough reached the ground, the revolver of two other detectives were levelled at him.

Observing that escape was hopeless, McCullough threw up his hands, declaring he had no weapons on him and calmly allowed himself to be handcuffed, after which he was taken to the police station and returned to Toronto jail.

DATE OF HIS EXECUTION POSTPONED.

TORONTO, May 8.—Frank McCullough, the condemned murderer, who escaped from Toronto jail, some weeks ago was captured this morning in a cellar of a house in the lower section of the city.

In the meantime the date for the execution of the sentence had been extended till June 13th.

TORONTO, May 8.—Frank McCullough, the murderer who escaped from Toronto jail on April 15, while awaiting death sentence for killing Detective Williams was captured this morning at 10.45 by Detective Cronin, Cronin, Tuft, Silverthorne, and Armstrong at 78 Bathurst Street. The story of how the detectives captured McCullough is a story of a chase which began at 10.45 by Detective Cronin, Cronin, Tuft, Silverthorne, and Armstrong at 78 Bathurst Street. ### The New City Plan With Ex- ceptions Will Be Approved Of

Widening of Duke Street Will Not Be Ratified, And Other Proposals To Which Objection Was Taken Will Be Considered, Municipal Board Intimates Its Decision

The new city plan of the City Planning Commission, excepting the widening of Duke street and perhaps several other proposed street connections or extensions will probably be approved by the Ontario Municipal and Railways Board. After hearing the arguments yesterday in the City Council Chamber Chairman McIntyre of the Board intimated that this would be done.

Just before the close of the sitting the Chairman of the Board remarked: "I might say that regarding this Board would state now that it will probably approve of the plan in so far as those proposals to which no objection has been taken are concerned. Those proposals to which objection has been expressed will be considered. And as regards the widening of Duke street, the Board, I might state, has pretty well decided that they will not approve of this. We do not think that it is necessary. The business section of your city is served by two main streets, King and Queen, and like in Toronto, they will continue to be the main business streets and there will branch off from them less important streets."

There were quite a number of citizens present at the sitting which opened at about two fifteen o'clock and finished at about four thirty o'clock. Several of the residents of Duke street were present and voiced their disapproval of the proposed widening of Duke street and other proposals. In the majority of cases, however, there were no objections. It is interesting to note that no objection was voiced to the proposed extension of Duke street from Queen to Frederick. No reference to it was made by the Municipal Board.

Regarding the result of the approval of any proposal on the plan was gleaned from Chairman McIntyre's remarks when the proposal to extend Willow Street across King to Glasgow street was referred to. He said that extension would cut off part of Dr. Schnarr's house and would pass through his land. The doctor in answering the question by the chairman "Is there anybody else here who wishes to bring

from the spot where the Toronto newsboys tripped him on the night of the murder, which tripping resulted in his arrest. One hour after McCullough's arrest, detectives removed his belongings, in a suitcase, only personal effects and a few dollars in money. On the floor of the room was found a part of the saw with which McCullough is supposed to have sawed the bars of the jail cell the night of his escape. "Will you tell me please if that was really McCullough," asked Mrs. Kingsella. "What does your husband do," she was asked. "He is a driver of a coal wagon," the visitor replied. "For whom," was asked. "For the Conger Coal firm," was the reply. The room was rented to a young woman for herself and husband. McCullough arrived at the house the same evening. His face was covered with coal dust. McCullough apologized for his appearance and remarked that the coal handling was a nasty job. Mrs. Kingsella said the woman stayed four days with her husband, and never went out during that time. Then she left and was not seen again.

McCullough never left his room in day time, but went out almost every night, for about two hours, for a walk. During day time he read almost incessantly. He appeared to show little interest, Mrs. Kingsella stated. When arrested this morning, there was found in his room yesterday evening papers containing the account of the trial of Vera Lavelle for aiding him in his escape from jail.

McCullough was captured this morning at 10.45 by Detective Cronin, Cronin, Tuft, Silverthorne, and Armstrong at 78 Bathurst Street.
