D. Wilson, of Mapleton, Cumberland, has harvested this season 6,000 heads of cabbage. His success in raising this toothsome vegetable is simply phenomenal. When the average gardener's plants succumb to fly and grub, Mr. Wilson's genius devises an exterminator. He manufactures in the winter a score of barrels of sawdust for market.

St. John's Church, Wolfville.—Service next Sunday, Nov. 15th, in St. John's church, at 3 p. m. The following four questions will be considered in the sermon: (1) Why do some people in Wolfville and the surrounding neighborhood never or seldom enter a place of worship? (2) With what reason or reasons do the majority of church-goers go to church? (3) What should be the chief purpose of frequenting God's house of prayer? (4) How does the Church of England help people to carry out that chief purpose?

The bridge crossing the brook at the lower gate of Willow Bank Cemetery has been in a very bad condition for some weeks back. During the recent heavy rains there was not enough room to permit all the water coming down the brook to pass under it, and it overflowed and caused a large and dangerous wash-out. We do not know whose duty it is to look after the matter, but are convinced that a small outlay now would prevent a much larger one by-and-by, besides providing a great convenience. We hope to see repairs made at once.

Rev. Mr. Cocking, returned missionary from Japan, gave a second lecture on that interesting country in the Methodist church on Wednesday evening. The church was well filled by an attentive audience and the entertainment was a most pleasant and profitable one. The lecturer illustrated his remarks with stereoscopic view of the country, prepared by native artists; which were thrown on the canvas by a powerful light. Those who attended no doubt received much valuable information concerning the wonderful country. At the close of the lecture the audience were permitted to inspect a great quantity of art work, which for a small sum they were allowed to carry away.

**What to do in Case of a Fire.**

The citizens have a well equipped fire company. It is needful that a few hints should be given the public as to what should be done in event of a fire.

1. Go as quickly as possible to the fire building.

2. Ring the fire-bell till the firemen come.

By all means lose no time in giving the alarm. To delay five minutes may give the fire such a start as may destroy your building and perhaps result in great loss. The college buildings and the large stores and hotels of the town would make a terrible fire to cope with should any delay occur in giving the alarm.

3. Lose no time in sounding the alarm.

Next, you may ask, "How is the alarm to be sounded?"

On the door of the fire-house is a box with a glass front. Inside is a key hanging. Break the glass, use the key to open the door. Just within the front room the bell-ropes hang.

Ring the bell till the firemen come.

**NOTICE TO FIREMEN.**

The firemen's monthly meeting is to be held on the first Friday of each month. The bell is to be tolled nine times, 15 minutes before the time of meeting. The nine strokes of the bell are sounded in this way, three quick strokes and a pause, another three and a pause, again three. The public are advised to note the difference between tolling and ringing. When tolled, that is slow strokes sounded, it is for the purpose of calling the firemen for practice or meetings; when the bell rings it means FIRE.
