

190092

on an old fence in Bulley Marsh which
proves the work to be correct

On the other line running parallel
to this we found one blazed tree at Scott's
Cove exactly on our line

All the lines were run through
the very wooded land except the lines
on the different shores at high water mark.

I put in posts as directed which
were squared and marked I.R. and sur-
rounded with a board of stones. ex-
cept a few where stones could not be
procured without a good deal of trouble
and expense, these were made of earth and
sods

The boards near the shore I
placed some distance back so that
during a severe storm the sea would not
carry them away

The lines are all well blazed and
marked as directed

Yours truly
Albert McKean
