

# ENTERPRIS

## HANDSOME DIVIDEND.

from a gentleman competent  
 e known well and favorably for  
 y of Typewriters. He has conducted  
 7 for over ten years, and enters into  
 manufacture the Burns' Typewriter  
 1 the undertaking.

LOR, Business Manager, Globy

perience in the typewriter business  
 y do you not organize a company for  
 My reply has been that I looked  
 tive duty of 27½ per cent. would give  
 achine manufactured here, provided  
 e leading typewriters now on the mar  
 ore my mind I have watched carefull  
 market, but not until an examinati  
 e placed before the American publi  
 hine had arrived to control the Can  
 he leading typewriters in the foreign

thorough investigation, and have al  
 t has incorporated in its constructio  
 er machine, and is superior to any  
 he outlook is so favorable and my  
 have determined to enter activ  
 capital stock of \$200,000 for the  
 pany will control all territory out  
 his confidence in the future of his

cent. on a capital stock of \$200,000. It is proposed to call in the stock  
 call on formation of company, 15 per cent.,  
 call two months, 15 per cent.,  
 of stock to be called as required by the Directors. If the sales do not  
 2,500 per annum it will not be necessary to call in more than half the  
 and the dividend will, therefore, be proportionately greater.  
 persons having stock in companies paying dividends of 6 to 10 per cent.—  
 red good in these days of cheap money,—the figures above recited look  
 ble, but when you consider that the firm of Wyckoff, Seamans & Benedict, look  
 turers of the Remington Typewriter are credited with making \$5,000,000  
 st ten years, it is not so surprising. In July last Mr. W. O. Wyckoff,  
 or member of the firm died, and his will is said to have been the largest  
 ated in Syracuse. The following figures shew how rapidly the business  
 Remington Typewriter has increased, taking the first ten years of which I

proximate sales for ten years from April, 1883.

our calculations we have made no allowance for profits from the sales of  
 are perpetual and very profitable.  
 you have had any experience in placing goods on the British market you  
 are what a time it takes owing to the conservatism of the people. The  
 of educating these people to the use of typewriters has been borne by  
 ding manufacturers who have worked hard for many years. This important  
 now open and promises an extensive trade. Germany and France offer  
 possibilities, and the trade to be done in other countries is encouraging.  
 American Company has spent five years and a large sum of money experi  
 ing and perfecting the "Burns" Typewriter. The tools are just about  
 ted and the machine will be put on the market within a very short time.  
 rpany will be saved this loss of time and money and will only have to  
 te the tools and patterns of the American Company. I can confidently  
 e that within six months, probably much less, from the formation of the  
 n Company we will have the machine on the market. No time will be  
 ting our agencies at work. I have already had applications for agencies  
 me of the best representatives of the old Companies. The retail price  
 fixed at \$100 for Canada and Great Britain, will give agents a very hand  
 profit, and will undoubtedly result in the very speedy and thorough intro  
 of the machine.  
 e shares will be \$100 each. I am desirous of having the stock distributed  
 e entire Dominion, so that the whole may be interested in this national  
 ise.

Stock Books will be opened at my office, 77 Adelaide Street East,  
 at 10 o'clock a.m., December 30, 1895  
 Yours very truly,  
**GEORGE BENGOUGH.**
