

NOTES AND COMMENTS.

Some of the names not historically English, such as "Resona" and "Cesar," are considered tolerable by the British critic.

Once more the season of accidents—though all seasons have them—is upon us. Summer is peculiarly the time when chance and fortune hold high carnival and mankind seem to be their sport.

Can many of these accidents be avoided, or are we such creatures of fate that we must accept them stoically? "On two days," says the Turkish proverb, "it avails not to flee from death."

Unusual situations and surroundings demand attention. If the farmer comes to the city he cannot walk along the streets as though they were country roads.

DINING IN PALESTINE.

Knives and Forks Being Known, the Fingers Do Valiant Duty. A very large circular tray of tinned copper, placed on a coarse wooden stool about a foot high, served as a table.

As soon as any one had finished, he rose and went into another room, to have water poured over his hands to wash them, and the vacant place at the table was instantly filled by a new comer.

Consolation.

Yes, sighed the Hamcock, regretfully, it was my fault that those sweet young people fell out.

In a French Restaurant.

Jones.—Oh—er—garnish, regarder cece—er—apporter-vois le—la.

Possibly.

However we may land the wise, And think that their condition's best, We must admit, if we are wise, The ignorant are the happiest.

PRACTICAL FARMING.

For Rolling Barbed Wire.

The illustration represents a very simple and convenient method for taking up and winding barbed wire. It is made simply by driving two forked sticks into the ground, so that the forks will be three feet

above the surface. In these forks lay the 23 feet in diameter and on one end of the stick fasten a cultivator wheel. Attach the wire to the stick, and by simply turning the wheel it can be secured in a compact roll.

Care of the Flocks in Fall.

In the average year, April, August, and November are trying months upon the flocks, because they are too generally expected to get their sustenance entirely from the fields, and the fields do not supply sufficient.

There are many farms that are not supporting as much stock as they might, because they are pastured too closely in unfavorable seasons. A little thought will disclose on almost every farm ways in which the flocks may be shifted to their own advantage and for the benefit of the pastures.

BRUTAL MURDER.

A Young Girl Murdered by an Impotent Her—He Attempted to Commit Suicide. A despatch from Watertown, N. Y., says:—One of the most shocking and cold-blooded murders that ever disgraced North

The trained eye can always tell when the pastures are being eaten too closely before the flocks have suffered greatly. The fact—and it is a fact—that sheep like short grass best has been alluded to so often that it hardly needs to be repeated.

Another source of food that may be drawn upon to supplement the pastures is the growing corn crop. We plant considerable sweet corn for food at just this time. It is better than the field varieties for fall feeding, because eaten with less waste, and will produce more milk.

Boy Killed on the Track.

A despatch from London, Oct. says:—About 8 o'clock on Tuesday night Fred Wharton, son of Mr. Edward W. Wharton, 603 Colborne street, was struck by a train at the Colborne street crossing of the Grand Trunk Railway, and almost instantly killed.

A GREAT ACTOR HONORED.

HENRY IRVING'S KNIGHTHOOD WILL RAISE THE PROFESSION.

He has a new distinction with which to boast—his knighthood. About the Home Life and Surroundings of the Celebrated Man and Famous Artist.

Henry Irving, the first English actor, has entered the lists as a knight. The modern ceremony is very simple compared with the old days. The fortunate knight to be is presented at court in the regulation court costume; he kneels before Queen Victoria, who places a drawn sword, usually the sword of state, upon either of his shoulders and then says, "Rise," exclaiming by his Christian name with "Sir" before it.

CROWDED LONDON.

Figures Gathered by Gen. Booth of the Salvation Army. Mr. Booth has checked his former measurement of London poverty. He had previously inquired how the people lived and worked by one method. Now he tries another, and compares the results. He has divided London into about ninety trades, or groups of trades and he has also classified the whole population by the number of rooms they occupy and the number of servants they keep.

Some districts, as Mr. Booth puts it, are more crowded than they are poor, while others are more poor than they are crowded. But the common measure of London wealth and poverty is as close as we could expect to get. Mr. Booth finds that four-fifths (80 per cent.) live as families without servants, 11 per cent. only have servants, 5 per cent. are servants and the remainder are inmates of institutions.

There are many farms that are not supporting as much stock as they might, because they are pastured too closely in unfavorable seasons. A little thought will disclose on almost every farm ways in which the flocks may be shifted to their own advantage and for the benefit of the pastures.

Wonders of Science.

Platinum wires made white-hot by electric currents? A new use as saws for felling trees.

Benjamin Richardson, a noted English physician, thinks that the normal period of human life is about 110 years, and that seven out of ten average people ought to live that long if they take proper care of themselves.

A German chemist has found a way of preserving the colors of dried flowers, even of delicate poppies. Flowers lose their tints in drying through ammonia in the air.

The French industry of ironing milk is an original departure in tinned commodities. The milk is frozen and placed in block forms in tins, and on the top of the purchaser requires to be melted previous to use.

Ordinary water, especially in reservoirs and filtering basins. The preparation is composed of calcium permanganate, 1 part; aluminum sulphate, 10 parts; fine clay, 20 parts.

Good washing fluids are aids in the laundry work. There can be no doubt that the all-night soak greatly lessens the labor of rubbing.

Children Cry for

Pitcher's Castoria.

Good washing fluids are aids in the laundry work. There can be no doubt that the all-night soak greatly lessens the labor of rubbing.

THE DEAD WIFE.

Mother's Vacation.

The hour set for the funeral had come. The hearse, with its black plumes, stood at the farm house door. It seemed a strange and foreign thing among the bright-colored hollyhocks, the commonplace sunshine, the loving of cows in the barnyard, and the chickens that moved about upon the green lawn before the house.

Mrs. Garret who had just died, was a "home body" and saw but little of her neighbors, but her husband had grown well-to-do by great industry and close saving, and had pushed his children on in the world.

John, his only son, had been to college and the girls to boarding-school, and they were so improved that they seemed to belong to quite another class from their mother.

There was a certain silent resentment under his grief that she was dead. How was he to do without her? She was a master hand at cooking, butter-making, laundry work and sewing. He had never thought to ask her if she needed help. She had never complained, and to complete her work she had risen at four and had gone to bed late at night. Things always ran smoothly. She never spoke of being ill. It struck him when she took this cold and sank under it in two days. The doctor said that all her strength was gone. "Sarah had the strength of ten women," the husband said. "Where had it go?"

Her daughter sobbed vehemently. Mother had always been so tender! She did so much for them! The old did not, it is true, feel well acquainted with her since they had grown up. But between their music and their studies, and their young companions, and other social occupations, they had not been filled! They smoothed the folds of her merino gown, a little ashamed that the neighbors should see that she had no silk dress. She had insisted that each of them should have silk gowns, and had helped to make them. Jack, the son, like his father, was shocked to see how tired and worn his mother looked. He had talked for a year or two of taking her for a week to New York. She had never seen a great city. But he always had some engagement. He remembered now that she had made enough in the dairy to keep him in spending money at college. He wished he had contrived that little holiday for her! They all felt now how good and unselfish she had been, and how dear to them.

When they were sick, we gave her Castoria. When she was a child, she cried for Castoria. When she became ill, she clung to Castoria. When she had children, she gave them Castoria.

When they were sick, we gave her Castoria. When she was a child, she cried for Castoria. When she became ill, she clung to Castoria. When she had children, she gave them Castoria.

HOUSEHOLD.

Home-Made Candy.

Lemon Drops.—One pound granulated sugar and one-half cupful of lemon juice. Boil all together without stirring until brittle when dropped in cold water. Fill a shallow pan with powdered sugar; make small dents in the sugar with a thimble. When the syrup is done pour it in the holes and set in a cool place to harden. When hard they can be easily removed.

Maple Sugar Candy.—Take a two-pound cake of maple sugar and put on just enough water to melt it. Do not stir until the sugar is all melted. Let boil until it becomes in water to test; then stir in a few butternut meats. Pour in buttered pans to harden.

Peppermint Drops.—Two cupfuls granulated sugar, one-half a cupful of water. Boil five minutes. Flavor with a few drops of the essence of peppermint. Stir until thick; then drop on buttered paper to dry. Watergreen drops are made in the same way, only substituting watergreen for peppermint.

Caramel Candy.—Three pounds of sugar, one-fourth of a pound of butter, one pint of cream, one pound of Baker's chocolate, grated. Boil the cream, sugar and butter together for ten minutes; then stir in the chocolate. Let it boil until when you drop some in cold water it hardens quickly. As soon as cool enough cut in sticks.

Fried Liver and Bacon.—Wash the liver quickly in cold water, drying it with a meat cloth. Take each slice, sprinkle with salt and pepper on each side, and dredge it with a little flour. Have the frying pan hot and fry lightly the slices of bacon both sides. Take them out on the hot platter and put in the slices of liver and fry them in the hot gravy, turning them several times. When well done put the liver in the center of the platter and arrange the slices of bacon around the edge. Add a little boiling water to the gravy; thicken it with a little flour stirred up in some cold water. Let it boil up well, and then pour it over the dish.

Cheese Scallop.—Soak one cup of dry breadcrumbs in fresh milk. Beat into this three eggs; add one tablespoonful of butter and one-half pound of grated cheese; stir upon the top of breadcrumbs, and bake in the oven a delicate brown. An excellent relish when eaten with thin slices of bread and butter.

Collin Balls.—Take four cups of mashed potatoes, three cups of boiled codfish minced fine, add butter to mix well together, then add two well-beaten eggs, beating it up again thoroughly; drop by spoonfuls into hot lard and fry the same as doughnuts. Are nice fried in croquette baskets.

It should be immortal who liveth till he be stoned by us without fault.—Fuller.

WOOD'S GREAT PEPPERMINT CURE FOR COUGHS, COLDS, BRONCHITIS, WHOOPING COUGH, AND ALL AFFECTIONS OF THE THROAT AND LUNGS.

CURE THAT'S THE BEST COUGH WITH SHILOH'S CURE. It is sold on a guarantee by all druggists. 25 cents, 50 cents, and \$1.00 bottles. One-cent a dose. Sold by A. T. Elliott, Beaverton.

Binder Twine - 1895. The subscriber begs to announce that he has accepted the agency of the Farmers' Binder Twine Co., of Beaverton, and is prepared to receive orders for their celebrated twine. It will be plain to all that it is the best in terms of every Canadian farmer to support this company which has contributed so largely towards lowering the price of twine, and which the combine are endeavoring so strenuously to overthrow. It is particularly so in this advantage when by doing so they get the best of twine for the least money. To those ordering early we offer this inducement, that should twice advance in price they will not pay extra, while a full rebate of any twine will be allowed each purchaser. PRICES—FREIGHT FREIGHT. Red Star (Recommended) 7 1/2 cts. per lb. Blue Star (Same) 7 cts. per lb. Twine payable Oct. 1st, 1895. A discount of 5 cts. per lb. for cash on delivery. JOHN B. WARREN, Lot 4 Concession 1, Mara.

PUMPS! PUMPS! THOS. HODGSON, Beaverton Pump Factory. Farmers of Thoral, Eldon, Mara and Brock consult your interests by comparing our Pumps with those of other makers. Their superiority is unquestionable.

FORCE, OR COMMON PUMPS, PERFECT SATISFACTION GUARANTEED. I place no pump without thoroughly testing its working capacity and guarantee it to do all claim for it with reasonable care. BRASS AND IRON CYLINDERS. Galvanized Piping also supplied when ordered. THOS. HODGSON, Beaverton Pump Factory, Beaverton March 29th, 94.

DR. SIMPSON'S "ADROIT" (PEPPERY) PILLS. "Better than a pound of cure" for weakness and indigestion. Obtainable at drug stores, or by mail, one box 25 cents. Circulars free. Wm. W. Simpson Company, Toronto. For sale by W. Williams & Co., Beaverton.
