

A Remarkable Invention FOR THE CULTURE OF HAIR.

THE EVANS VACUUM CAP is a practical invention constructed on scientific and hygienic principles, by the simple means of which a free and normal circulation is restored throughout the scalp. The minute blood vessels are gently stimulated to activity, thus allowing the food supply which can only be derived from the blood, to be carried to the hair roots, the effects of which are quickly seen in a healthy, vigorous growth of hair. There is no rubbing, and as no drugs or chemicals of whatsoever kind are employed, there is nothing to cause irritation. It is only necessary to wear the Cap three or four minutes daily.

60 DAYS' FREE TRIAL! The Company's Guarantee.

AN EVANS VACUUM CAP will be sent you for sixty days' free trial. If you do not see a gradual development of a new growth of hair, you are at liberty to return the Cap, with no expense whatever to yourself. It is requested, as an evidence of good faith, that the price of the Cap be deposited with the Chancery Lane Safe Deposit Company of London, the largest financial and business institution of the kind in the world, who will issue a receipt guaranteeing that the money will be returned in full, on demand, without questions or comment, at any time during the trial period.

The eminent Dr. I. N. LOVE, in his address to the Medical Board on the subject of Alopecia (loss of hair) stated that if a means could be devised to bring nutrition to the hair follicles (hair roots), without resorting to any irritating process, the problem of hair growth would be solved. Later on, when the EVANS VACUUM CAP was submitted to him for inspection, he remarked that the Cap would fulfill and confirm in practice the observations he had previously made before the Medical Board.

Dr. W. MOORE, referring to the invention, says that the principle upon which the Evans Vacuum Cap is founded is absolutely correct and indisputable.

An illustrated and descriptive book of the Evans Vacuum Cap will be sent, post free, on application.

THE SECRETARY, EVANS VACUUM CAP CO., LTD., REGENT HOUSE, Regent St., London, Eng.

AYRSHIRES AND YORKSHIRES

We offer several young calves of either sex, of choice dairy breeding, a few young cows and heifers in calf. We are importing several head of both sexes from Scotland. Our John Retson has already selected 1st and 2nd winners of "The Derby," 1906, and 1st and 2nd in the Official Milk Record by Highland and Ayr Society, 1906. He is bringing out young stock of the same stamp and breeding, which will be for sale. Write us if you want something right at a reasonable price. Young boars fit for service. Young sows just bred. Feb. and April pigs for sale.

ALEX. HUME & CO., MENIE, ONT.
Long-distance 'phone (Campbellford).

Present offering: Lambs of either sex. For prices, etc., write to John Cousins & Sons Buena Vista Farm. o Harriston, Ont.

QUESTIONS AND ANSWERS. Miscellaneous.

CANADIAN CENSUS.

Could you inform me where I could get a correct statement of the last complete census of Canada, and its probable cost. C. N.

Ans.—Write Archibald Blue, Chief Census Officer, Ottawa, Ont.

VACCINE FOR BLACKLEG.

Can you give us any information re vaccinating calves to prevent being subject to "blackleg," as there were about 25 lost here by it last fall and winter, and where can we get the serum to vaccinate with? R. T.

Ans.—Vaccination is a reliable preventive of blackleg in cattle. The Department of Agriculture, Ottawa, has arrangements with the Pasteur Vaccine Company, of Chicago, whereby blackleg vaccine is supplied direct to owners or veterinary surgeons at 10c. per dose, in lots of not less than ten doses. Write Dr. J. G. Rutherford, Chief Veterinary Inspector, Department of Agriculture, Ottawa, for what you want.

FEET OVER HALTER-SHANK.

Three-year-old colt gets his front feet over his halter-shank. I tie him not more than two feet long, but still he will get his feet over.

A NEW SUBSCRIBER.

Ans.—Possibly the manger is lower than necessary. If so, raise it by adding a plank or scantling. Bore a hole in this near the top, and run the halter-shank through it, attaching securely to the end of a block of wood or iron, which, while not heavy enough to cause the colt inconvenience when lying down, will take up the slack when he is standing.

SALE OF UNSOUND COW.

In your April 18th issue we notice an answer to J. A. W. re sale of an unsound cow, in which it seems to be the opinion that B is not liable to A, the drover. Now, we know of a similar case, where the farmer made full refund to drover, and such seems to be the general custom in our locality.

1. Is the drover required, by law, to run all risk?
2. Would a guarantee of soundness from seller make a difference? Ontario.

Ans.—1. Each case must depend largely upon its own special circumstances. It is open to the drover in every case to protect himself by proper terms of agreement. In the one referred to, it did not appear that he had taken the necessary precaution.

2. Most assuredly, for then the purchaser would have a right to damages for breach of warranty in the event of the animal turning out to have been unsound at the date of the contract.

MAMMITIS.

What is mammitis? I have had two cows this winter that went wrong in one quarter soon after calving. The end of the teat became sore first, and it then seemed to work up in the udder, which swelled considerably. There still seems to be an obstruction in teat that hinders the milk from coming out freely, and seems to grow shut from one milking to another. READER.

Ans.—Mammitis, also known as garget, consists of inflammation of the mammary gland. It occurs in two forms: in one form being confined to the superficial structures of the gland—this is the mildest; and is sometimes caused by a companion cow stepping upon the udder or teat. In the other form, the interior of the gland is affected. Your case would appear to be the former, as in the latter, lameness and loss of appetite usually accompanies. Treatment, in either case, consists of a purgative of 1 lb. Epsom salts, followed by two-dram doses nitrate of potash, in feed, three times a day for three or four days. Poultice with hot bran or steamed hops, and apply carbol oil or camphorated oil to the teat twice a day. If milk cannot be drawn by hand, use a milk tube, being careful to disinfect it each time before using, and enter it gently so as to irritate as little as possible.

Zam-Buk "RUB IT IN."

Zam-Buk is compounded from pure herbal extracts, is highly antiseptic and applied to a wound or sore kills all bacilli and disease germs which otherwise set up festering, blood poison, etc. It heals cuts, burns, scalds, bruises; and cures eczema, prairie itch, salt rheum, poisoned wounds, ulcers, etc. All stores and druggists sell at 50c. per box, or post free from Zam-Buk Co., Toronto, for price. 6 boxes for \$2.50. Send 1c. stamp for trial box.

250,000,000 Sheep Every Year Dipped In
