Fence Friends

Every buyer of Peerless Fence becomes a friend of ours because Peerless fence saves him trouble, money and time. **PEERLESS Woven Wire Fence** is made of all No. 9 Steel Wire well galvanized. **PEERLESS FENCE** requires very few posts, and you save money on the net cost of your fence.

PEERLESS

The Fence That Saves Expense

One of the reasons why **PEERLESS Woven Wire Fence** is better than other fences is because of the **PEERLESS** lock. It holds securely and without damaging the wire, yet there is just enough elasticity to prevent snapping from sudden shocks, changes in temperature or from any other cause. Stock cannot get through it—under it or over it. There are so many advantages in buying **PEERLESS** Fence in preference to others that we have not room in this advertisement to tell you of them.

Your name on a postal brings you our new printed matter, containing much useful information in regard to fencing. Write for it today.

\$1500 to \$5000 a Year

has been made by hundreds of people operating the
"American" Drilling Machines
There is no business in the world where a few hundred dollars investment, combined with a little energy, will obtain a competency so surely or quickly as the operation of an "American" Well Machine. 40 years' experience and 59 regular styles and sizes make them the world's standard. Complete New Catalog **FREE**. The American Well Works Gen'l Office & Works, Aurora, Ill. First Nat. Bank Bldg., Chicago. R. H. Buchanan & Co. 234 W. Craig St., Montreal.

Strawberry Plants for Sale

From my strawberry beds at Leduc and Ohnville, Alta., for spring delivery. Prices, \$2.00 per hundred, add 40c. for mail orders; or \$15 per thousand and express charges.

JAMES CHECWIN, Leduc, Alta.

They passed a magnificent building during their travels. "That's a fine house," said Brown to Jones, "and yet I can not bear to look at it." "Why not?" asked Jones. "Why?" repeated Brown. "Because the owner built it out of blood, the aches, the groans of his fellow-men; out of the grief of children and the wails of women." "Great Scott!" exclaimed Jones; "the brute! What is he—a money-lender?" "Oh, no, dear friend; he is a dentist!"

Check Your Fat

Hold it where it is, or take off some. You can do either without disturbing your meals or your ease or your digestive organs. You can do it without physical risk, mental effort or danger of a wrinkle. "Sounds well, but these are words only," you say. True, but there is a nation full of indorsers of these words, so your protest, while natural, is feeble. Prove it. Write to the Marmola Company, Detroit, Mich., inclosing 75 cents, or, better still, take that amount over to your druggist and get one of the extra large cases of Marmola Prescription Tablets. You will find it generously filled. Take one after meals and at bedtime, and within thirty days you should be losing a pound of fat a day, without disturbance, as we said, of either your meals, habits or organs. Fact is, these statements are not to be denied, for the tablets are an exact duplicate of the famous fat-reducing Marmola Prescription: One-half ounce Marmola, 3-4 ounce Fluid Extract Cascara Aromatic and 4 3-4 ounces Peppermint Water, which any druggist will tell you is the World's Fair medal winner in its class.

or looked at sideways, not unlike a pair of doves. Their presence within the hood has provided the nicknames "Adam and Eve," and Noah's Ark." Thus the honey bags are carefully tucked away and protected.—Chicago Tribune.

Questions & Answers

FORMALIN TO KILL LICE ON CATTLE

How much water with formalin should I use to kill lice on cattle? I saw a recipe for it in the *ADVOCATE*.

Sask. L. M. A.

Ans.—One-half ounce of formalin to each quart of water may be used. Only half the body should be done at a time, the other half the next day. It may be necessary to repeat the application in a week. If the formaldehyde is bought, put about one dessert spoon full in two and one-half quarts of water.

MARES MILK BAD

I have a mare that has lost two colts. When foaled they are strong and healthy but soon get weak and die. The mare's milk is green. They tell me it is poisonous. Is it possible to raise the colt without its mother on cow's milk? Will you give description how to feed for the first couple of weeks?

Sask. F. M.

Ans.—We never before heard of a mare giving green milk, but we do often come across mares that are poor milkers, and others whose milk is considerably lacking in quality, so much so indeed that the milk is termed blue-milk. The treatment in such a case is to endeavor to feed the mare well on easily digested and nourishing food. With some mares it matters not how well they are fed, their milk will not improve. Such mares should not be bred from. The colts may be raised on cow's milk. Commence by adding two parts of warm water to one part of cow's milk; to this add a little sugar to sweeten. As the colt grows older less water and more milk should be given, until about the time the colt is eight weeks old, he will take the whole milk undiluted. To get the colt started take the finger of an old glove and fasten it to the spout of a tea pot. Make a hole in the end of the finger and he will soon learn to like it as well as a dug.

RECLAIMING HOMESTEAD

Would you please answer the following questions for me? A takes up a homestead, but he abandons it after a time, and B takes it up. If B does not do his homestead duties, can A cancel the homestead and get it back again?

Sask. A. D.

Ans.—There does not appear to be any reason in the homestead regulations why he should not. Of course, A should show good cause for abandoning in the first place.

SECURING TREES FOR PLANTING

I am a farmer on the prairie of Alberta, and want to make my farm as home-like as possible. I am located about 70 miles east of Penoka. The country is fairly dry, and the land is of a brown loam.

I am very anxious to set out some trees for shelter, and I understand that by complying with certain provisions, that you are given trees to plant free from the Forestry Department.

I am perfectly willing to do or make any provisions that are considered best for the welfare of the young trees, and would be pleased if you would give me the address of the Forestry Branch and tell me what I am supposed to do in order to procure the trees free. I intend getting the land in suitable condition this year, and would like to plant the trees next spring, if possible.

Alta. F. A. McM.

Applications for trees must be made to the Tree Planting Division, Indian Head. In March the applications that have been received since the previous February are gone over and the routes of inspectors are arranged, so that

Needed on Every Farm

How a Reliable Engine Economizes Labor

Of course, you, like other farmers, want to economize your time.

Think in how many places a power would be a help to you—would save time and work—if you had it in a handy form ready for use in a minute.

Think how much hard work it would save you in cutting feed—in sawing wood, posts or poles—in running the cream separator or churn—in operating shop or other machinery.

The I. H. C. gasoline engine is a power that is always ready at your hand. It is not necessarily stationary, like the windmill, and on that account adapted to doing only one kind of work.

The engine is built in many styles—there are portable engines on trucks and skidded engines which can be moved wherever the work is to be done. Then there are stationary engines, both vertical and horizontal, in sizes from 1 to 25-horse-power, air cooled and water cooled, and also gasoline traction engines 12, 15 and 20-horse-power. Besides, there are special sawing, spraying and pumping outfits from which you can select an outfit.

The engines are simple in design so that they can be easily understood.

They are strong and durable—constructed with a large factor of safety, inasmuch as they have greater strength than would ordinarily be required. Yet they are not clumsy or too heavy.

All parts are accessible and easily removed and reassembled. Every engine will develop a large per cent of power in excess of its rating—you get more power than you pay for.

They are absolutely reliable—you cannot find one inefficient detail. They are unusually economical in fuel consumption—less than a pint of gasoline per horse-power per hour. This means that a 2-horse power engine will produce full 2-horse power for five hours on only one gallon of gasoline.

Would it not be a wise plan for you to investigate and learn how an I. H. C. engine will save time and lighten the labor on your farm?

International local agents will supply you with catalogs. Call on them for particulars, or write the home office.

IF YOU WANT A BIG SALARY YOU OWE IT TO YOURSELF TO WRITE US A LETTER OR A POSTAL

Don't you often wish you had a good position and a big salary? You see other men who have. Do you think they get them by wishing? Don't you feel if you had the chance you could do their work? Of course you could. Just say, "I'll do it," and you will. Get your pen. Write us a letter or postal. We will show you how.

We teach and qualify you by mail in from 8 to 14 weeks without loss of time from your present work. Positions are secured; in fact, there are many openings right now if you were qualified to fill them. Our Course is the most complete treatise on the subject of Railroading in existence. We defy any school to show a course anywhere nearly as thorough. Don't tamper with your education by buying cheap bargain courses. Ours is the only School of its kind in Canada with textbooks written for use on Canadian Railways.

Our free booklet tells all about our system of teaching. When writing, state age, weight and height.
