A Woman puts on Spectacles

(This was written by a woman in answer to our inquiry: "Do you read newspaper advertise

Newspaper advertisements have an irresistible fascination for me. Sometimes I know I shouldn't take the time to read them—but I always do. Of course, I don't mean that I always read them ALL, but I cer-tainly read some every day. I even read the men's ads. There is a certain satisfaction in surprising one's husband with up-to-date information on things only men are supposed to be interested in.

I used to have a prejudice against Life Insurance until thought the premiums were too much for my husband to pay, but an advertisement I read changed my opinion about that at once. And I got my husband make a will and appoint a Trust Company as his executor because of an advertisement I read about it, which set me

But, of course, the advertisements that interest me most are those of domestic things. Whenever I order groceries for instance, I find myself asking for the things whose names are familiar to me through reading the advertisements in the news papers. They may not be better than others, but as I don't know the names of others how can I tell? Goods that are attractively and regularly advertised always strike me as prospercus, and prosperous thi must be good, otherwise they wouldn't be prosperous, would

As for the advertisements or the stores, some of them are as attractive as many of the more general advertise ments, but I just couldn't shor without them. You see, I am like many other women. I have a young family, and I cannot get out too often during the But I read the store ad vertisements regularly, and by doing so know just what is being sold, and I can always telene my order if I can't go conveniently that day. "De Swanee Ribber."

An interesting story is told regardone of the most popular songs in world, "The Old Folks At Home." Its author was Stephen Collins Foster, who has been called "America's premier balladist." He wrote one hundred and seventy songs, including "Old Kentucky Home," "Old Black Kentucky Home,"

"Old Kentucky Home," "Old Black
Joe," and "Old Uncle Ned."
When he had written "The Old
Folks At Home," he was displeased
with the name of the river given in the second verse; in the original the verse runs:

Way down upon de Pedee ribber,

Far, far away. Dere's wha my heart is turning ebber, Dere's wha my brudders play. He asked his brother Morrison for

better name for the river:
"What Southern stream do you suggest instead of 'Pedee'?" Morrison offered Yazoo, which Stephen thought "Well, let's consult an wouldn't do. wouldn't do. Well, iteld at a star," said Morrison. On a map of Florida they found a little river called Swanee. "That's it exactly," cried

Although millions of copies of Foster's songs were sold, his life was a tragic one. He gave his first two songs to a friend, who made ten thousand dollars out of them. Marry-ing in 1850, his life was very unhappy. Eventually he went to New York, where he became a vagabond.

It was at this period of his life that

he strayed one day into a shop and, sitting at a piano, won from the keys the wistful, pleading tune, "Come where my love lies dreaming." A man who was present offered him five dollars for the song, and he accepted

Russia Needs Three Billions for Reconstruction.

According to a recent study made by Professor Goldstein, of the Moscow by Professor Goldstein, of the Moscow University, Russia requires \$3,650,000,000 to be set going again in a nor-mal way. The account in millions is made up as follows:

About 40,000 miles of railways to be built in ten years, 550; new locomotives and cars, also repairs to th existing rolling stock, 350; steel cars and street paving and bridges, country roads, 150; the river embank ments, canal works, 400; harbor works 100; telegraphs and telephones, 100; waterworks and sanitary plants in towns and villages, 200; light and power in electric central stations, 200; school buildings, 200; agricultural machinery and implements, 400; subventions for cattle and poultry rearing, also new stables, 400; restart-ing and rebuilding coal mines and iron and steel works, 400; mechanical plant for producing agricultural and electrical machinery, 100.

It is pointed out that these enormous outlays would not cover all the needs, as only a part of industry and rebuilding is considered in the present estimate. Besides, large sums would be needed to restart the former stocks and chemicals and artificial manure, for textile and all sorts of goods and also for general tooling for factories "N never have-Bo-hoo!
