Do Not Set Out Fire Without a Permit

THE welfare of new agricultural communities in this Province requires that land clearing be done with the cheapest agent at hand—Fire. Therefore, restrictions must hamper settlers as little as is consistent with safety to lives and property. Disastrous experience proves that in hot, dry weather unregulated use of fire in thickly wooded Northern Ontario means a menace to the lives and property of settlers and destruction of the provincial forest resources upon which a large part of Ontario's revenue and the livelihood of thousands of her citizens depend.

That is why Ontario adopted a "Close Season" and the "Permit System" for setting out fire. But, remember, whether you have a permit or not, you are responsible for damages caused by any fire you light. Be careful—

Save Ontario's Forests They're Yours

The "Close Season" for setting out fire in Northern Ontario is from April 15th to September 30th. During that time within the Permit Area no one may set out fire for clearing land, disposing of debris or other inflammable waste, or for any industrial purpose, without first obtaining a written fire permit from a Fire Ranger. This applies not only to settlers but to railway, section crews, camp and mill crews, road builders, including Government employees, and all other persons.

When starting fire for cooking and camping, the law requires that a place be selected free from inflammable material, that every reasonable precaution be taken to prevent such fire spreading and that

it be thoroughly extinguished before quitting the place.

The "Close Season" applies to all Ontario north of Bobcaygeon and Smith's Falls and west of the line from there to Kenora.

The Permit Area includes those parts of Nipissing, Simcoe, Temiskaming and Algoma lying north of the C.P.R. between Mattawa and North Bay and north of the C.N.R. westward to a point some 35 miles beyond Hornepayne.

The remainder of the Province forms the Exempt Area. Within the sparsely peopled Exempt Area no permits are generally issued, but those setting out fires in the "Close Season" are required to exercise every reasonable precaution and a Chief Fire Ranger, if he deems it wise, may serve a Prohibitory Notice and require a person to take out a permit.

The Fire Ranger does his best to follow the happy medium between the desire of the settler to "get a good burn" and the requirements of Public Safety. Help him all you can.

Speedy Birds.
 The swallow is a strong flyer and is estimated to fly at at least 60 miles an hour. Relative to its size, the tiny humming bird has also great powers of flight, and is thought to go from 30 to 50 miles per hour. Of course absolute proof of the average rate of speed of any species is impossible to establish. Birds make long sustained flights in migrating, but it is reasonable to suppose that steady, rather than rapid passage is then desired; while bursts of speed would be characteristic of sudden flight in pursuing prey, or escaping an enemy.

Hard On the Barber.
 In spite of the advanced prices the barber was dull, and the razor he was wielding seemed to share his discouragement.

"I've just about decided to open a butcher's shop," he said.
 "And will you close this one?" his victim gasped, feebly.

To the Farmer:

The purchase of a Piano or Victrola is only purchased invariably once in a lifetime. Therefore it behoves the purchaser to get the best and make sure you have the best.

I have had 25 years experience in tuning and repairing musical instruments, therefore feel quite confident I can choose the best instruments on the market.

I shall be pleased to place any instrument in your home beside any other in fair competition and let you yourself be the judge, without you feeling under any obligations absolutely. I can also save the purchaser quite a few dollars on account of my expenses being so low. I will always give you my best personal service and devote the whole of my time to supplying the country people. A postcard or telephone call will oblige.

Yours truly,

F. WATERS
