Hartlen's Variety Store

No man can afford to take long chances now—The cost is too great.

In 1902 blight destroyed 50,000,000 bushels of potatoes in New York state alone. Last year nearly one half of Maine's crop was lost by the ravages of disease. What will this year bring forth? No one knows and for that reason alone every potato grower must take steps to prevent the loss. Years ago when it cost very little to grow an acre of potatoes there was little incentive to spray. Men preferred to take a chance to gamble on the prospect. But no potato grower can do that now. He invests too much money in the seed. Fertilizer, labour necessary to produce a crop to take any chance on loss which can be prevented And all potato troubles, blights, and rotter can be prevented. Thorough and continued spraying will do it. We handle the "Eureka potato sprayer, the best today on the market and of American Manufacture. Also all kinds of spraying material Let us quote you prices and terms before placing your orders.
