TOWN COUNCIL.

A meeting of the Town Council of the Town of Truro, was held in the Council Chamber on September 24th, 1918.

Present Mayor W. R. Dunbar, and Councillors H. H. Johnston, W. H. Semple, H. A. Johnson, and A. R. Coffin.

The minutes of the last meeting, held September 13th, 1918, were read and approved.

Progress was reported by the Water Committee re account of Mrs. K. H. Ritchie.

On motion the report of the Inspector under the N. S. Temperance Act for the month of August was received.

On motion the report of the Food Inspector for months of July and August was received.

Progress was reported by the Fire Committee regarding changing the Chemical Engine to a Motor Driven machine.

A petition was read from property owners in the vicinity of Brunswick Street and Park road, asking that the Town make improvements for the carrying off the surface water. On motion this matter was referred to the Street and Sewer Committee with power to act.

On motion the report regarding the Municipal Fuel Yard, was received and adopted.

(This had already been printed in the News.)

On motion the Clerk was instructed to purchase 1000 tons of coal at the best possible price, in accordance with the above report.

On motion the report in reference to the grant to the Great War Veterans Association was received; and the committee were requested to interview the Government in reference to the establishment of the G. W. V. A. Headquarters in Truro.

(This Report has already been in the News.)

A letter was read from Mr. L. J. Walker in which he requested that the Town accept a Deed of a Street named Fairview Street. He stated that some grading had been done on said Street. On motion the matter was referred to the Engineer for a report.

The resignation of Miss Marion Williams was read. On motion this resignation was accepted.

The Engineer brought up the matter of water course which formerly went through the property of A. W. Flemming on Dominion St. On motion the matter of the change in this water course was referred to the Engineer and Town Solicitor for a report.

On motion the Street Committee were authorized to purchase a motor truck, the cost not to exceed \$1050.00 and the cost of same to be divided equally among the Street and Water Departments.

A letter was read from Mr. W. B. Murphy in which he requested that the Town put Water and Sewerage extensions through a proposed Street through the Clish property, now owned by him. On motion this matter was referred to the Sewer and Water Committees, and the Engineer was instructed to furnish the cost for doing this work.

On motion permission was granted Mr. H. A. Johnson, to connect the roof drainage on his property corner of Prince and Waddell Streets, with

the sewerage system.

Letters were read from three brokerage houses saying that they could not tender on our Town Bonds, at the present time, as they were not permitted to buy any new issues until after the Victory Loan Campaign. On motion the meeting adjourned.

BULGARIA OUT OF THE WAR.

The cables today are the most significant, as far as any cessation of fighting goes, since we went to battle over four years ago.

One nation of the Quadruple Alliance, Bulgaria, has been defeated, humiliated, has agreed to all the terms of the Allies for an Armistice and is out of the World War.

Hurray this is the first break. Dare we say that we see the beginning of the end?

HUNS SAY KING OF BULGARIA IS LOYAL TO CENTRAL POWERS.

Amsterdam, Sept. 30. King Ferdinand of Bulgaria has telegraphed to Emperor Charles of Austria, assuring him of his loyalty to the Quadruple Alliance, according to despatches reaching here.

BIG PUSH LAST NIGHT NEAR BELLIQUOT.

London, Sept. 30. British, Australian and American forces pushed forward last night on the front, between the Belliquot and Gonnelleau in face of the severest opposition Field Marshal Haig announced today.

FRENCH BROKE UP GERMAN COUNTER-ATTACKS.

Paris, Sept. 30. French troops in the Champagne resumed their attack at day-break today. The Germans violently counter-attacked last night southeast of St. Quentin in the Urville region in an attempt to recapture Hill 88. All these efforts were broken up by the French defence.

ALLIES ASTRIDE ST. QUENTIN-CAMBRAI CANAL.

Leatlet, the key position to the whole sector between Belliquot and Banteux, was unofficially reported in allied hands, by noon. Good news came in all day. The allies appear to be astride the St. Quentin-Cambrai railway, thus seriously restricting the enemy's communication.

NOTICE

Truro, Oct., 1st., 1918.
Owing to the recent and very great rise in our general stock we, the undersigned, are compelled to raise horse shoeing as follows:

SMART PRACTICAL TOGGERY FOR GROWING GIRLS.

Materials and Models.

New York, Sept. Her mother's wardrobe may wait a bit for replenishment, but with the opening of school the girls outfit demands immediate attention. Summer suns and strenuous sports, to say nothing of growing propensities, have put a good many garments out of the running, and it takes clever planning to salvage enough right looking things to last until cold weather arrives.

Fortunately wash things continue to be the choice for school purposes, even among people whose purse strings are long and elastic, which makes things easier for the majority. Skirts may be lengthened with tucks that hide piecing, or yokes of various kinds, and sweaters brighten and smarten the simplest and least attractive skirt or frock. Everyone now knows some form of dye that brings a faded smock back to its pristine beauty, as easily used as the "blueing" familiar to every laundress, so wash things can go often to the tub, yet keep fresh and attractive.

One can indulge in pretty delicate colorings without the dread of what the wash will do to them, and spend time on smocking knowing that the garment will last.

New Sweaters.

The latest things in sweaters shows a collar that assumes cape like proportions, when its scarf like ends are left open, or closes up well about the throat, in smart comfort when more protection is needed.

Sweater coats, both sleeved and sleeveless, are made up in all sorts of materials, and are becoming a practical for average girlish tastes.

Blouses.

Kimona cut blouses that with smocks for youthful wearers, are easily made, and are shown among the most exclusive imported models. These require very little material, and are especially easy to make, which is a consideration when everyone is too much employed with civic and war work to be willing to give too much time to domestic sewing.

Coats and Trimmings.

The best coats are loose sacque styles with little variations in the placing of belts, pockets and collars that make them attractive. Good patterns, easily obtainable make it possible for clever people to fashion these at home and save money for thrift stamps, and small pieces of fur can be used effectively for trimmings, or the material itself make the sufficient garniture if that is preferable.

VERONA CLARE

CASH CONTRIBUTIONS TO TRURO RED CROSS SEC'Y.

- Scotia Chapter I.O.D.E. \$26.00
- Proceeds of Bazaar given by the little girls of Brunswick St. 3.50
- Mrs. F. St. Yorston 25.00
- Mrs. H. B. McLaughlin 25.00
- Entertainment Truro Curling Club 10.00
- Per Chas. R. B. Bryan 9.12
- A. J. Campbell, Tobacco Fund 5.00
- Green Oak not Beaver Brook 15.00

Miller's Worm Powders will eradicate the worm evil that bears so heavily on children and is believed to cause many fatalities. They are an acceptable medicine to children and can be fully relied upon to clear the food channels thoroughly of these destructive parasites and restore the inflamed and painful surfaces to healthiness. They are an excellent remedy for these evils.

FURTHER CONTRIBUTIONS ARE WANTED.

The Committee of Victoria Loyal True Blue Lodge, had in charge, the campaign to raise funds for the Building Fund of the Protestant Orphanage, Bible Hill, wish to thank all the citizens who so generously contributed to this worthy object.

In view of the fact that there will be several other Collections during the same week for the Charitable purposes, the amount raised was not so large as might have been anticipated. At present an amount, in the vicinity of nine hundred dollars, has been handed in to the Convener of the Committee and it would be gratifying to have this increased so that one thousand dollars might be raised.

We appeal to the generosity of the people of Truro and ask, that any one wishing to give to this Fund would kindly send in donation at once, to Mrs. J. S. Weatherbee, Lyman Street, Truro.

No amount is too small, and we trust that the Thousand Dollar Mark will be reached.

Victoria Lodge Committee,
MRS. J. S. WEATHERBEE,
Convener.

AT THE WAR FRONTS.

First of all Bulgaria is out of the war. She evacuates all territory she now occupies in Greece and Serbia, demobilizes her army and surrenders all means of transport to the Allies.

She surrenders her boats and control of all navigation on the Danube river to the Allies free passage thru Bulgaria for any military operations.

All Bulgarian Arms and ammunition are to be stored under the control of the Allies who have the right to occupy all important strategic points.

So Bulgaria is down and out, as far as the War is concerned. This leaves Turkey in sore straits, cut off from the only friend she has on earth, the Hun; with a powerful British Army at her eastern door, it is likely she too, will soon up with hands and shout "Kamerade".

On the western battle front the Allies are gaining success upon success; and the enemy lines, even with fresh troops, that they are still bringing up, are being bent back, broken and crumbling before the victorious British, French, Belgians and Americans.

The Belgians have advanced so far that the Germans submarine bases, on the North Sea are in danger.

By the retirement of Bulgaria the Allies can now strike Austro-Hungary by a back-door entrance; and this jar will make the dual monarchy feel a bit of a quake in earnest.

Word comes from Germany, that the people are almost hysterical over the fact that they at last see, that they will lose the War. The common people are now fully realizing what the World has long ago known that the Central Powers cannot win.

The armistice is with the full consent of the King of Bulgaria.

And now the Berlin-Bagdad dream disappears forever.

TRURO SOLDIER SLIGHTLY WOUNDED.

Pte. Stanley Carl Wright, Hit By Huns—But Back in Fight.

Mrs. George L. Wright, Truro, has received the official telegram—Mrs. Geo. L. Wright, Truro, Cable received from England states 48831 Pte. Stanley Carl Wright, infantry, officially reported, wounded slightly, and remained on duty, Sept. 4th.

DIRECTOR OF RECORDS.

This brave young soldier got thru the military examiners all right and (to a mere boy enlisted in Halifax, in the 63rd, Overseas Regiment in December 1915.

He went over the Atlantic February, 1916. He was too young for the trenches, so he trained in England, till July 1917. He has been in lots of scraps with the Boche, and they have given him a couple of cracks; but on neither occasion has the wound been very severe, and he was back on duty almost immediately.

We wish him the same good luck. This gallant young soldier has two brothers in the fight, Gordon in the trenches, and Norm-an now in England.

THE LATE HAMILTON JOBB.

A good citizen of Londonderry, and one of the oldest residents of that place has past away.

He has been in failing health for about a year and a half. He is survived by his widow, four sons and four daughters. The sons are, Rev. T. L. Jobb, of New Mills N. B.; Chas. L. Jobb, Montreal; Gordon of Lofield, Alberta, and Edward Blake who is with his regiment in England. The daughters are Mrs. Robert Jackson, of Summerville, Mass; Mrs. Frederiek Langille, of Truro; Mrs. Phillip Vincent, New Annap and Miss Bertha at home.

Funeral very largely attended by friends and relatives was at one o'clock Saturday afternoon, the 28th inst., interment was at Great Village Cemetery.

Rev. Mr. Gillespie of Great Village, conducted the funeral services of the home and also at the grave. Mr. Jobb was born at Wallace Harbor 31 years ago, and went to Londonderry, when very young and has lived there until his death, respected and esteemed by all his fellow citizens. He has been many ups and downs in the little hamlet of Londonderry and many changes in the great iron-manufacturing plant that was once so prosperous in that district.

FLIGHT LIEUT. FRANK REID, TRURO KILLED.

Another sad Truro Casualty is reported today by official cable, Frank Reid, son of Geo. W. Reid, Prince Street, West, has fallen.

Lieut. Reid, a year or so ago enlisted in the Flying Force, trained in Texas and went overseas. In England his ability was at once recognized and he was given further training there and placed on the Instructing Flying Staff, passing his examination at top notch.

The cable of his death says that he was killed in an air flight and no further particulars are yet obtainable.

The deceased hero Airman was an active member of the First Baptist Church and at the time of his enlistment was President of the B. Y. P. U. He was an active in the Y. M. C. A. and foremost in the Academy activities, when a student there.

The bereaved father has the sympathy of all friends.

CAULIFLOWER—Prepare and can same day as picked (if possible).

Sort and clean, breaking into convenient unit sized pieces for packing. Blanch in a steamer 15 to 30 minutes. Remove and cold dip. Pack tightly into jars. Add one-half teaspoonful salt to a pint jar. Fill up space left with boiling water. Adjust rubbers, cover and partially seal. Sterilize 180 minutes in a steam cooler or hot water bath, or 90 minutes at 5 lbs. steam pressure.

(Note. Cauliflower which has been cooked and then put into a deep scallop dish with a white sauce over it flavored with cheese makes a nourishing and delicious supper or luncheon dish. The addition of buttered bread or cracker crumbs over the top is an improvement but is not absolutely necessary.)

THE LATE IDA MCKENZIE LAID TO REST.

Sunday, at 4.30 o'clock p. m., the funeral services of the late Miss Ida McKenzie, were held from the residence of her sister, Mrs. Thomas Flemming, Church Street.

Rev. W. P. Grant, officiated, assisted by Rev. Dr. Bruce.

The choir of the First Presbyterian Church provided appropriate music, singing sympathetically the hymns, "Hark, Hark, my Soul", and "Rest Cometh at Last."

The pall bearers were; Paul Lowther, John P. McKay, E. A. Murray, Chas. McDowell, Avery Hiltz, Chas. Blaikie.

The tributes of flowers, laid on the casket from the many friends of the deceased were beautiful.

The interment was at the Robie Street Cemetery.

LOOK AT THIS.

We were shown this week one of the finest collections of mammoth tomatoes that has been seen this year. They were raised in the gardens of Mr. W. H. Redding, and for size and cleanness of fruit, they would be hard to beat. The abundance of "green stuff" raised by Mr. Redding, shows that he has had marked success with his gardens this year.—Digby Courier.

And Then At This.

We can show the Digby Courier man a patch of tomatoes that has been cared for like a spoiled baby, tomatoes of the very best varieties grown, (Ponderosa, Matchless, Earliana, and Bonny Best) and yet there is nothing but a return of green fruit, of small size, and mighty little at that; and the only consolation we have, as misery likes company, is that our neighbor's gardens are just as bad.

EXPERT WELDING.

Mr. Smith Sanderson, Outram Street, Truro the well known iron and steel worker, has just finished repairing a large copper heating coil for the Globe Laundry.

In this job there were some 13 weldings performed by the use of Oxygen-acetylene gas apparatus. It was a fine job; and Mr. Sanderson makes a speciality of this line of working machinery of all kinds.

NOVA SCOTIA FIRST.

The first Sunday School in Canada was organized at Lyon's Brook, Pictou Co., 150 years ago. Mr. James Davidson was the organizer, who came to Nova Scotia, in the same ship with Rev. Daniel Cock, the first Presbyterian Minister of Truro, in 1769. The school, has an unbroken history and is still flourishing.

DOUBLE BEREAVEMENT IN LOWER TRURO FAMILY.

Pte. Alonzo Weatherbee Falls In Battle.

The deeply afflicted family of Mr. and Mrs. Charles Weatherbee, Fairview, Lower Truro, who lost a brave boy in the War on August 9, has just received a cable, that their youngest son, Pte. Alonzo Weatherbee, aged 19, was killed in battle on September 20.

This is most distressing news to this little family circle.

All the gallant fighters of that family went to the War to fight for the right and a World's Freedom; now both have made the Supreme Sacrifice. This is, indeed, sad; and every acquaintance will deeply sympathize with this bereaved family.

"SPANISH INFLUENZA"

(Issued by the Department of the Public Health; Nova Scotia.)

In the last issue of the "Quarterly Bulletin" the opinion was expressed that this province was unlikely to escape an invasion by the condition known as Spanish Influenza, which at that time had for some months prevailed in epidemic form throughout Europe. Unfortunately the prediction has been fulfilled. The disease has found its way to the North American Continent, and has become epidemic in many localities. [Nova Scotia has not escaped, and from several parts of the province it has been reported as quite prevalent.

The condition resembles in many particulars the old fashioned la grippe, but the bacteriological investigations which have been made have shown the influenza bacillus to be present in but a small percentage of cases, while the respiratory tract, are quite common.

Clinically the disease has been characterized by an acute onset, symptoms developing with such rapidity that the victim may have to stop work within a few minutes. Pains in the head, back and other parts of the body, dizziness and weakness, slight soreness of the throat and sensitiveness to light are commonly complained of. The temperature rises quick to 103 or 104 F. Movements of the eyes from side to side, and suffusion of the whites of the eyes, are not infrequently noticed.

As a rule the attack is of short duration, but it is important to note that relapse is not uncommon, so the patient should be warned against too early a return to duty. Occasionally the course is somewhat erratic, with an irregular fever which may be due to bronchitis, bronchiolitis, bronchopneumonia or a bacterial invasion of the blood stream. The respiratory tract usually bears the brunt of the attack. Cases of gastrointestinal type are unusual, and the diagnosis of gastro-intestinal with influenza is looked upon some suspicion in view of the likelihood of disturbance of the digestive tract being dependent upon food which is either more or less decomposed or which, through the exigencies of the time, is of a character to which the individual is unaccustomed.

The disease generally runs a favorable course, and fatalities have been rare. In contrast with previous experiences with influenza, serious complications and disabling sequelae have been unusual, though weakness sometime persists for a considerable time.

In treatment, rest in bed is requisite and should not be abandoned too soon. A preliminary purge is advised. Aspirin and the salicylates give relief from the discomfort, but care is to be exercised in the use of any drug which may add to depression, and such drugs should be taken only upon a physician's advice.

Crowding and imperfect ventilation appear to have a marked influence in spreading the disease. Free ventilation is therefore imperative as a preventive measure. The infective element is given off particularly in the discharges from the respiratory tract. Such discharges should consequently be promptly destroyed, and every effort should be made to limit the issuance of the organisms in the spray caused by coughing, sneezing and loud speaking. Prophylaxis is therefore similar to that in any infectious respiratory condition. Doubtless many cases of the disease are so mild that the victim does not lay up, but goes about spreading the infection. Hence the need for constantly urging everyone to pay strict heed to the small rhyme;

"Cover every cough and sneeze,
For if you don't you'll spread disease."

To avoid infection, keep away from crowds, dodge the careless cougher and sneezer, get plenty of fresh air indoors and out of doors, and endeavor to keep your health good.

October 1, 1918.
