## HON. WILLIAM **OGILVIE**

## Arrived in Dawson Yesterday Afternoon

Has Big Dredger on Stewart and Will Begin Operation Immediately.

Locking hale, hearty and prosperous and stepping with the vigorous and elastic tread of youth, Ex-Yukon Commissioner William Ogilvie landed from the deck of the steamer Crimmin vesterday afternoon after an absence from Dawson of a little more than a year. Mr. Ogilvie's visit is purely a business matter, certain details in connection with the extensive dredging operations he is now conducting on the Stewart river requiring him to come to this city.

Since leaving Dawson he has travelled extensively through the States and Canada, going from this city direct to San Francisco. Afterward he travelled eastward by easy stages, visiting Salt Lake City, St. Louis, New Orleans and numerous other cities, finally turning north to New York, Buffalo where he took in the exposition, and thence to Ottawa.

During the most of the past year Mr. Ogilvie has been engaged in perfecting his plans for developing a dredger concession which with his associates he holds on the Stewart river. For the past two months he has been busy at Whitehorse getting his machinery in working order, building the big scow required for the accommodation of the dredging apparatus and making other necessary preparations for carrying out his plans.

The Crimmin was secured to tow the dredger to its destination and successfully accomplished that feat. two days being required to reach the desired point on the Stewart after leaving the mouth of the river. It is now located about 70 miles up stream and is all ready for work. The dredger was built under Mr Ogilvie's personal direction and is fitted with every device calculated to insure a maximum saving of gold. It is designed to work on the river bottom and is capable of operating at any distance below the water sur-
