SYSTEM IS NEEDED.

The fact that two fights have recently occurred in Dover, in which knives were freely used, and the principals have not been apprehended, would lead the casual observer to suspect that there is something radically wrong with the County Constabulary forces of Kent, and any scheme which would increase its efficiency should be welcomed not only by the authorities who have its management in hand, but also the people who are supposed to be protected by it.

The County of York has a good system introduced by Judge Winchester, which this County might well afford to copy. There, an extra session of the Peace is held each year at which all the Justices of the Peace of the County are invited to be present. At this meeting the County Judge explains the different statutes, and the amendments which have been made during the previous year, making these important officers more thoroughly versed with the law which they are called upon to interpret.

The High County Constable also makes an annual report at this meeting, on the work of the year, and through it the County Constables' list is yearly revised. The High Constable's report contains recommendations upon the men who are now sworn in as constables, and those who are shown to be incompetent are struck off and new and efficient officers are appointed. In this way the County Constables' list is kept thoroughly up-to-date, and the law is more apt to be properly enforced.

At present there is practically no system in the County Constables' department, and any department without a good working system cannot help but be inefficient and to a great degree useless. It is time that something were done in Kent, and if a scheme such as this were introduced, it would no doubt be instrumental in overcoming many of the difficulties at present contended with.

It seems now that Hearst was

Rooted out.

Isn't it time for the annual meeting of the Board of Trade?

Hamilton Street Railway employees have struck, and the public seem to be the hardest hit.

What is the County Constabulary doing towards clearing up those two knife slashing affairs in Dover Township?

And McGill was arrested, a second time, for embezzlement without the front page assistance of the Globe! Isn't the faithful old organ becoming negligent?

There are several "huas" responsible for Hearst's defeat—especially those issuing from the slanderous attacks upon his opponents made through the columns of his own newspapers.

The employees of the Hamilton Street Railway Company have struck for higher wages. If the company only holds out long enough Hamilton may soon be as famous for walkers as it now is for runners.

Woolstock people are raising money for a new Y. M. C. A. building. Every time a donation of \$500 is made all the factory whistles in the place are turned on full blast. It seems rather odd, celebrating a donation towards a scheme of this kind with a general "loot."

The Banner thinks Chatham does not need Niagara power. Chatham needs anything which will promote industry, and encourage manufacturing concerns to look this way for a location. If electric power can be delivered here cheaply enough to warrant its general use—and this seems to be the case—then by all means let us have it. Don't be a knocker, Bannery old boy. Get next to Chatham's importance and be a boomer!

An industrial concern seeking encouragement from Stratford has been endorsed by the ratepayers, and, as a result, the Classic City will secure a new manufacturing industry which will be devoted to the manufacture of farm implements. The press of that city attributes the success of the by-law to the splendid work accomplished by the Board of Trade, who were instrumental in getting the scheme before the people. Stratford is fortunate in the possession of a life Board of Trade. If Chatham had such an organization in working shape our chances for securing some of these industries would be greatly strengthened.

JUST A LITTLE BIT OFF THE TOP

They are going to tear down the old Klondike Hotel, but it will not be the first occasion on which things have been torn loose in that vicinity.

A young man who attended a party in Dover while the worst of liquor was told by his brother that he would have to let up on his nasty behaviour, whereupon he drew a knife and got into trouble. Probably the young man only was trying to comply with his brother's wish when he asked him to cut it out.

The steam heat in the Central school is said to condense before it reaches the top of the building. So much teaching going on in the immediate vicinity must likely lessen the temperature.

William Randolph Hearst was defeated in the New York elections, but he will carry away enough mud and personal abuse adjectives to keep his yellow league going in language till the next campaign rolls around.

Astronomers say that Mars is again trying to signal the earth. Likely as not someone up there wants to work Manager Brisco for a pass to "Charley's Aunt."

Mrs. Eddy, the head of the Christian Science church, is said to be in very poor health, but then may be she only thinks she is ill.
