## Communications. Agricultural Education.

To the Editor of the STAR:--

SIR, -- The genius of the statesman consists in determining from elements social an. industrial, that escape ordinary observers, public institutions must keep page with, or slightly precede, the development of their industrial life, especially when old industries are undergoing decay, and new ones are springing up. This principle must apply more strongly to comparatively new coun tries than to old ones; for the near and immediately productive, and for this reason often the least enduring, are the occupation that first engross our care. Hence in New Brunswick lumbering and the manufacture and export of all kinds of timber became the chief concern of its inhabitants. Farming who had not the means nor business tact for Sable Island. lumbering. The timber trade the great storeroom and granary of the past, from which all drew directly or indirectly the means of living, is in many sections, and from various causes, on the decine; and a little of their literary spirit on the stem although a spasmodic .t occurs from time -The ice on the river is good enough of general ignorance here. Two ci izens to time in the business, we must not delude
