THE SOUTH BELT.

There is no longer any doubt as to the value of the South Belt. A year ago its future was entirely a matter of speculatian-today it is assurred. The past few months' work has made a mine of the Orown Point. More recent work has put the Deer Park, Phonix, Nest Egg, Maydower and Sunset in the front rank of partially developed properties. Anyone of these claims has as good prospects of making a big mine as any of the same class on Red or Monte Cristo mountains in the North Belt. Besides these the Homestake, Gopher, R. E. Lee, Maid of Brin and other claims along that great dedge are assuredly great prospects and it is a question if the Homestake at least

We believe that the next few months will witness such developments in the South Belt as to make its leading propinvestments in every way with the leading mines in the North Belt. There is heretofore existing under the firm name of Lanneau & Williams has this zznd day of October, an immense number of claims being actively developed besides the list above tively developed besides the list above the lis erties equally desirable and attractive entimerated and from among them it is paid to Lanneau & Williams.

The San Francisco is the scene of the latest strike. E. D. Martin, one of the principal owners, has been directing the prospecting work lately started on the aim. He decided to endeavor to trace the ledge opened in a shaft on the Mariposa just beyond the San Francisco's west line and also in a prospecting shaft at the head of the gulch alongside the O.K. grade. A very little stripping on the west side of the gulch soon brought the ledge into plain view and a couple of shots in the capping exposed a good body of nearly solid ore.

The miners were then directed to proceed stripping the vein up the hill to the west. This they did exposing the capping of a vein 12 to 15 feet in width for a distance of 100 feet. At this point another shot was put in and a second body of solid ore thrown out.

This showing on the San Francisco is ene of the best in that portion of the ap and makes the property more than a prospect. Work will now be concentrated on a tunndl on this vein from the level of the gulch and the next few weeks should result in a showing on the San Francisco that will make several Winnipeggers happy, the principal owners being residents of Manitoba's capital. Joe Martin is president of the company and his many friends will be pleased to hear of his good fortune.

C. V. Cooper, contracting freight agent of the Union Pacific railroad, was in camp this week. The Union Pacific, ike all other American roads having Pacific coast connections, has already felt the benefits of the opening of the British Columbia mining districts, and we may expect it to be an active com-petitor for Kootenay business in the

J. Grant Lyman, vice president and one of the directors of the Colorado Gold Mining and Development Company of Rochester, N. Y., was in the camp this week. Mr. Lyman's company has some of the most substantial men in Canada connected with it and is organized on a very sensible basis. It is possible the company will become possessed of a property in this camp.

George Gurd, secretary of the Anglo-Canadian Mining Exchange, Ld., of Toronto, arrived in Rossland Tuesday and has already opened an office. His company intends to organize a regular
